|---|----------|
| List of Contributors xv   |          |
| Preface   | p. xxi   |
| Foreword  | p. xxiii |
| Fundamentals  | p. 1     |
| Quantum Spin Hall Effect and Topological Insulators                 |          |
| References  | p. 9     |
| Hybridization of Topological Surface States and Emergent States     | p. 11    |
| Introduction  | p. 11    |
| Topological Phases and Surface States                               | p. 12    |
| Topological Insulators and $Z_2$ Topological Numbers                | p. 12    |
| Weyl Semimetals   | p. 13    |
| Phase Transition between Topological Insulators and Weyl semimetals | p. 15    |
| Hybridization of Topological Surface States and Emergent States     | p. 19    |
| Chirality of the Surface Dirac Cones                                | p. 19    |
| Thin Film   | p. 20    |
| Interface between Two TIs   | p. 21    |
| Superlattice  | p. 25    |
| Summary   | p. 28    |
| Acknowledgements  | p. 29    |
| References  | p. 29    |
| Topological Insulators in Two Dimensions                            | p. 31    |
| Introduction  | p. 31    |
| 2D TIs: Inverted HgTe/CdTe and Inverted InAs/GaSb Quantum Wells     | p. 33    |
