Neurons and Features

Invited Paper (1)

Ultra-Rapid Scene Categorization with a Wave of Spikes p. 1
A Biologically Motivated Scheme for Robust Junction Detection p. 16
Iterative Tuning of Simple Cells for Contrast Invariant Edge Enhancement p. 27
How the Spatial Filters of Area V1 Can Be Used for a Nearly Ideal Edge Detection p. 38

Posters (1)

Improved Contour Detection by Non-classical Receptive Field Inhibition p. 50
Contour Detection by Synchronization of Integrate-and-Fire Neurons p. 60
Reading Speed and Superiority of Right Visual Field on Foveated Vision p. 70
A Model of Contour Integration in Early Visual Cortex p. 80
Computational Cortical Cell Models for Continuity and Texture p. 90
Unsupervised Image Segmentation Using a Colony of Cooperating Ants p. 109
Image Reconstruction from Gabor Magnitudes p. 117
A Binocular Stereo Algorithm for Log-Polar Foveated Systems p. 127
Rotation-Invariant Optical Flow by Gaze-Depended Retino-Cortical Mapping p. 137
An Analysis of the Motion Signal Distributions Emerging from Locomotion through a Natural Environment p. 146

Motion

Invited Paper (2)

Prototypes of Biological Movements in Brains and Machines p. 157
Insect-Inspired Estimation of Self-Motion p. 171
Tracking through Optical Snow p. 181
On Computing Visual Flows with Boundaries: The Case of Shading and Edges p. 189
Biological Motion of Speech p. 199

Mid-Level Vision

Invited Paper (3)

Object Perception: Generative Image Models and Bayesian Inference p. 207
The Role of Propagation and Medial Geometry in Human Vision p. 219
Ecological Statistics of Contour Grouping p. 230
Statistics of Second Order Multi-Modal Feature Events and Their Exploitation in Biological and Artificial Visual Systems p. 239

Recognition - From Scenes to Neurons

Invited Paper (4)

Qualitative Representations for Recognition p. 249
Scene-Centered Description from Spatial Envelope Properties p. 263
Visual Categorization: How the Monkey Brain Does It p. 273
A New Approach towards Vision Suggested by Biologically Realistic Neural Microcircuit Models p. 282
Posters (2)

Interpreting LOC Cell Responses

Neural Mechanisms of Visual Flow Integration and Segregation - Insights from the Pinna-Brelstaff Illusion and Variations of It

Reconstruction of Subjective Surfaces from Occlusion Cues

Extraction of Object Representations from Stereo Image Sequences Utilizing Statistical and Deterministic Regularities in Visual Data

A Method of Extracting Objects of Interest with Possible Broad Application in Computer Vision

Medical Ultrasound Image Similarity Measurement by Human Visual System (HVS) Modelling

Seeing People in the Dark: Face Recognition in Infrared Images

Modeling Insect Compound Eyes: Space-Variant Spherical Vision

Facial and Eye Gaze Detection

1-Click Learning of Object Models for Recognition

On the Role of Object-Specific Features for Real World Object Recognition in Biological Vision

Object Detection in Natural Scenes by Feedback

Stochastic Guided Search Model for Search Asymmetries in Visual Search Tasks

Biologically Inspired Saliency Map Model for Bottom-up Visual Attention

Hierarchical Selectivity for Object-Based Visual Attention

Attention

Invited Paper (5)

Attending to Motion: Localizing and Classifying Motion Patterns in Image Sequences

A Goal Oriented Attention Guidance Model

Visual Attention Using Game Theory

Attentional Selection for Object Recognition - A Gentle Way

Audio-Oculomotor Transformation

Posters (3)

Gender Classification of Human Faces

Face Reconstruction from Partial Information Based on a Morphable Face Model

Dynamics of Face Categorization

Recognizing Expressions by Direct Estimation of the Parameters of a Pixel Morphable Model

Modeling of Movement Sequences Based on Hierarchical Spatial-Temporal Correspondence of Movement Primitives

Automatic Synthesis of Sequences of Human Movements by Linear Combination of Learned Example Patterns

An Adaptive Hierarchical Model of the Ventral Visual Pathway Implemented on a Mobile Robot

A New Robotics Platform for Neuromorphic Vision: Beobots
Learning to Act on Objects p. 567
Egocentric Direction and the Visual Guidance of Robot Locomotion p. 576
Background, Theory and Implementation
Evolving Vision-Based Flying Robots p. 592
Robotics
Object Detection and Classification for Outdoor Walking Guidance System p. 601
Understanding Human Behaviors Based on Eye-Head-Hand Coordination p. 611
Vision-Based Homing with a Panoramic Stereo Sensor p. 620
Cognitive Vision
Invited Paper (6)
Unsupervised Learning of Visual Structure p. 629
Role of Featural and Configural Information in Familiar and Unfamiliar Face Recognition p. 643
View-Based Recognition of Faces in Man and Machine: Re-visiting Inter-extra-Ortho p. 651
Author Index p. 661
