

Approximation bounds by neural networks in $L_{[\omega]}^{[p]}$	p. 1
Geometric interpretation of nonlinear approximation capability for feedforward neural networks	p. 7
Mutual information and topology 1 : asymmetric neural network	p. 14
Mutual information and topology 2 : symmetric network	p. 20
Simplified PCNN and its periodic solutions	p. 26
On robust periodicity of delayed dynamical systems with time-varying parameters	p. 32
Delay-dependent criteria for global stability of delayed neural network system	p. 38
Stability analysis of uncertain neural networks with delay	p. 44
A new method for robust stability analysis of a class of recurrent neural networks with time delays	p. 49
Criteria for stability in neural network models with iterative maps	p. 55
Exponential stability analysis for neural network with parameter fluctuations	p. 61
Local stability and bifurcation in a model of delayed neural network	p. 67
On the asymptotic stability of non-autonomous delayed neural networks	p. 72
Global exponential stability of Cohen-Grossberg neural networks with multiple time-varying delays	p. 78
Stability of stochastic Cohen-Grossberg neural networks	p. 84
A novel approach to exponential stability analysis of Cohen-Grossberg neural networks	p. 90
Analysis for global robust stability of Cohen-Grossberg neural networks with multiple delays	p. 96
On robust stability of BAM neural networks with constant delays	p. 102
Absolutely exponential stability of BAM neural networks with distributed delays	p. 108
Stability analysis of discrete-time cellular neural networks	p. 114
Novel exponential stability criteria for fuzzy cellular neural networks with time-varying delay	p. 120
Stability of discrete Hopfield networks with delay in serial mode	p. 126
Further results for an estimation of upperbound of delays for delayed neural networks	p. 132
Synchronization in two uncoupled chaotic neurons	p. 138
Robust synchronization of coupled delayed recurrent neural networks	p. 144
Self-optimizing neural networks	p. 150
Genetically optimized self-organizing neural networks based on PNs and FPNs	p. 156
A new approach to self-organizing hybrid fuzzy polynomial neural networks : synthesis of computational intelligence technologies	p. 162
On soft learning vector quantization based on reformulation	p. 168
A new approach to self-organizing polynomial neural networks by means of genetic algorithms	p. 174
Fuzzy-kernel learning vector quantization	p. 180
Genetic generation of high-degree-of-freedom feed-forward neural networks	p. 186
Self-organizing feature map based data mining	p. 193
Diffusion and growing self-organizing map : a nitric oxide based neural model	p. 199
A new adaptive self-organizing map	p. 205

Evolving flexible neural networks using ant programming and PSO algorithm	p. 211
Surrogating neurons in an associative chaotic neural network	p. 217
Ensembles of RBFs trained by gradient descent	p. 223
Gradient descent training of radial basis functions	p. 229
Recent developments on convergence of online gradient methods for neural network training	p. 235
A regularized line search tunneling for efficient neural network learning	p. 239
Transductive learning machine based on the affinity-rule for semi-supervised problems and its algorithm	p. 244
A learning algorithm with Gaussian regularizer for kernel neuron	p. 252
An effective learning algorithm of synergetic neural network	p. 258
Sparse Bayesian learning based on an efficient subset selection	p. 264
A novel fuzzy neural network with fast training and accurate generalization	p. 270
Tuning neuro-fuzzy function approximator by tabu search	p. 276
Finite convergence of MRI neural network for linearly separable training patterns	p. 282
A rapid two-step learning algorithm for spline activation function neural networks with the application on biped gait recognition	p. 286
An online feature learning algorithm using HCI-based reinforcement learning	p. 293
Optimizing the weights of neural networks based on antibody clonal simulated annealing algorithm	p. 299
Backpropagation analysis of the limited precision on high-order function neural networks	p. 305
LMS adaptive notch filter design based on immune algorithm	p. 311
Training radial basis function networks with particle swarms	p. 317
Optimizing weights by genetic algorithm for neural network ensemble	p. 323
Survival density particle swarm optimization for neural network training	p. 332
Modified error function with added terms for the backpropagation algorithm	p. 338
Robust constrained-LMS algorithm	p. 344
A novel three-phase algorithm for RBF neural network center selection	p. 350
Editing training data for kNN classifiers with neural network ensemble	p. 356
Learning long-term dependencies in segmented memory recurrent neural networks	p. 362
An optimal neural-network model for learning posterior probability functions from observations	p. 370
The layered feed-forward neural networks and its rule extraction	p. 377
Analysing contributions of components and factors to pork odour using structural learning with forgetting method	p. 383
On multivariate calibration problems	p. 389
Control of associative chaotic neural networks using a reinforcement learning	p. 395
A method to improve the transiently chaotic neural network	p. 401
A new neural network for nonlinear constrained optimization problems	p. 406
Delay PCNN and its application for optimization	p. 413
A new parallel improvement algorithm for maximum cut problem	p. 419
A new neural network algorithm for clique vertex-partition problem	p. 425

An algorithm based on Hopfield network learning for minimum vertex cover problem	p. 430
A subgraph isomorphism algorithm based on Hopfield neural network	p. 436
A positively self-feedbacked Hopfield neural network for N-queens problem	p. 442
NN-Based GA for engineering optimization	p. 448
Applying GENET to the JSSCSOP	p. 454
Improvements to Bennett's nearest point algorithm for support vector machines	p. 462
Distance-based selection of potential support vectors by kernel matrix	p. 468
A learning method for robust support vector machines	p. 474
A cascade method for reducing training time and the number of support vectors	p. 480
Minimal enclosing sphere estimation and its application to SVMs model selection	p. 487
Constructing support vector classifiers with unlabeled data	p. 494
Nested buffer SMO algorithm for training support vector classifiers	p. 500
Support vector classifier with a fuzzy-value class label	p. 506
RBF kernel based support vector machine with universal approximation and its application	p. 512
A practical parameters selection method for SVM	p. 518
Ho-Kashyap with early stopping versus soft margin SVM for linear classifiers - an application	p. 524
Radar HRR profiles recognition based on SVM with power-transformed-correlation kernel	p. 531
Hydrocarbon reservoir prediction using support vector machines	p. 537
Toxic vapor classification and concentration estimation for space shuttle and international space station	p. 543
Optimal watermark detection based on support vector machines	p. 552
Online LS-SVM learning for classification problems based on incremental chunk	p. 558
A novel approach to clustering analysis based on support vector machine	p. 565
Application of support vector machine in queuing system	p. 571
Modelling of chaotic systems with novel weighted recurrent least squares support vector machines	p. 578
Nonlinear system identification based on an improved support vector regression estimator	p. 586
Anomaly detection using support vector machines	p. 592
Power plant boiler air preheater hot spots detection system based on least square support vector machines	p. 598
Support vector machine multiuser detector for TD-SCDMA communication system in multipath channels	p. 605
Eyes location by hierarchical SVM classifiers	p. 611
Classification of stellar spectral data using SVM	p. 616
Iris recognition using support vector machines	p. 622
Heuristic genetic algorithm-based support vector classifier for recognition of remote sensing images	p. 629
Landmine feature extraction and classification of GPR data based on SVM method	p. 636
Occupant classification for smart airbag using stereovision and support vector machines	p. 642
Support vector machine committee for classification	p. 648

Automatic modulation classification by support vector machines	p. 654
Blind source separation using for time-delay direction finding	p. 660
Frequency-domain separation algorithms for instantaneous mixtures	p. 666
Cumulant-based blind separation of convolutive mixtures	p. 672
A new blind source separation method based on fractional lower order statistics and neural network	p. 678
A clustering approach for blind source separation with more sources than mixtures	p. 684
A blind source separation algorithm with linear prediction filters	p. 690
A blind source separation based micro gas sensor array modeling method	p. 696
A novel denoising algorithm based on feedforward multilayer blind separation	p. 702
The existence of spurious equilibrium in FastICA	p. 708
Hardware implementation of pulsed neural networks based on delta-sigma modulator for ICA	p. 714
Study on object recognition based on independent component analysis	p. 720
Application of ICA method for detecting functional MRI activation data	p. 726
Single-trial estimation of multi-channel VEP signals using independent component analysis	p. 732
Data hiding in independent components of video	p. 738
Multisensor data fusion based on independent component analysis for fault diagnosis of rotor	p. 744
Substructural damage detection using neural networks and ICA	p. 750
Speech segregation using constrained ICA	p. 755
Adaptive RLS implementation of non-negative PCA algorithm for blind source separation	p. 761
Progressive principal component analysis	p. 768
Extracting target information in multispectral images using a modified KPCA approach	p. 774
Use PCA neural network to extract the PN sequence in lower SNR DS/SS signals	p. 780
Hierarchical PCA-NN for retrieving the optical properties of two-layer tissue model	p. 786
Principal component analysis neural network based probabilistic tracking of unpaved road	p. 792
Chemical separation process monitoring based on nonlinear principal component analysis	p. 798
An adjusted Gaussian skin-color model based on principal component analysis	p. 804
Convergence analysis for Oja+MCA learning algorithm	p. 810
On the discrete time dynamics of the MCA neural networks	p. 815
The cook projection index estimation using the wavelet kernel function	p. 822
Automatic cluster number determination via BYY harmony learning	p. 828
Unsupervised learning for hierarchical clustering using statistical information	p. 834
Document clustering algorithm based on tree-structured growing self-organizing feature map	p. 840
Improved SOM clustering for software component catalogue	p. 846
Classification by multilayer feedforward ensembles	p. 852

Robust face recognition from a single training image per person with kernel-based SOM-face	p. 858
Unsupervised feature selection for multi-class object detection using convolutional neural networks	p. 864
Recurrent network as a nonlinear line attractor for skin color association	p. 870
A Bayesian classifier by using the adaptive construct algorithm of the RBF networks	p. 876
An improved analytical center machine for classification	p. 882
Analysis of fault tolerance of a combining classifier	p. 888
