Zeitkontinuitat in zeitdiskreten modellen - Neue Ansatze fur die Produktion in der Prozessindustrie p. 3

A hierarchical production planning approach for multiprocessor flow shops p. 9

Representing labor demands in airport ground staff scheduling p. 15

Rapid mathematical programming or how to solve Sudoku puzzles in a few seconds p. 21

Standortplanung von Einsatzkraften bei Grossereignissen p. 29

Customer selection and profit maximization in vehicle routing problems p. 37

A decision support system for strategic and operational planning of road feeder services p. 43

Mehrdetp-Umlaufplanung : Berucksichtigung von Verschiebeintervallen fur Fahrten in einem time-space-Netzwerk-basierten modell p. 49

Adaptive Dienst - und Umlaufplanung in OPNV p. 55

Timber transport vehicle routing problems : formulation and heuristic solution p. 61

Robustness in the context of autonomous cooperating logistic processes : a sustainability perspective p. 67

Open vehicle routing problem with time deadlines : solution methods and an application p. 73

An optimal control policy for crossdocking terminals p. 79

An enumerative approach to rail-truck intermodal transportation of mixed shipments p. 85

Some remarks on the stability of production networks p. 91

Simulating dispatching strategies for automated container terminals p. 97

Integration of berth allocation and crane assignment to improve the resource utilization at a seaport container terminal p. 105

Simulation der supply chain fur offshore-wind-energie-analgen p. 111

Modeling and solution for yard truck dispatch planning at container terminal p. 117

Strategic tools for the sustainable development of maritime regions p. 123

A two-echelon model for inventory and returns p. 131

Bestimmung von Losgrossen, Transportzyklen und Sicherheitsbestanden in unternehmensubergreifenden Wertschopfungsketten p. 137

A group setup strategy for PCB assembly on a single automated placement machine p. 143

Optionsbundelung und Fertigungsablauf in der automobilindustrie p. 149

A heuristic method for large-scale batch scheduling in the process industries p. 155

Planning disassembly for remanufacturing under a rolling schedule environment p. 161

An LP-based heuristic approach for strategic supply chain design p. 167

Der Einfluss von alternativen Bezugsquellen auf die optimale Beschaffungsstrategie p. 173

Distributed planning in product recovery networks p. 179

Valuing product portfolios under uncertainty and limited capacity p. 185

Entwicklung eines reaktiven Schedulingsystems fur die Prozessindustrie p. 191
Recovery knowledge acquisition in medium and long term planning of a joint manufacturing / remanufacturing system

p. 197

Performance measurement of Hedge fund indices - does the measure matter?

p. 205

On the applicability of a Fourier based approach to integrated market and credit portfolio models

p. 211

Dynamic replication of non-maturing assets and liabilities

p. 217

Portfolio optimization under partial information and convex constraints in a hidden Markov model

p. 223

Robuste portfoliooptimierung : Eine kritische Bestandsaufnahme und ein Vergleich alternativer Verfahren

Effizienzanalyse deutscher Banken mit data envelopment analysis und Stabilitatsanalysen

p. 229

Duality in fuzzy multiple objective linear programming

p. 235

Variable subset selection for credit scoring with support vector machines

p. 243

Genetically constructed kernels for support vector machines

p. 251

Optimierung von Warteschlangensystemen durch approximation mit Neuronalen Netzen

p. 257

Aktienkursprognose anhand von Jahresabschlussdaten mittels Kunstlicher Neuronaler Netze und okonometrischer Verfahren

On the computational performance of a semidefinite programming approach to single row layout problems

p. 263

On some probability inequalities for some discrete optimization problems

p. 269

Two-dimensional cutting stock problem under low demand : a study case

p. 277

Length-bounded and dynamic k-splittable flows

p. 283

Locating and sizing bank-branches by opening, closing or maintaining facilities

p. 291

Simulated annealing based algorithm for the 2D bin packing problem with impurities

p. 297

LP-based genetic algorithm for the minimum graph bisection problem

p. 303

Scheduling departures at airports - a MILP approach

p. 309

Optimization of sheet metal products

p. 315

Modellierung von Entscheidungsproblemen in der Lehre - Ein Erfahrungsbericht

A column generation approach to airline crew scheduling

p. 321

A flexible model and efficient solution strategies for discrete location problems

p. 327

Finding feasible solutions to hard mixed-integer programming problems using hybrid heuristics

p. 333

Optimisation of the variant combination of control units considering the order history

p. 337

Solving a dynamic real-life vehicle routing problem

p. 343

Heuristic enhancements to the k-best method for solving biobjective combinatorial optimisation problems

p. 349

Finding feasible solutions to hard mixed-integer programming problems using hybrid heuristics

p. 355

Optimisation of the variant combination of control units considering the order history

p. 361

Solving a dynamic real-life vehicle routing problem

p. 367

Heuristic enhancements to the k-best method for solving biobjective combinatorial optimisation problems

p. 373
Sollen Anschlussverbindungen bei Verspätungen unterbrochen werden? - Ein Ansatz zur Formulierung der Fragestellung in der Theorie des option pricing

Some remarks on the GIST approach for the vehicle routing problem with pickup and delivery and time windows (VRPPDTW)

Analyse der Beschleunigung des A*-Verfahrens durch verbesserte Schatzer fur die Restdistanz

Modelling transport networks by means of autonomous units

Routing in line planning for public transport

Tourenplanung mittelstandischer Speditionsunternehmen in Stuckgutkooperationen

Closed networks of generalized S-queues with unreliable servers

A set packing approach for scheduling elective surgical procedures

Locating health facilities in Nouna District, Burkina Faso

A dual algorithm to obtain highly practical solutions in static multileaf collimation

Challenges in the optimization of biosystems II : mathematical modeling and stability analysis of gene-expression patterns in an extended space and with Runge-Kutta discretization

Wavelet schemes for linear-quadratic elliptic control problems

Aggregate game and international fishery with several countries

A centrist poverty index

Does a market sensitive price strategy pay off in an oligopoly market disturbed by competitors without any concept?

Order stable solutions for two-sided matching problems

Data mining for big data macroeconomic forecasting : a complementary approach to factor models

Dominance and equilibria in the path player game

Exact solution to a class of stochastic resource extraction problems

Investment attraction and tax reform : a stochastic model

Bayesian versus maximum likelihood estimation of term structure models driven by latent diffusions

Exit in duopoly under uncertainty and incomplete information

Real option approach on implementation of wind-diesel hybrid generators

Mobile Dienste zum Terminmanagement bei Geschäftsprozessen mit Kundenkontakt

Biometrische Absicherung von Web-Applikationen mit BioW3

Performance-measurement- und Analyse-Konzepte im Hochschulcontrolling

Risikoanalyse und Auswahl von Massnahmen zur Gewahrleistung der IT-Sicherheit

m-Parking - mobile parking payment systems in Europa

Energieorientierte Maschinenbelegungsplanung auf basis evolutionarer algorithmen

Multi objective pinch analysis (MOPA) using PROMETHEE to evaluate resource efficiency
An emission analysis on toxic substances (SPM and NO\textsubscript{x}) from transportation networks system in Tokyo of Japan  
Planning and evaluation of sustainable reverse logistics systems  
Simultaneous dynamic pricing and lot-sizing decision for a discrete number of price variations  
Optimal fares for public transport  
Auswirkungen eines kontinuierlichen fleet assignment prozesses  
Monotonic spline regression to estimate promotional price effects : a comparison to benchmark parametric models  
Robust preference measurement  
Improving the predictive validity of quality function deployment by conjoint analysis : a Monte Carlo comparison  
System dynamics based prediction of new product diffusion : an evaluation  
Portfolio optimization as a tool for knowledge management  
Berücksichtigung nicht-finanzieller Aspekte im Rahmen eines Entscheidungsmodells für Zwecke der Unternehmenssteuerung  
Wirtschaftliche Folgen von Verträgen - eine Simulationsstudie  
Identifying segments of a domestic tourism market by means of data mining  
Scheduling tests in automotive R&D projects  
Cyclic scheduling problems with linear precedences and resource constraints  
Ein system zur Lösung multikriterieller Probleme der Ablaufplanung  
On a single machine due date assignment and scheduling problem with the rate-modifying activity  
Primal-dual combined with constraint propagation for solving RCPSPWET  
Ein Ameisenalgorithmus für die ressourcenbeschränkte Projektplanung mit Zeitfenstern und Kalendern  
The flow shop problem with random operation processing times  
A heuristic solution for a driver-vehicle scheduling problem  
Scheduling jobs with uncertain parameters : analysis of research directions  
Job-shop scheduling by GA : a new crossover operator  
Robotic cells : configurations, conjectures and cycle functions  
Robot task planning for laser remote welding  
Technologischer Fortschritt in der deutschen Bankenwirtschaft  
Consistency matrices within scenario technique : an empirical investigation  
Distributed neurosimulation  
Multi-criteria decision support and uncertainty handling, propagation and visualisation for emergency and remediation management  
Interactive decision support based on multiobjective evolutionary algorithms  
Using a combination of weighting methods in multiattribute decision-making  
Gremienentscheidungen bei partiellen Präferenzordnungen  
The impact of preference structures in multi-issue negotiations - an empirical analysis
