

Hirschsprung's Disease: A Historical Perspective - 1691-2005	p. 1
Development of the Enteric Nervous System	p. 13
Introduction	p. 13
Embryonic Origin of ENS	p. 13
Origin and Development of Neural Crest-Derived Cells	p. 14
Functional Development of the ENS	p. 15
Development of Intestinal Motility	p. 15
Genes Involved in ENS Development	p. 15
Other Factors Implicated in the Control of ENS Development	p. 17
Conclusions	p. 17
Functional Anatomy of the Enteric Nervous System	p. 21
Introduction	p. 21
The Normal Enteric Nervous System	p. 22
Organization of Enteric Neurons	p. 23
The ENS is Derived from the Neural Crest	p. 23
The Crest-Derived Cells that Colonize the Gut are Originally Pluripotent and Migrate to the Bowel Along Defined Pathways in the Embryo	p. 25
Enteric Neurons are Derived from More Than One Progenitor Lineage	p. 25
Dependence of Enteric Neuronal Subsets on Different Microenvironmental Signals (Growth/Differentiation Factors) Defines Sublineages of Precursor Cells: RET and Glial Cell Line-Derived Neurotrophic Factor	p. 27
The Development of the ENS is Probably Influenced by a Neurotrophin	p. 28
NT-3 Promotes the Development of Enteric Neurons	p. 29
The Development of the ENS is Probably Influenced by a Cytokine	p. 31
An Aganglionosis Similar to That in Hirschsprung's Disease Occurs in Is/Is and sl/sl Mice	p. 32
Genetic Abnormalities in Genes Encoding Endothelin-3 or its Receptor, Endothelin-B, are Associated with Spotted Coats and Aganglionosis	p. 32
An Action of EDN3 on Crest-Derived Precursors Does Not, by Itself, Account for the Pathogenesis of Aganglionosis	p. 33
The Pathogenesis of Aganglionosis Is Not Explained by an Abnormality Limited to Crest-Derived Neural Precursors	p. 34
The Extracellular Matrix is Abnormal in the Presumptive Aganglionic Bowel of Is/Is Mice	p. 35
Laminin-1 Promotes the Development of Neurons from Enteric Cells of Neural Crest Origin	p. 36
The Effect of Laminin-1 on Enteric Neuronal Development Depends on the Binding of its [alpha]1 Chain to LBP110	p. 36
The Effects of Laminin-1 on Crest-Derived Cells Immunoselected from the Fetal Bowel Are Different from those of Laminin-1 on Cells Isolated from the Crest Itself	p. 37
Premature Neuronal Differentiation May Result When Inadequately Resistant Progenitors Encounter an Excessively Permissive Extracellular Matrix	p. 38
Both Crest-Derived and Non-Neuronal Cells of the Colon Probably Respond to EDN3	p. 38
Interstitial Cells of Cajal are Present, but Abnormal, in the Aganglionic Bowel of Hirschsprung's Disease	p. 39

Hirschsprung's Disease is Associated with Many Different Genetic Abnormalities: Conclusion From Animal Models	p. 40
Summary	p. 40
Animal Models of Aganglionosis	p. 51
Introduction	p. 51
History	p. 51
Histologic Anatomy	p. 52
Physiology	p. 53
Embryologic Studies on Rodent Models of Aganglionosis	p. 54
Molecular Genetics	p. 55
Contribution of Animal Models to Theories as to the Cause of Aganglionosis	p. 57
Summary	p. 58
The Molecular Genetics of Hirschsprung's Disease	p. 63
Epidemiology and Genetics of HSCR	p. 63
The RET Protooncogene	p. 64
Other Genes Involved in HSCR Pathogenesis	p. 65
Genetic Analysis to Identify Other HSCR Loci	p. 71
Additional Contribution of the RET Gene: SNPs and Haplotypes	p. 72
Genetic Counseling	p. 73
Normal Colonic Motor Function and Relevant Structure	p. 79
Introduction	p. 79
Morphology	p. 80
Motor Functions of the Large Intestine	p. 86
Pathophysiology of Hirschsprung's Disease	p. 95
Introduction	p. 95
Organization of the Gut	p. 95
Motility of the Gut	p. 98
The Gut in Hirschsprung's Disease	p. 100
Gut motility in Hirschsprung's Disease	p. 102
Final Remarks	p. 103
Hirschsprung's Disease: Clinical Features	p. 107
Introduction	p. 107
Incidence	p. 107
Classification	p. 107
Sex	p. 107
Race	p. 108
Heredity	p. 108
Clinical Presentation	p. 110
Congenital Anomalies and Genetic Associations in Hirschsprung's Disease	p. 115
Introduction	p. 115
Etiology of HSCR	p. 115
Overview of Associated Anomalies in HSCR	p. 116

Gene-related Associations of HSCR	p. 118
Significant Clinical Associations of HSCR	p. 119
Other Less Common Associations with HSCR	p. 124
Enterocolitis Complicating Hirschsprung's Disease	p. 133
Introduction	p. 133
Pathogenesis	p. 133
Theories of Pathogenesis	p. 134
Microbiology	p. 137
Pathology	p. 137
Risk Factors for Enterocolitis	p. 137
Clinical Presentation and Diagnosis	p. 138
Treatment	p. 140
Prognosis	p. 141
Diagnosis of Hirschsprung's Disease and Allied Disorders	p. 145
Radiological Diagnosis	p. 145
Initial Radiographs	p. 145
Differential Diagnosis	p. 146
Enema Technique	p. 146
Enema Findings	p. 148
Enterocolitis	p. 149
Postoperative Examinations	p. 149
Intestinal Neuronal Dysplasia	p. 151
Functional Diagnosis	p. 153
Anorectal Motility	p. 153
Physiology of the Internal Anal Sphincter	p. 155
Comparison of the Internal Anal Sphincter and the Rectum	p. 156
Electromanometry	p. 157
Pathological Electromanometric Criteria	p. 166
Potential Electromanometric Errors	p. 171
Accuracy of Electromanometry	p. 173
Anorectal Manovolumetry	p. 174
Electromyography	p. 174
Endosonography	p. 175
Transit-time studies	p. 175
Conclusions	p. 180
Histopathological Diagnosis and Differential Diagnosis of Hirschsprung's Disease	p. 185
Introduction	p. 185
Hirschsprung's Disease	p. 185
Ultrashort Hirschsprung's Disease (UHD)	p. 187
Total Aganglionosis of the Colon	p. 187
Hypoganglionosis of the Colon	p. 188

Immaturity of the Submucous and Myenteric Plexus	p. 188
Intestinal Neuronal Dysplasia Type B (IND B)	p. 189
Intestinal Neuronal Dysplasia Type A (IND A)	p. 191
Hypoplasia of Nerve Cells in the Submucous and Myenteric Plexus (Hypoplastic Dysganglionic Oligoneuronal Hypoganglionosis)	p. 191
Desmosis of the Colon	p. 193
Pathogenesis of Hirschsprung's Disease and Related Disorders	p. 194
Artifacts and Pitfalls in the Enzyme Histochemical Technique	p. 194
NADPH-Diaphorase Histochemistry	p. 199
Introduction	p. 199
Nitric Oxide and NADPH-Diaphorase	p. 199
Tissue Preparation for NADPH-Diaphorase Histochemistry	p. 200
Whole-Mount Preparation Technique	p. 200
NADPH-Diaphorase Histochemistry	p. 200
Immunohistochemical Studies	p. 207
Introduction	p. 207
General Markers	p. 209
Cholinergic Markers	p. 212
(Nor)Adrenergic markers (Tyrosine Hydroxylase/Dopamine [beta]-Hydroxylase)	p. 213
Non-adrenergic Non-cholinergic Markers	p. 213
Neuropeptides	p. 214
Markers of Neuron-supporting Cells	p. 215
Synaptic Markers	p. 215
Specific Staining of Hypertrophic Nerve Fibers in HD	p. 216
Diagnostic and Clinical Use: Recommendations for Diagnosis	p. 216
Electron Microscopic Studies of Hirschsprung's Disease	p. 221
Introduction	p. 221
Ultrastructural Features of Intestinal Aganglionosis	p. 221
Pathogenetic Implications	p. 226
Intestinal Neuronal Malformations (IND): Clinical Experience and Treatment	p. 229
Introduction	p. 229
Genetic Observations	p. 229
Occurrence	p. 230
Classification	p. 231
Symptoms	p. 232
Incidence	p. 233
Biopsy Technique	p. 234
Diagnostic Criteria	p. 235
Newer Staining Techniques	p. 236
Age	p. 237
Correlation Between Histological Findings and Clinical Symptoms	p. 237
Maturation and Apoptosis	p. 238

Association Between IND and HD	p. 238
Management	p. 244
Conclusion: Is IND a Real Disease?	p. 247
Neurocristopathies and Particular Associations with Hirschsprung's Disease	p. 253
Introduction	p. 253
Neurocristopathies Associated with HSCR	p. 253
Megacystis-Microcolon-Intestinal Hypoperistalsis Syndrome	p. 267
Introduction	p. 267
Pathogenesis	p. 267
Prenatal Diagnosis	p. 268
Clinical Presentation	p. 268
Radiological Findings	p. 268
Surgical or Autopsy Findings	p. 269
Histological Findings	p. 269
Outcome	p. 270
Conclusion	p. 270
Degenerative Hollow Visceral Myopathy Mimicking Hirschsprung's Disease	p. 275
Introduction	p. 275
Classification	p. 276
Etiology	p. 276
Diagnosis	p. 277
Pathology	p. 280
Extraintestinal Lesions	p. 281
Specific Disorders of Smooth Muscle	p. 281
Differential Diagnosis	p. 284
Treatment	p. 284
Prognosis	p. 285
Conclusion	p. 285
Adynamic Bowel Syndrome	p. 287
Introduction	p. 287
Clinical Presentation	p. 288
Disorders Causing Pseudo-Hirschsprung's Disease	p. 288
Enteric Nervous System Disease	p. 288
Disorders Affecting Intestinal and Urinary Smooth Muscle	p. 291
Disorders of the Endocrine Environment	p. 292
Diagnostic Techniques	p. 294
Conclusions	p. 295
Anal Sphincter Achalasia and Ultrashort Hirschsprung's Disease	p. 297
Anal Sphincter Achalasia	p. 297
Ultrashort Hirschsprung's Disease	p. 298
Classification of Anal Sphincter Achalasia	p. 300

Symptoms	p. 307
Anal Sphincter Achalasia in Combination with Hirschsprung's Disease	p. 308
Reinnervation of the Internal Anal Sphincter	p. 312
Diagnosis	p. 312
Therapy of Anal Sphincter Achalasia	p. 314
Results	p. 318
Laparoscopically Assisted Anorectal Pull-Through	p. 323
Introduction	p. 323
Operative Technique	p. 323
Results	p. 326
Discussion	p. 326
Swenson's Procedure	p. 329
Swenson's Procedure	p. 329
Experience with Swenson's Operation	p. 331
Soave's Extramucosal Endorectal Pull-Through Procedure	p. 337
History of the Endorectal Pull-Through Procedure	p. 337
Operative Technique	p. 338
Anatomic Postoperative Condition	p. 342
Modifications of Soave's Technique	p. 344
Treatment of Hirschsprung's Disease	p. 344
Rhbein's Procedure (Deep Anterior Resection)	p. 349
Principles	p. 349
Age at Operation	p. 349
Colostomy: Yes or No?	p. 349
Our Modification of Rehbein's Technique	p. 350
Mobilization of the Colon and Rectum	p. 350
Anastomosis	p. 350
Differences in Caliber of the Rectum and Colon	p. 351
Procedure for Long Aganglionic Segments	p. 351
Own Results with Rehbein's Technique	p. 352
Final Considerations	p. 355
Transanal Pull-Through for Hirschsprung's Disease	p. 359
Introduction	p. 359
Primary Pull-Through	p. 359
Development of the Transanal Pull-Through	p. 360
Surgical Technique	p. 360
Results of the Transanal Pull-Through	p. 361
Ongoing Controversies	p. 362
Conclusions	p. 362
Duhamel's Procedure	p. 365
General Aspects	p. 365

Operative Technique	p. 365
Modifications of the Duhamel Procedure	p. 366
Complications and Results of Duhamel's Procedure	p. 369
Laparoscopic Duhamel's Procedure	p. 370
Duhamel's Technique for Re-Do Pull-Through Procedure	p. 370
Early and Late Complications Following Operative Repair of Hirschsprung's Disease	p. 375
Overview	p. 375
Early Complications	p. 375
Late Complications	p. 377
Conclusion	p. 383
Long-Term Results and Quality of Life After Treatment of Hirschsprung's Disease and Allied Disorders	p. 387
Introduction	p. 387
Continence	p. 387
Stooling Frequency and Constipation	p. 388
Enterocolitis	p. 390
Total Colonic Aganglionosis	p. 391
Stricture Formation After Definitive Pull-Through Procedure	p. 392
Impotence and Urinary Dysfunction	p. 392
Late Mortality	p. 393
Long-term Outcome in Patients With Intestinal Neuronal Dysplasia	p. 393
Overall Quality of Life	p. 393
Conclusions	p. 394
Subject Index	p. 397
