Some Characteristics of Instructional Design for Industrial Training p. 1
Support for Simulation-Based Learning: The Effect of Assignments in Learning about Transmission Lines p. 9
Deconstructionist Student Models in the Computer-Based Learning of Science p. 27
Panel Discussion: The Use of Internet in Education p. 39
Epiphyte Advisor Systems for Collaborative Learning p. 42
Expertext Approach and Learning Environments p. 51
On Content-Balanced Adaptive Testing p. 60
An Object-Oriented Shell for Intelligent Tutoring Lessons p. 69
WORDMATH: A Computer-Based Environment for Learning Word Problem Solving p. 78
Towards Pedagogically Sound Learning Environments: The Specification Process p. 87
A Multi-Agent Architecture for an ITS with Multiple Strategies p. 96
Decentralized Computer Learning Systems Based on Autonomous Agent Approach p. 105
Foundations of an Adaptative Tutoring System Based on Systemic Networks p. 114
The Intelligent Discussion Supporting System under the Distributed Environment p. 123
Applied Artificial Intelligence for Teaching Numeric Topics in Engineering Disciplines p. 132
Motivating the Design for a Computer Assisted Environment for Writers in a Second Language p. 141
An Experimental Environment for the Production of Pedagogical Simulations p. 149
A Component-Based Interactive Practice Environment p. 158
Representations of Instructional Purpose in Courseware Requirements Engineering p. 167
The Formula: A Relation? Yes, but A Concept Too!! p. 176
CREAM-Tools: An Authoring Environment for Curriculum and Course Building in an Intelligent Tutoring System p. 186
Authoring System for Reinforcement and Evaluation (SARE) p. 195
Preliminary Student Evaluation of a CBL Course on Digital Systems Electronics p. 204
Cooperative and Distance Learning in Electronics Using Internet p. 213
Cooperative Distance Learning with an Integrated System for Computer Assisted Laboratory Work p. 220
Implementation and Evaluation of a WWW Multiple Choice Question Server p. 228
Teaching Informatics with ARIANE: An Experimental Internet-Based Pedagogical Environment p. 236
Multimedia Training and Remote Operating Laboratory: Innovative Solutions for Instrumentation and Electronic Measurements Courses p. 245
Hypermedia Exercises Prototyping and Modelising p. 252
Testbed for Measuring Multimedia Presentation Quality Disorders in Courseware p. 261
Hypertexts as Educational Systems: Pedagogical Issues in Teaching and Learning Mathematical Problem Solving p. 270
Structured Hypermedia Authoring: A Simple Tool for the Design and Implementation of Structured Hypermedia Databases p. 279
Designing Educational Multimedia p. 288
Design of a Windows Software for Elastic Field Simulation: Application to Visualisation and Animation of a Rectangular Piece in a Projection with a Load on the End p. 298
A Hypermedia Intelligent Tutor for Mathematical Modelling Teaching p. 306
Design of Software for the Simulated and Tutorized Study of Atomic Models Through the Use of Hypertext p. 313
TEA: An Agrarian Economy Instructor System p. 322
The Analogical Model-Based Physics System: A Workbench to Investigate Issues in How to Support Learning by Analogy in Physics p. 331
Seeing is Believing p. 340
FLIP: Flexible Learning in Physics and Mechanics p. 349
3D-Schema: An Intuitive Model for Analog Circuits Instruction p. 356
Computer Aided Learning in Microelectronics Technology in Slovakia (State of the Art) p. 365
Introduction to Thermodynamics Based on Simulations and Hypertext p. 374
A Computer-Supported Course in Mechanics p. 381
The InforMed Professor: Clinical Instruction of Breast Disease Diagnosis and Management p. 390
Computer Modelling and Simulation of the High Frequency Disturbing Processes for Low Voltage Consumers Applied in Power System Training and Education p. 399
Interactive Practical Teaching of Digital Circuits Design by Means of Field Programmable Gate Arrays p. 408
Interactive Learning Environment in Mechanics p. 415
Flexible Intelligent Environment for Tutoring and Assessing Learners p. 424
DLW - A Learning Environment for Lake Water Diagnosis p. 427
XMOISE: A Logical Spreadsheet to Elicit Didactic Knowledge p. 430
Learning Proton NMR Spectroscopy with Computers p. 433
Tutorized Simulated Study of RC, LR and LRC Circuits for Windows p. 436
Interactive Knowledge Base for Designing New Technology Based Tutoring Systems p. 439
Multimedia System for Instruction and Learning Electronics p. 442
Collaborative Learning Systems on the INTERNET with Case-Based Reasoning p. 445
An Approach to Learning Software Based on Student Modelling p. 448
The Leibinz TLSI: A Secondary Macro Programming Interface and Universal ASCII User Interface Shell for Hypermedia p. 451
A Hypermedia Presentation to Understand Interactions Between Electron and Solid - Scanning Electron Microscope p. 454
