Saturation-based theorem proving: Past successes and future potential p. 1
A resolution theorem prover for intuitionistic logic p. 2
Proof-terms for classical and intuitionistic resolution p. 17
Proof-search in intuitionistic logic with equality, or back to simultaneous rigid E-Unification p. 32
Extensions to a generalization critic for inductive proof p. 47
Learning domain knowledge to improve theorem proving p. 62
Patching faulty conjectures p. 77
Internal analogy in theorem proving p. 92
Termination of theorem proving by reuse p. 106
Termination of algorithms over non-freely generated data types p. 121
ABSFOL: a proof checker with abstraction p. 136
SPASS and FLOTTER version 0.42 p. 141
The design of the CADE-13 ATP system competition p. 146
SCAN - Elimination of predicate quantifiers p. 161
GEOTHER: a geometry theorem prover p. 166
Structuring metatheory on inductive definitions p. 171
An embedding of Ruby in Isabelle p. 186
Mechanical verification of mutually recursive procedures p. 201
FasTraC: a decentralized traffic control system based on logic programming p. 216
Presenting machine-found proofs p. 221
MULTlog 1.0: towards an expert system for many-valued logics p. 226
CtCoq: a system presentation p. 231
An introduction to geometry expert p. 235
SiCoTHEO: simple competitive parallel theorem provers p. 240
What can we hope to achieve from automated deduction? p. 245
Unification algorithms cannot be combined in polynomial time p. 246
Unification and matching modulo nilpotence p. 261
An improved lower bound for the elementary theories of trees p. 275
INKA: the next generation p. 288
XRay: a prolog technology theorem prover for default reasoning: a system description p. 293
IMPS: an updated system description p. 298
System description: generating models by SEM p. 308
Optimizing proof search in model elimination p. 313
An abstract machine for fixed-order dynamically stratified programs p. 328
Unification in pseudo-linear sort theories is decidable p. 343
Theorem proving with group presentations: examples and questions p. 358
Transforming termination by self-labelling p. 373
Theorem proving in cancellative abelian monoids (extended abstract) p. 388
On the practical value of different definitional translations to normal form p. 403
Converting non-classical matrix proofs into sequent-style systems p. 418
Efficient model generation through compilation p. 433
Algebra and automated deduction p. 448
On Shostak's decision procedure for combinations of theories p. 463
Ground resolution with group computations on semantic symmetries p. 478
A new method for knowledge compilation: the achievement by cycle search p. 493
Rewrite semantics for production rule systems: theory and applications p. 508
Experiments in the heuristic use of past proof experience p. 523
Lemma discovery in automating induction p. 538
Advanced indexing operations on substitution trees p. 553
Semantic trees revisited: some new completeness results p. 568
Building decision procedures for modal logics from propositional decision procedures - the case study of modal K p. 583
Resolution-based calculi for modal and temporal logics p. 598
Tableaux and algorithms for propositional dynamic logic with converse p. 613
Reflection of formal tactics in a deductive reflection framework p. 628
Walther recursion p. 643
Proof search with set variable instantiation in the calculus of constructions p. 658
Search strategies for resolution in temporal logics p. 673
Optimal axiomatizations for multiple-valued operators and quantifiers based on semi-lattices p. 688
Grammar specification in categorial logics and theorem proving p. 703
Path indexing for AC-theories p. 718
More Church-Rosser proofs (in Isabelle/HOL) p. 733
Partitioning methods for satisfiability testing on large formulas p. 748
Author Index p. 763
