

| | |
|---|--------|
| Preface | |
| Contributors | |
| Development and Morphology | p. 1 |
| Fertilization and Embryogeny in Maize | p. 3 |
| The Maize Shoot | p. 11 |
| The Maize Leaf | p. 17 |
| The Maize Root | p. 29 |
| Morphology and Development of the Tassel and Ear | p. 37 |
| Gametogenesis in Maize | p. 48 |
| The Patterns of Plant Structures in Maize | p. 61 |
| Genetics and the Morphological Evolution of Maize | p. 66 |
| Overview of Key Steps in Aleurone Development | p. 78 |
| Cell Biology | p. 81 |
| Light Microscopy I: Dissection and Microtechnique | p. 83 |
| Light Microscopy II: Observation, Photomicrography, and Image Analysis | p. 95 |
| Scanning Electron Microscopy | p. 108 |
| Transmission Electron Microscopy: Chemical Fixation, Freezing Methods, and Immunolocalization | p. 118 |
| Techniques for Histology of Maize Megaspores and Embryo Sacs | p. 135 |
| Indirect Immunofluorescence: Localization of the Cytoskeleton | p. 140 |
| Immunocytochemistry for Light and Electron Microscopy | p. 149 |
| Immunolocalization of Nuclear Proteins | p. 158 |
| In situ Hybridization | p. 165 |
| Photography of Maize | p. 180 |
| Genetics Protocols | p. 187 |
| Genetic Experiments and Mapping | p. 189 |
| Growing Maize for Genetic Studies | p. 197 |
| A Nine-Step Way to Characterize a Morphological Mutant | p. 209 |
| Mutagenesis | p. 212 |
| Gene Tagging with Ac/Ds Elements in Maize | p. 219 |
| Using Cytogenetics to Enhance Transposon Tagging with Ac Throughout the Maize Genome | p. 234 |
| Transposon Tagging with Spm | p. 240 |
| Transposon Tagging with Mutator | p. 243 |
| Mapping Genes with Recombinant Inbreds | p. 249 |
| The Placement of Genes Using waxy-Marked Reciprocal Translocations | p. 255 |
| Chimeras for Genetic Analysis | p. 258 |
| The Use of Clonal Sectors for Lineage and Mutant Analysis | p. 262 |
| Use of Segmental Aneuploids for Mutant Analysis | p. 270 |
| Biased Transmission of Genes and Chromosomes | p. 274 |
| Anthocyanin Genetics | p. 279 |

| | |
|--|--------|
| Cloned Anthocyanin Genes and Their Regulation | p. 282 |
| Maize and Puccinia sorghi: A System for the Study of the Genetic and Molecular Basis of Host-Pathogen Interactions | p. 286 |
| Disease Lesion Mutants | p. 291 |
| Classification of Pollen Abortion in the Field | p. 297 |
| Genetic Fine Structure as Revealed in Pollen Assays | p. 298 |
| Genetic Fine Structure from Testcross Progeny Analysis | p. 303 |
| Trisomic Manipulation | p. 307 |
| B-A Translocation Manipulation | p. 308 |
| Locating Recessive Genes to Chromosome Arm with B-A Translocations | p. 315 |
| Dosage Analysis Using B-A Translocations | p. 328 |
| Marker Systems for B-A Translocations | p. 330 |
| Construction of Compound B-A Translocations | p. 332 |
| A-B-A Compound Chromosomes | p. 334 |
| Comprehensive List of B-A Translocations in Maize | p. 336 |
| Chromosomal Translocations Involving the Nucleolus Organizer Region or Satellite of Chromosome 6 | p. 342 |
| Inversions and List of Inversions Available | p. 346 |
| Use of Maize Monosomics for Gene Localization and Dosage Studies | p. 350 |
| Marker Systems for r-x1 | p. 359 |
| Translocations as Genetic Markers | p. 361 |
| A-A Translocations: Breakpoints and Stocks | p. 364 |
| Segmental Aneuploid Analysis | p. 377 |
| Directed Synthesis of Segmental Transpositions | p. 383 |
| Practical Aspects of Haploid Production | p. 386 |
| Indeterminate Gametophyte (ig): Biology and Use | p. 388 |
| Production of a Ploidy Series | p. 394 |
| Absorption Cytophotometry of Nuclear DNA | p. 396 |
| Flow Cytometry for Endosperm Nuclear DNA | p. 400 |
| Allelism Testing of Lethal Mutations | p. 407 |
| Analysis of Cytoplasmically Inherited Mutants | p. 413 |
| Male Sterility and Restorer Genes in Maize | p. 418 |
| Inbred Lines of Maize and Their Molecular Markers | p. 423 |
| Traditional Analysis of Maize Pachytene Chromosomes | p. 432 |
| Techniques for Preparing Whole-Mount Spreads of Maize Pachytene Chromosome Complements for Electron-Microscopic Visualization of Synaptonemal Complex Structures | p. 442 |
| A Smear Technique for the Study of Meiosis in Pollen Mother Cells of Maize | p. 447 |
| Protocol for Preparing Maize Macrospore Mother Cells for the Study of Female Meiosis and Embryo-sac Development | p. 450 |
| Preparing a Suspension of Microsporocytes for Spreading and Electron Microscopy | p. 454 |

| | |
|--|--------|
| Three-dimensional Fluorescence Microscopy of Maize Chromosomes | p. 457 |
| Chromosomal Behavior During Microsporogenesis | p. 460 |
| A Staining Procedure for Pollen Grain Chromosomes of Maize | p. 476 |
| A Technique for the Preparation of Somatic Chromosomes of Maize | p. 481 |
| A Technique for Somatic Chromosome Preparation and C-banding of Maize | p. 484 |
| Duplications | p. 493 |
| Deficiency Analysis | p. 494 |
| The Gametophyte Factors of Maize | p. 496 |
| Ring Chromosomes | p. 503 |
| In situ Hybridization of DNA and RNA Probes to Maize Chromosomes | p. 504 |
| Analysis of Traits with Complex Inheritance in Maize Using Molecular Markers | p. 509 |
| Heterofertilization | p. 514 |
| Molecular Biology Protocols | p. 517 |
| Isolation of Small Nuclear RNAs | p. 519 |
| Plant DNA Miniprep and Microprep: Versions 2.1-2.3 | p. 522 |
| Urea-based Plant DNA Miniprep | p. 526 |
| High-Molecular-Weight Plant DNA Preparation for CHEF Gel Analysis | p. 528 |
| Preparation of High-Molecular-Weight Maize DNA and Analysis by Pulsed-Field Gel Electrophoresis | p. 530 |
| Isolation of Genomic DNA from Calli | p. 534 |
| Isolation of DNA from Immature Cobs | p. 536 |
| Preparation of Nucleic Acids from Maize Microspores and Pollen | p. 538 |
| Preparation of DNA and RNA from Leaves: Expanded Blades and Separated Bundle Sheath and Mesophyll Cells | p. 541 |
| Isolation of RNA from Wx and wx Endosperms | p. 545 |
| RNA Isolation from Electroporated Protoplasts | p. 547 |
| Procedures for Isolating Mitochondria and Mitochondrial DNA and RNA | p. 549 |
| Isolation of Maize Chloroplasts and Chloroplast DNA | p. 556 |
| In vitro Capping of Maize Mitochondrial RNA and Transcription Initiation Site Characterization by RNase Protection | p. 559 |
| Editors' Note | p. 565 |
| Southern Blots of Maize Genomic DNA | p. 566 |
| Southern Blot Hybridization | p. 569 |
| Northern Blotting | p. 572 |
| RNase Protection Assay | p. 575 |
| Genomic Sequencing in Maize | p. 579 |
| The Polymerase Chain Reaction: Applications to Maize Transposable Elements | p. 586 |
| In vitro Synthesis of Capped and Polyadenylated mRNA for Translation Studies in vitro and in vivo | p. 592 |
| Construction of a Genomic Library in Lambda Phage | p. 595 |

| | |
|---|--------|
| Agroinfection | p. 599 |
| Polyethylene Glycol-mediated DNA Uptake into Maize Protoplasts | p. 603 |
| DNA Delivery into Maize Cell Cultures Using Silicon Carbide Fibers | p. 610 |
| Transient Gene Expression Assay by Electroporation of Maize Protoplasts | p. 613 |
| Assay of Bacterial Chloramphenicol Acetyl Transferase in Transformed Maize Tissues | p. 616 |
| Assay of Firefly Luciferase in Transformed Maize Tissues | p. 619 |
| Storage of Frozen Maize Tissue | p. 622 |
| Maize Methods - Starch Biosynthetic Genes | p. 624 |
| Identifying and Characterizing the TATA Box Promoter Sequence Element in a Maize Nuclear Gene | p. 630 |
| Promoters | p. 633 |
| Introns | p. 636 |
| Characterization of Zein Genes and Their Regulation in Maize Endosperms | p. 639 |
| Overview of Cloning Genes Using Transposon Tagging | p. 647 |
| How RFLP Loci Can Be Used to Assist Transposon-Tagging Efforts | p. 653 |
| Cell Culture Protocols | p. 661 |
| Regeneration of Plants from Somatic Cell Cultures: Applications for in vitro Genetic Manipulation | p. 663 |
| Initiation, Maintenance, and Plant Regeneration of Type II Callus and Suspension Cells | p. 671 |
| Production of Transgenic Maize Plants via Microprojectile-Mediated Gene Transfer | p. 677 |
| In vitro Selection | p. 685 |
| Selection of Stable Transformants from Black Mexican Sweet Maize Suspension Cultures | p. 690 |
| Maize Protoplast Culture | p. 695 |
| Anther and Microspore Culture | p. 701 |
| In vitro Culture of Maize Kernels | p. 705 |
| In vitro Ear Culture System | p. 709 |
| Maize Inflorescence Culture | p. 712 |
| Shoot Meristem Culture | p. 715 |
| Establishment and Culture of Maize Endosperm | p. 719 |
| In vitro Pollen Germination | p. 723 |
| Axillary Bud in vitro Culture: Asexual Propagation of Maize | p. 725 |
| Index | p. 727 |
