Invited Papers and Abstract

Invariants and Well-Foundedness in Program Algebra p. 1
A Theory of Software Product Line Refinement p. 15
The TLA* Proof System: Building a Heterogeneous Verification Platform p. 44

Grammars

Subtyping Algorithm of Regular Tree Grammars with Disjoint Production Rules p. 45
Minimal Tree Language Extensions: A Keystone of XML Type Compatibility and Evolution p. 60
Tracking Down the Origins of Ambiguity in Context-Free Grammars p. 76

Semantics

Prioritized slotted-Circus p. 91
A Denotational Semantical Model for Orc Language p. 106
An Extended cCSP with Stable Failures Semantics p. 121
Preference and Non-deterministic Choice p. 137

Modelling

Material Flow Abstraction of Manufacturing Systems p. 153
Specification and Verification of a MPI Implementation for a MP-SoC p. 168
Scalable Distributed Concolic Testing: A Case Study on a Flash Storage Platform p. 199
Analyzing a Formal Specification of Mondex Using Model Checking p. 214
Formal Modelling of Separation Kernel Components p. 230
Mechanized Verification with Sharing p. 245
Industrial-Strength Certified SAT Solving through Verified SAT Proof Checking p. 260
Dynamite 2.0: New Features Based on UnSAT-Core Extraction to Improve Verification of Software Requirements p. 275

Logics

Complete Calculi for Structured Specifications in Fork Algebra p. 290
Towards Managing Dynamic Reconfiguration of Software Systems in a Categorical Setting p. 306
Characterizing Locality (Encapsulation) with Bisimulation p. 322
Justification Logic and History Based Computation p. 337

Algorithms and Types

A Class of Greedy Algorithms and Its Relation to Greedoids p. 352
On Arithmetic Computations with Hereditarily Finite Sets, Functions and Types p. 367
A Modality for Safe Resource Sharing and Code Reentrancy p. 382

Author Index

p. 397
