

List of Speakers and Discussants

Preface

The Endothelial Selectins: How Are They Regulated and What Are Their Ligands	p. 1
Intravascular and Interstitial Cell Adhesion Molecules in Human Liver and Lung Transplants	p. 7
Adhesion Molecules Directed Therapies: Potential Applications in Organ Transplantation	p. 17
Impaired Vascular Conductance after Global Hepatic Ischemia. Significance of the Oxygen Paradox and the Vascular Endothelium	p. 33
Microcirculatory Events after Reperfusion in Liver Transplantation	p. 43
Nitric Oxide Controls Microcirculatory Blood Flow by Multiple Mechanisms. Studies in the Hamster Cremaster in vivo	p. 51
Chronic Allograft Arteriosclerosis	p. 65
Gene Expression in Graft Vascular Disease	p. 74
Microvascular Events during the Development of Atherosclerosis: Mediator Cross-Talk in Oxidized LDL-Induced Leukocyte/Endothelium Interaction	p. 79
Vascular Mechanisms in the Development of Chronic Rejection	p. 92
Microvascular Rejection of Pancreatic Islet Grafts: Significance of Leukocyte Adherence	p. 100
Ablation of Free Radical-Mediated Reperfusion Injury of Allografts by rh-SOD Reduces Incidences of Acute and Chronic Rejection Events	p. 109
Subject Index	p. 123
