

Preface	p. vii
Electronic Structure of Metal-Molecule Interfaces	p. 1
Introduction	p. 1
Image Charge Interaction at Metal Surfaces	p. 4
Hybrid NFE Band Formation at Metal-Organic Interface	p. 8
$C_6F_6$ Quantum Well State	p. 8
PTCDA Metal-Organic Interface State	p. 12
Metal-Like Hybridization of Superatom States	p. 14
Superatom States of $C_{60}$	p. 16
NFE Band Formation by Superatom States of $C_{60}$	p. 17
Conclusions	p. 20
References	p. 21
Inelastic Tunneling Current-Driven Motions of Single Adsorbates	p. 26
Introduction	p. 26
Theory of STM-IETS	p. 35
Adsorbate-Induced Resonance Model of IETS	p. 35
NEGF Theory of IETS and Vibrational Heating	p. 41
Competition Between Elastic and Inelastic Current	p. 45
Adsorbate Motions Induced by Vibrational Excitation with STM	p. 50
Vibrational Ladder Climbing-Vibrational Heating	p. 50
Physical Meaning of $\dot{\zeta}_{jet}$	p. 52
Numerical Examples of Inelastic Tunneling Current	p. 55
Coherent Ladder Climbing	p. 59
Coherent versus Incoherent Process	p. 61
Single-Electron Process via Anharmonic Mode Coupling	p. 63
Two-Electron Processes via Mode Coupling	p. 74
Action Spectroscopy	p. 78
Perspective Remarks	p. 83
References	p. 84
DFT-NEGF Approach to Current-Induced Forces, Vibrational Signals, and Heating in Nanoconductors	p. 90
Introduction	p. 90
DFT-NEGF	p. 92
Elastic Transport Channels: Eigenchannels	p. 96
Inelastic Transport with DFT-NEGF	p. 99
Electron-Phonon Interactions: The Self-Consistent Born Approximation	p. 101
Electron-Phonon Interactions: The Lowest-Order Expansion	p. 103
Example: Atomic Gold Wire	p. 105
Example: Hydrocarbon Molecules Between Gold Contacts	p. 107
IETS Propensity Rules	p. 108
Heating of Vibrations by Current	p. 111

Conclusions and Outlook	p. 117
References	p. 117
Current-Induced Local Heating in Molecular Junctions	p. 123
Current-Induced Instability	p. 123
Local Heating in Single-Molecule Junctions	p. 124
Theory of Current-Induced Local Heating	p. 125
Comparison of Molecular Junctions with Metallic Point Contacts	p. 127
Evaluation of Local Temperature in Molecular Junctions	p. 128
Thermodynamic Theory of Chemical Bond Breakdown	p. 129
Repeated Creation of Single-Molecule Junctions	p. 130
Local Temperature in Single-Alkanedithiol Junctions	p. 131
Thermodynamic Dissociation	p. 132
Bias Dependence of Single-Alkanedithiol Conductance	p. 133
Bias and Molecular Length Dependence of Local Temperature	p. 134
Conclusion and Perspective	p. 135
References	p. 136
Current-Induced Heating and Heat Dissipation Mechanisms in Single C <sub>60</sub> Molecular Junctions	p. 139
Experimental Methods	p. 141
Experimental Procedure	p. 144
Results	p. 145
Heat Dissipation from the Molecular Junction	p. 148
Mechanism of Heat Dissipation	p. 149
Heat Generation at the Molecular Junction	p. 152
Summary	p. 154
References	p. 154
Electronic Control of Single-Molecule Nanomachines	p. 156
Introduction and Historical Background	p. 156
Electronic Excitation	p. 157
Electron Attachment	p. 157
Electronic Transition	p. 166
Electron-Hole Pair Attachment	p. 166
Manipulating Molecules	p. 168
Manipulation of a Bistable and Quadristable Molecule: Biphenyl on Si(100)	p. 172
Other Avenues	p. 176
Molecules on Passivated or Insulating Surfaces	p. 179
Molecules on Wide-Band-Gap Semiconductors	p. 183
Laser-STM	p. 185
Conclusions	p. 188
References	p. 189

Current-Driven Desorption at the Organic Molecule-Semiconductor Interface: Cyclopentene on Si(100)	p. 196
Introduction and Background	p. 196
Methods	p. 198
Experimental Procedures	p. 198
Numerical Procedures	p. 198
System	p. 201
Experimental Results	p. 202
Numerical Results	p. 206
Physical and Electronic Structure	p. 207
Electronic Transport Calculations	p. 210
Reaction Dynamics Studies	p. 212
Relevance to Other Systems	p. 214
Conclusion	p. 215
References	p. 217
Index	p. 220
