Contents

Preface	ix
Part I. Theory, history and methods	1
Drugs, driving and the measurement of human performance <i>A. F. Sanders</i>	3
Drugs and driving: historical perspectives, methodological principles and current problems <i>A. A. Landauer</i>	17
Mechanisms of drug-induced impairment of driving <i>M. Linnoila, S. Guthrie and R. Lister</i>	29
Assessment of drug effects on driving performance using on-the-road studies <i>A. Smiley</i>	51
Part II. Multiple studies with general implications	69
The effects of psychoactive drugs on car handling and related psychomotor ability: a review <i>I. Hindmarch</i>	71
A review of research: the effects of psychotropic drugs on actual driving performance <i>T. Betts, D. Mortiboy, J. Nimmo and R. Knight</i>	83
Part III. Hypnotics and anxiolytics	101
Hypnotics and transient insomnia <i>A. N. Nicholson</i>	103
Carry-over effects on driving performance of benzodiazepines with short elimination half-lives in comparison with nitrazepam and placebo <i>H. Laurell and J. Tornros</i>	111

Hypnotics' residual effects on driving performance <i>E.R. Volkerts and J.F. O'Hanlon</i>	123
The effects of lorazepam and bromazepam on actual driving and psychomotor performance of patients <i>J. J. de Gier, B. J. 't Hart and F. A. Nelemans</i>	137
Development of tolerance for lorazepam effects on driving skills <i>K. Aranko and M. J. Mattila</i>	153
Effects of alcohol and diazepam, singly and in combination, on some aspects of driving performance <i>R. G. Mortimer and P. A. Howat</i>	163
Combined effects of anxiolytics and alcohol on psychomotor performance in young and middle-aged subjects <i>T. Seppälä, M. J. Mattila, E. S. Palva and K. Aranko</i>	179
Buspirone, diazepam and lorazepam: effects on driving-related skills <i>H. Moskowitz</i>	191
Part IV. Antidepressants and neuroleptics	201
Several antidepressants' acute effects upon actual driving performance and subjective mental activation <i>J. W. Louwerens, K. A. Brookhuis and J. F. O'Hanlon</i>	203
EEG energy-density spectra and driving performance under the influence of some antidepressant drugs <i>K. A. Brookhuis, J. W. Louwerens and J. F. O'Hanlon</i>	213
Is the depressive patient under adequate pharmacological treatment fit for driving? <i>U. Gerhard and V. Hobi</i>	221
The effects of antidepressants taken with and without alcohol on information processing, psychomotor performance and car handling ability <i>I. Hindmarch and Z. Subhan</i>	231
Effects of neuroleptics on aspects relevant to driving fitness <i>U. Grübel-Mathyl</i>	241
Part V. Analgesics, anticholinergics and antihistamines	249
A review of the effects of analgesics on driving performance <i>G. A. Starmer</i>	251
The effects of astemizole on actual car driving and psychomotor performance <i>J. J. de Gier, L. Kuijpers and F. A. Nelemans</i>	271

Antihistamines and sedation <i>A. N. Nicholson and B. M. Stone</i>	283
Effects of atropine on drivers' perceptual-motor and decision-making behavior <i>A. Wetherell</i>	291
A study of three nootropes in a night driving test: an extended summary <i>E.-J. Caille and J. L. Bassano</i>	303
Part VI. Implications of performance testing for drug registration	309
Performance testing as part of drug registration <i>J. F. O'Hanlon, K. A. Brookhuis, J. W. Louwerens and E. R. Volkerts</i>	311
Performance studies and the manufacturer of CNS-active drugs <i>J. Haller, J. Ward and R. Amrein</i>	331
Drugs-driving information requirements for licensing and regulation <i>A. Irving</i>	338
Government information requirements for regulating drug use by drivers <i>F. A. Nelemans and J. J. de Gier</i>	349
References	355
Index	389
