# CONTENTS

*Preface*      *iii*

## 1. QUANTITATIVE STRUCTURE-ACTIVITY RELATIONSHIPS (QSAR)      1

- 1.1. Introduction      1
- 1.2. Regression and Related Methods      11
- 1.3. Classification      42
- 1.4. Miscellaneous      61

References      89

## 2. SCREENING PROCEDURES FOR DISCOVERING ACTIVE COMPOUNDS      105

- 2.1. Introduction      105
- 2.2. Formulation of the Problem      112
- 2.3. The OC Curve and the Average Sample Number      114
- 2.4. Procedures for Limiting Misclassification Errors      118
- 2.5. Procedures for Maximizing Benefits Subject to a  
Constraint      121
- 2.6. Procedures for Maximizing Net Financial  
Benefits      127

References      136

## 3. ALLOCATION OF RESOURCES BETWEEN RELATED SCREENS      141

- 3.1. Introduction      141
- 3.2. Resource Allocation Between Ordered  
Screens      141
- 3.3. Optimal Sequencing of Screens      163

References      166

4.	R&D PROJECT SELECTION METHODS	167
4.1.	Introduction	167
4.2.	Checklists and Profile Charts	179
4.3.	Scoring Indices	186
4.4.	Profitability Indices	191
4.5.	Integer and Linear Programming	200
4.6.	Stochastic Programming	209
4.7.	Other Integer and Linear Programming Techniques for Handling Uncertainty	216
4.8.	Dynamic Programming and Nonlinear Models	220
4.9.	RESPRO: An Interactive Model	229
4.10.	Multiobjective Models	235
References		238
SUMMARY: STATE OF THE ART		247
Index		251
