TOBACCO SMOKING AND NUTRITION
INFLUENCE OF NUTRITION
ON TOBACCO-ASSOCIATED HEALTH RISKS^a

Editors

JOHN N. DIANA AND WILLIAM A. PRYOR

Conference Organizers

J. DIANA, E. FISHER, B. HENNIG, D. HOFFMANN, W. PRYOR, AND C. SMITH

CONTENTS

Preface. <i>By</i> THE EDITORS	ix
Overview	
Tobacco Smoking and Nutrition. <i>By</i> JOHN N. DIANA	1
Part I. Tobacco Smoking and Free Radical Biology	
Oxidants in Cigarette Smoke: Radicals, Hydrogen Peroxide, Peroxynitrate, and Peroxynitrite. <i>By</i> WILLIAM A. PRYOR and KONI STONE	12
Membrane Damage from Lipid Oxidation Induced by Free Radicals and Cigarette Smoke. <i>By</i> ETSUO NIKI, SUSUMU MINAMISAWA, MIYUKI OIKAWA, and ERIKA KOMURO	29
Superoxide Generated by Cigarette Smoke Damages the Respiratory Burst and Induces Physical Changes in the Membrane Order and Water Organization of Inflammatory Cells. <i>By</i> MASAHIKO TSUCHIYA, YUICHIRO J. SUZUKI, CARROLL E. CROSS, and LESTER PACKER	39
Cigarette Smoke-Mediated Oxidant Stress, Phagocytes, Vitamin C, Vitamin E, and Tissue Injury. <i>By</i> L. VAN ANTWERPEN, A. J. THERON, M. S. MYER, G. A. RICHARDS, L. WOLMARANS, U. BOOYSEN, C. A. VAN DER MERWE, G. K. SLUIS-CREMER, and R. ANDERSON	53

^a The papers in this volume were presented at a conference entitled **Tobacco Smoking and Nutrition: Influence of Nutrition on Tobacco-Associated Health Risks** held by the University of Kentucky Tobacco and Health Research Institute in Lexington, Kentucky on September 14–16, 1992.

Part II. Tobacco Smoking, Nutrition, and Cardiovascular Disease

Why Is Smoking a Major Risk Factor for Coronary Heart Disease in Hyperlipidemic Subjects? <i>By</i> Y. STEIN, D. HARATS, and O. STEIN . . .	66
Cigarette Smoke Oxidation of Human Plasma Constituents. <i>By</i> CARROLL E. CROSS, CHARLES A. O'NEILL, ABRAHAM Z. REZNICK, MIAO-LIN HU, LUCIA MARCOCCI, LESTER PACKER, and BALZ FREI	72
Cigarette Smoke, LDL and Cholesteryl Ester Accumulation in Macrophages: Implications for Atherosclerosis. <i>By</i> TORU KITA, MASAYUKI YOKODE, HIDENORI ARAI, MOTOI IYAMA, YUKIHIKO UEDA, KAZUHISA UEYAMA, and SHU NARUMIYA	91
Function of Vitamin E and Zinc in Maintaining Endothelial Integrity: Implications in Atherosclerosis. <i>By</i> BERNHARD HENNIG, CRAIG J. McCLAIN, and JOHN N. DIANA	99
Adhesion-Promoting Effects of Cigarette Smoke on Leukocytes and Endothelial Cells. <i>By</i> HANS-ANTON LEHR	112
Cigarette Smoking, Antioxidants, Lipid Peroxidation, and Coronary Heart Disease. <i>By</i> GARRY G. DUTHIE, JOHN R. ARTHUR, JAMES A. G. BEATTIE, KATRINA M. BROWN, PHILIP C. MORRICE, JOHN D. ROBERTSON, COLETTE T. SHORTT, KIM A. WALKER, and W. PHILIP T. JAMES	120
Cigarette Smoking, Polyunsaturated Fats, and Coronary Heart Disease. <i>By</i> RACHEL L. THOMPSON, STEPHEN PYKE, ELIZABETH A. SCOTT, SIMON G. THOMPSON, and DAVID A. WOOD	130

Part III. Tobacco Smoking, Carcinogenesis, and Chemoprevention

Potential Inhibitors of Tobacco Carcinogenesis. <i>By</i> DIETRICH HOFFMANN, ABRAHAM RIVENSON, FUNG-LUNG CHUNG, and ERNST L. WYNDER	140
Inhibition of Chemically Induced Neoplastic Transformation by Carotenoids: Mechanistic Studies. <i>By</i> JOHN S. BERTRAM	161
Pulmonary Carcinogenesis and its Prevention by Dietary Polyphenolic Compounds. <i>By</i> ANDRE CASTONGUAY	177
Inhibition of the Tobacco-Specific Nitrosamine-Induced Lung Tumorigenesis by Compounds Derived from Cruciferous Vegetables and Green Tea. <i>By</i> F.-L. CHUNG, M. A. MORSE, K. I. EKLIND and Y. XU	186
Carcinogen-Induced Tissue Vitamin A Depletion: Potential Protective Advantages of β -Carotene. <i>By</i> THOMAS E. EDES and DANIEL S. GYSBERS	203
Intragastric Nitrosation of Nicotine Is Not a Significant Contributor to Nitrosamine Exposure. <i>By</i> WILLIAM S. CALDWELL, JACKIE M. GREENE, GRAYLAND P. DOBSON, and J. DONALD DEBETHIZY	213

Part IV. Tobacco Smoking, Nutrition, and Lung Disease

Micronutrients and Their Influence on Mutagenicity and Malignant Transformation. <i>By</i> NORMAN I. KRINSKY	229
Exposure to Cigarette Smoke and Expression of the Protein Encoded by the p53 Gene in Bronchial Carcinoma. <i>By</i> J. R. GOSNEY, S. A. BUTT, M. A. GOSNEY, and J. K. FIELD	243
Cigarette Smoke-Induced DNA Damage in Cultured Human Lung Cells. <i>By</i> PER LEANDERSON	249
Molecular and Biochemical Reprogramming of Oncogenesis through the Activity of Prooxidants and Antioxidants. <i>By</i> JOEL L. SCHWARTZ, DEMETRIOS Z. ANTONIADES, and SHANCHUAN ZHAO	262
Vitamin E and Smoking and the Risk of Lung Cancer. <i>By</i> PAUL KNEKT	280
Cigarette Smoking and Oxidative Damage in the Lung. <i>By</i> CHING K. CHOW	289

Part V. Diet and Tobacco Smoking

The French Paradox: Dietary Factors and Cigarette Smoking-Related Health Risks. <i>By</i> S. RENAUD and M. DE LORGERIL	299
Nutrient and Food Group Intake by Tobacco Use Status: The 1987 National Health Interview Survey. <i>By</i> AMY F. SUBAR and LINDA C. HARLAN	310
Smoking, Alcohol, and Plasma Levels of Carotenes and Vitamin E. <i>By</i> ERIC RIMM and GRAHAM COLDITZ	323
Estimating Ascorbic Acid Requirements for Cigarette Smokers. <i>By</i> GORDON SCHECTMAN	335
Antioxidant Vitamin Intakes in Scottish Smokers and Nonsmokers: Dose Effects and Biochemical Correlates. <i>By</i> CAROLINE BOLTON-SMITH	347
Subject Index	361
Index of Contributors	365
