TABLE OF CONTENTS

Preface ix

Chapter 1. Introduction	1
1.1 Controlled Release Drug Delivery Systems	1
1.2 Hydrogels	2
1.3 References	6
Chapter 2. Biodegradation	13
2.1 Definitions of Biodegradation	13
2.2 Mechanisms of Biodegradation	15
2.3 Chemical Hydrolysis of Polymers	21
2.4 Biodegradable Hydrogels	27
2.5 References	28
Chapter 3. Types of Biodegradable Hydrogels	35
3.1 Hydrogels with Degradable Polymer Backbone	35
3.2 Hydrogels with Degradable Crosslinking Agents	47
3.3 Hydrogels with Degradable Pendant Chains	60
3.4 References	61
Chapter 4. Chemical Gels	67
4.1 Polymerization in the Presence of Crosslinking Agents	67
4.2 Crosslinking of Water-Soluble Polymers	72
4.3 References	92
Chapter 5. Physical Gels	99
5.1 Thermoreversible Gelling System	101
5.2 Thermoreversible Gelling Polysaccharides	105
5.3 Physical Gelation by Ion Complexation	110
5.4 Physical Gelation by Specific Interactions	122
5.5 Determination of the Crosslink Density	128
5.6 References	130

Chapter 6. Chemically-Induced Degradation	141
6.1 Chemically-Induced Hydrolysis in the Body	141
6.2 Chemically-Induced Hydrolysis of Polyesters	143
6.3 Polyester Hydrogels	148
6.4 References	148
Chapter 7. Enzyme-Catalyzed Degradation	153
7.1 Properties of Enzymes	153
7.2 Hydrolytic Enzymes in the Body	161
7.3 Factors Influencing Enzyme-Catalyzed Reactions	166
7.4 Enzyme-Catalyzed Degradation of Modified Proteins	167
7.5 Enzyme-Catalyzed Degradation of Modified Polysaccharides	174
7.6 References	178
Chapter 8. Biodegradable Drug Delivery Systems	189
8.1 Mechanisms of Drug Release	190
8.2 Drug Release from Hydrogels with Biodegradable Backbones	199
8.3 Drug Release from Hydrogels with Degradable Crosslinking Agents	215
8.4 Drug Release from Hydrogels with Biodegradable Pendant Chains	219
8.5 References	223
Chapter 9. Future Development	233
9.1 Drug Loading	233
9.2 Drug Targeting	234
9.3 Drug Release	235
9.4 Degradation and Elimination	236
9.5 The Use of Bioactive Polymers	237
9.6 References	238
<i>Index</i>	241
