

Frank Scherbaum

# Basic Concepts in Digital Signal Processing for Seismologists

**Springer-Verlag**

Berlin Heidelberg New York

London Paris Tokyo

Hong Kong Barcelona

Budapest

# Contents

<b>1</b>	<b>Introduction .....</b>	<b>1</b>
<b>2</b>	<b>RC Filter .....</b>	<b>13</b>
2.1	The system diagram .....	13
2.2	The differential equation .....	14
2.3	The frequency response function .....	15
2.4	The transfer function .....	18
2.5	The impulse response .....	19
2.5.1	The condition for stability .....	22
2.6	The frequency response function and the pole position .....	22
2.7	The difference equation .....	26
2.8	Review .....	28
<b>3</b>	<b>General linear time invariant systems .....</b>	<b>29</b>
3.1	Generalization of concepts .....	29
3.2	Graphical estimation of the frequency response function .....	32
3.3	The phase properties of general LTI system .....	34
3.4	The interpretation of the frequency response function .....	35
<b>4</b>	<b>The seismometer .....</b>	<b>39</b>
4.1	The solution for simple initial conditions (release test) .....	42
4.1.1	Underdamped case .....	45
4.1.2	Overdamped case .....	46
4.1.3	Critically damped case .....	47
4.1.4	Comparison .....	47
4.2	The determination of the damping constant .....	48
4.2.1	The determination of the damping constant for an electromagnetic sensor .....	49
4.3	The frequency response function .....	52
4.3.1	The transfer function .....	54
<b>5</b>	<b>The sampling process .....</b>	<b>57</b>
5.1	The sampling of analog data .....	57

<b>6</b>	<b>Analog to digital conversion .....</b>	<b>61</b>
6.1	The principle of analog to digital conversion .....	61
6.2	Increasing dynamic range and resolution .....	67
6.2.1	Gain ranging .....	67
6.2.2	Oversampling .....	69
<b>7</b>	<b>From infinitely continuous to finite discrete .....</b>	<b>75</b>
7.1	Fourier transform of continuous-time signals .....	75
7.2	Fourier transform of discrete-time signals .....	78
7.3	The z-transform .....	80
7.4	The inverse z-transform .....	84
7.5	The Discrete Fourier Transform (DFT) .....	85
<b>8</b>	<b>The Digital Anti-Alias Filter .....</b>	<b>89</b>
8.1	Removing the acausal response of a FIR filter .....	94
8.1.1	The difference equation .....	95
8.1.2	Implementation in C .....	96
<b>9</b>	<b>Deconvolution, a glimpse ahead .....</b>	<b>103</b>
	<b>References .....</b>	<b>109</b>
	<b>Appendix A: Solution to Problems .....</b>	<b>111</b>
	<b>Appendix B: Listing of Source Codes.....</b>	<b>137</b>
	<b>Index .....</b>	<b>155</b>
