# Fortschritt-Berichte VDI

**Reihe 8**

Meß-, Steuerungs-  
und Regelungstechnik

Dipl.-Phys. Matthias O. Franz,  
Tübingen

**Nr. 739**

**Minimalistic Visual  
Navigation**

**Minimalistische visuelle  
Navigation**

# Contents

<b>List of Symbols</b>	<b>IX</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 Navigation</b>	<b>5</b>
2.1 The Navigation Hierarchy . . . . .	6
2.1.1 Search . . . . .	6
2.1.2 Following a direction . . . . .	7
2.1.3 Aiming . . . . .	8
2.1.4 Guidance . . . . .	8
2.1.5 Recognition-triggered response . . . . .	8
2.1.6 Topological navigation . . . . .	9
2.1.7 Survey navigation . . . . .	10
2.2 Minimalistic Visual Navigation . . . . .	11
<b>3 The Robot Systems</b>	<b>13</b>
3.1 Experimental Platforms . . . . .	13
3.1.1 First generation: Custom-built prototype for office environments	13
3.1.2 Second generation: Modified Khepera miniature robot . . . . .	14
3.1.3 Third generation: Pioneer base with standard PC . . . . .	16
3.2 Image Processing . . . . .	17
3.3 Control Architecture . . . . .	20
<b>4 Scene-Based Homing</b>	<b>24</b>
4.1 Inferring the Goal Direction from the Surrounding Scene . . . . .	26

4.1.1	Mathematical description of the task . . . . .	26
4.1.2	Computation of correspondences . . . . .	27
4.1.3	Assumptions about distance distributions . . . . .	28
4.2	Homing with the Average Displacement Vector . . . . .	29
4.2.1	Displacement vector sum in isotropic environments . . . . .	29
4.2.2	Error and convergence . . . . .	31
4.3	Homing with Parameterized Displacement Fields . . . . .	32
4.3.1	A matched filter based on the equal distance assumption . . . . .	32
4.3.2	Error due to the equal distance assumption . . . . .	33
4.3.3	Limitation of spatial resolution by sensor noise . . . . .	34
4.4	Experiments . . . . .	36
4.4.1	Comparison to honeybee experiments . . . . .	36
4.4.2	Performance of the homing scheme . . . . .	37
4.4.3	Improvements by independent parameter estimation . . . . .	39
4.4.4	Accuracy . . . . .	41
4.5	Discussion . . . . .	43
4.5.1	Scene-based homing in animals . . . . .	43
4.5.2	Computational models . . . . .	45
4.5.3	Conclusion . . . . .	48
<b>5</b>	<b>View Graphs</b> . . . . .	<b>49</b>
5.1	Behavioural Evidence . . . . .	50
5.2	Learning View Graphs . . . . .	52
5.2.1	Discrete representation of continuous space . . . . .	52
5.2.2	A minimalistic system for learning a view graph . . . . .	53
5.2.3	View classifier . . . . .	56
5.2.4	Local exploration strategies for graph learning . . . . .	57
5.3	Results . . . . .	59
5.3.1	Simulated exploration . . . . .	59
5.3.2	View classifier threshold . . . . .	60
5.3.3	Graph learning . . . . .	62
5.3.4	Metric knowledge in view graphs . . . . .	64
5.4	Discussion . . . . .	66
5.4.1	Relation to other topological models . . . . .	67
5.4.2	Conclusion . . . . .	68

<b>6</b>	<b>Optimal Matched Filters</b>	<b>71</b>
6.1	Processing of Optic Flow in the Fly Visual System	74
6.2	Matched Filters for Optic Flow Patterns	75
6.2.1	Extracting self-motion parameters from optic flow	75
6.2.2	Estimating self-motion using matched filters	76
6.3	Optimal Matched Filters	80
6.3.1	Local preferred directions	80
6.3.2	Optimal weights for self-motion estimation	81
6.4	Results	83
6.4.1	Where to look in office environments	83
6.4.2	Performance in random dot clouds	87
6.4.3	Performance on a mobile robot	89
6.4.4	Visual path integration	93
6.5	Discussion	94
6.5.1	Limitations of the approach	95
6.5.2	Visual path integration	96
6.5.3	Relation to other matched filter approaches	97
6.5.4	Conclusion	98
<b>7</b>	<b>Coupling Metric Information and View Graphs</b>	<b>100</b>
7.1	Coupling of Metric and View-Based Information in Insects	101
7.2	Supplementing View-based Navigation by Vectors	102
7.2.1	Scene-based homing and path integration	102
7.2.2	Metric view graphs	103
7.2.3	Survey navigation using vector chains	105
7.3	Improvements of the Current System	107
<b>8</b>	<b>Concluding Remarks</b>	<b>108</b>
8.1	Summary	108
8.2	Perspectives for Future Projects	109
<b>A</b>	<b>Tangential Neurons and Matched Filters</b>	<b>111</b>
A.1	Tangential Neurons	112
A.2	World Model	113
A.3	Results	115
A.3.1	Comparison to receptive fields of single VS-neurons	115
A.3.2	Comparison to ensembles of VS-neurons	119
A.4	Discussion	121

A.4.1	The functional role of VS-neurons . . . . .	122
A.4.2	Model assumptions and approximations . . . . .	123
A.4.3	Conclusion . . . . .	124
<b>B</b>	<b>Adapting Vision Systems to Image Statistics</b>	<b>126</b>
B.1	Spatiotemporal Statistics of Natural "Movies" . . . . .	127
B.2	Wiener Filters . . . . .	129
B.3	Infomax Filters . . . . .	131
B.4	Adapting Reichardt Detectors . . . . .	134
B.5	Automatic Generation of Vision Systems . . . . .	136
	<b>Bibliography</b>	<b>138</b>
