Contents

<i>Preface</i>	iii
<i>Contributors</i>	xi
I. Biosynthesis	
1. δ -(L- α -Aminoadipyl)-L-Cysteinyl-D-Valine Synthetase as a Model Tripeptide Synthetase	1
<i>Hans von Döhren, Wibke Kallow, Mary Anne Tavanlar, Torsten Schwecke, Ralf Dieckmann, and Volker Uhlmann</i>	
2. Metabolic Engineering for Cephalosporin C Yield Improvement and Production of Intermediates	39
<i>Joe E. Dotzlaw, Steven W. Queener, and Wu-Kuang Yeh</i>	
3. Bioconversion of Penicillins to Cephalosporins	61
<i>Arnold L. Demain, Jose L. Adrio, and Jacqueline M. Piret</i>	
4. Direct Fermentative Production of Acyltylosins by Genetically Engineered Strains of <i>Streptomyces fradiae</i>	89
<i>Akira Arisawa and Hiroshi Tsunekawa</i>	

5.	Engineering <i>Streptomyces avermitilis</i> for the Production of Novel Avermectins: Mutant Design and Titer Improvement <i>Claudio D. Denoya, Kim J. Stutzman-Engwall, and Hamish A. I. McArthur</i>	113
II. Biocatalysis		
6.	Biocatalytic Syntheses of Chiral Intermediates for Antihypertensive Drugs <i>Ramesh N. Patel</i>	137
7.	Cloning, Structure, and Activity of Ketone Reductases from Baker's Yeast <i>Jon D. Stewart, Sonia Rodríguez, and Margaret M. Kayser</i>	175
8.	Cross-Linked Enzyme Crystals: Biocatalysts for the Organic Chemist <i>Michael D. Grim</i>	209
9.	Enzymatic Deacylation of Echinocandins and Related Antifungal Agents <i>Andrew R. Cockshott, Adam J. Kreuzman, and Wu-Kuang Yeh</i>	227
III. Screening/Optimization		
10.	Roles of Enzymes in Antibacterial Drug Discovery <i>Siddhartha Roychoudhury</i>	245
11.	Penicillin-Binding Proteins as Antimicrobial Targets: Expression, Purification, and Assay Technologies <i>Genshi Zhao, Timothy I. Meier, and Wu-Kuang Yeh</i>	263
12.	Development of a High-Throughput Screen for <i>Streptococcus pneumoniae</i> UDP-N-Acetylmuramoyl-Alanine: D-Glutamate Ligase (MurD) for the Identification of MurD Inhibitors <i>Michele C. Smith, James A. Cook, Gary M. Birch, Stephen A. Hitchcock, Robert B. Peery, Joann Hoskins, Paul L. Skatrud, Raymond C. Yao, and Karen L. Cox</i>	289
13.	Purification and Assay Development for Human Rhinovirus Proteases <i>Q. May Wang and Robert B. Johnson</i>	307

14. Screening for Parasiticides Using Recombinant Microorganisms <i>Timothy G. Geary</i>	323
15. Screening for Inhibitors of Lipid Metabolism <i>Hiroshi Tomoda and Satoshi Ōmura</i>	343
16. Design and Development of a Selective Assay System for the Phospholipase A ₂ Superfamily <i>Hsiu-Chiung Yang, Marian Mosior, and Edward A. Dennis</i>	379
IV. Emerging Technologies	
17. Understanding and Exploiting Bacterial Polyketide Synthases <i>Robert McDaniel and Chaitan Khosla</i>	397
18. Polyketide Synthases: Analysis and Use in Synthesis <i>Kira J. Weissman and James Staunton</i>	427
19. Enzymatic Synthesis of Fungal <i>N</i> -Methylated Cyclopeptides and Depsipeptides <i>Mirko Glinski, Till Hornbogen, and Rainer Zocher</i>	471
20. New Strategies for Target Identification, Validation, and Use of Enzymes in High-Throughput Screening <i>Joaquim Trias and Zhengyu Yuan</i>	499
21. Use of Genomics for Enzyme-Based Drug Discovery <i>Molly B. Schmid</i>	515
22. Assigning Precise Function to Genes <i>Ridong Chen</i>	537
23. Redesigning Binding and Catalytic Specificities of Enzymes <i>Ridong Chen</i>	555
24. Proteomics: Chromatographic Fractionation Prior to Two-Dimensional Polyacrylamide Gel Electrophoresis for Enrichment of Low-Abundance Proteins to Facilitate Identification by Mass Spectrometric Methods <i>Srinivasan Krishnan, John E. Hale, and Gerald W. Becker</i>	575
<i>Index</i>	597
