
SOIL and WATER CHEMISTRY

An Integrative Approach

MICHAEL E. ESSINGTON

CRC PRESS

Boca Raton London New York Washington, D.C.

Table of Contents

Chapter 1	The Soil Chemical Environment: An Overview	1
1.1	Phases and Chemical Processes in Soil	1
1.1.1	Intraphase Soil Processes	3
1.1.2	Interphase Soil Processes	4
1.2	Elements in the Soil Environment: Their Concentrations and Important Species	6
1.3	Units and Conversions	14
1.4	Heterogeneity of Soil Chemical Characteristics	19
1.4.1	Descriptive Statistical Properties	21
1.4.2	Geostatistics	23
1.4.2.1	Variograms	24
1.4.2.2	Interpolation by Kriging	28
1.5	Exercises	31
	References	34
Chapter 2	Soil Minerals	35
2.1	Chemical Bonds	35
2.2	Pauling's Rules	38
2.3	Crystal Structure	43
2.4	Silicate Classes	45
2.4.1	Nesosilicates	46
2.4.2	Sorosilicates	48
2.4.3	Cyclosilicates	48
2.4.4	Inosilicates	48
2.4.5	Phyllosilicates	49
2.4.6	Tectosilicates	53
2.5	Clay Mineralogy	56
2.5.1	Division 1:1 Phyllosilicate Minerals	61
2.5.2	Division 2:1 Phyllosilicate Minerals	65
2.5.2.1	Pyrophyllite Group	65
2.5.2.2	Smectite Group	68
2.5.2.3	Vermiculite Group	74
2.5.2.4	Mica and Illite Groups	75
2.5.2.5	Chlorite Group	76
2.5.2.6	Interstratified Layer Silicates	78
2.6	Hydrous Metal Oxides	80
2.6.1	Hydrous Aluminum Oxides	80
2.6.2	Hydrous Iron Oxides	83
2.6.3	Hydrous Manganese Oxides	86
2.6.4	Allophane and Imogolite	88
2.7	X-Ray Diffraction Analysis	90
2.7.1	Principles	90
2.7.2	Clay Mineral Characterization	93
2.8	Exercises	98
	References	100

Chapter 3	Chemical Weathering	101
3.1	Hydrolysis and Oxidation	101
3.2	Balancing Chemical Reactions	105
3.3	Mineral Stability: Primary Silicates in the Sand- and Silt-Sized Fractions.....	109
3.4	Mineral Stability: Clay-Sized Fraction	111
3.5	Weathering and Formation Characteristics of the Phyllosilicates.....	113
3.5.1	Mica	113
3.5.2	Chlorite	120
3.5.3	Vermiculite.....	122
3.5.4	Smectite	123
3.6	General Weathering Scheme for the Phyllosilicates.....	124
3.7	Exercises	125
	References	127
Chapter 4	Organic Matter in Soil	129
4.1	Determination of Soil Organic Carbon Concentrations	131
4.2	Organic Functional Groups: A Review	133
4.3	Nonhumic Substances	140
4.3.1	Carbohydrates	140
4.3.2	Nitrogen, Sulfur, and Phosphorus Compounds	143
4.3.3	Lipids	150
4.3.4	Lignins	152
4.4	Humic Substances	155
4.4.1	Genesis of Humic Substances.....	157
4.4.2	Chemical and Structural Characteristics of Humic Substances	163
4.4.2.1	Elemental Content.....	163
4.4.2.2	Functional Groups and Structural Components	167
4.4.2.3	Molecular Mass and Configuration	173
4.5	Exercises	178
	References	180
Chapter 5	Soil Water Chemistry	183
5.1	Nature of Water	183
5.2	Ion Hydration.....	185
5.3	Electrolyte Solutions	188
5.4	Hydrolysis of Cations.....	195
5.5	Lowry-Brønsted Acids and Bases	198
5.6	Complex Ions and Ion Pairs.....	207
5.6.1	Stability of Soluble Complexes.....	208
5.6.2	The Irving and Williams Series	211
5.6.3	Metal-Fulvate Interactions	212
5.7	The Ion Association Model.....	216
5.8	Ion Speciation in Soil Solution.....	223
5.8.1	Acid Soil Solution	224
5.8.2	Alkaline Soil Solution	225
5.9	Qualitative Aspects of Ion Speciation.....	227
5.10	Soil Water Sampling Methodologies	232
5.10.1	<i>In Situ</i> Soil Water Sampling.....	232
5.10.2	<i>Ex Situ</i> Soil Water Sampling.....	236

5.11 Methods of Chemical Analysis: Elemental Analysis.....	238
5.11.1 Atomic Spectrometry.....	238
5.11.1.1 Flame Atomic Absorption Spectrophotometry	238
5.11.1.2 Atomic Emission Spectrometry	243
5.11.1.3 Graphite Furnace Atomic Absorption Spectrophotometry	243
5.11.1.4 Hydride Generation Atomic Absorption Spectrophotometry	245
5.11.2 Inductively Coupled (Argon) Plasma Spectrometry	246
5.12 Exercises	248
References	251
Chapter 6 Mineral Solubility.....	255
6.1 Mineral Solubility: Basic Principles	255
6.1.1 Mineralogical Controls on Ion Activities in Soil Solutions	257
6.1.2 The Ion Activity Product and Relative Saturation.....	260
6.2 Application of Mineral Solubility Principles: Impediments	263
6.2.1 The Estimation of Standard Free Energies of Formation	264
6.2.2 Metastability and the Step Rule.....	268
6.3 The Deviation of K_{sp} from K_{dis}	269
6.3.1 Poorly Crystalline and Microcrystalline Solids.....	269
6.3.2 Solid Solutions	271
6.4 Mineral Solubility and Solution Composition.....	274
6.5 Stability Diagrams.....	276
6.5.1 Activity Diagrams	277
6.5.2 Activity Ratio Diagrams.....	280
6.5.3 The Temperature Dependence of the Equilibrium Constant.....	283
6.5.4 <i>In Situ</i> Stabilization: Observed and Predicted Transformations of Metallic Lead in Alkaline Soil	290
6.5.5 Predominance Diagrams.....	297
6.6 Predicting Solution Composition.....	302
6.7 Exercises	305
References	308
Chapter 7 Surface Chemistry and Adsorption Reactions	311
7.1 Surface Functional Groups and Complexes.....	311
7.1.1 Inorganic Soil Particle Surfaces and the Source of Charge	313
7.1.2 Surface Complexes	321
7.2 The Solid-Solution Interface: A Microscopic View	322
7.2.1 Surface Charge Density.....	322
7.2.2 Points of Zero Charge	327
7.2.3 The Electric Double-Layer.....	330
7.3 Quantitative Description of Adsorption	334
7.3.1 The Adsorption Isotherm.....	335
7.3.2 Linear Partition Theory	348
7.3.3 Adsorption Kinetics and Desorption Hysteresis.....	358
7.4 Specific Retention of Metals and Ligands.....	364
7.5 Ligand Effects on Metal Adsorption.....	370
7.6 Organic Surface Functional Groups and Organic Molecular Retention Mechanisms.....	373
7.6.1 Organic Surface Functional Groups.....	373
7.6.2 Molecular Retention Mechanisms.....	373

7.7	Surface Complexation Models	377
7.7.1	The Nonelectrostatic Model	380
7.7.2	Electrostatic Effects on Adsorption	386
7.7.2.1	The Constant Capacitance Model	387
7.7.2.2	The Modified Triple Layer Model	391
7.8	Exercises	394
	References	397

Chapter 8 Cation Exchange..... 399

8.1	Cation Exchange: A Beginning for Soil Chemistry	399
8.2	Qualitative Aspects of Cation Exchange	401
8.3	Cation Exchange Capacity and Exchange Phase Composition	404
8.3.1	Exchange Phase Composition	404
8.3.2	Methods of Measuring the Cation Exchange Capacity	407
8.3.2.1	Ammonium Acetate (pH 7 or 8.2)	407
8.3.2.2	Cation Exchange Capacity of Arid Land Soils	408
8.3.2.3	Cation Exchange Capacity of Acid Soils	409
8.3.2.4	Unbuffered Salt Extraction	409
8.4	Quantitative Description of Cation Exchange	409
8.4.1	Cation Exchange Selectivity	410
8.4.1.1	Kerr Selectivity Coefficient	410
8.4.1.2	Vanselow Selectivity Coefficient	412
8.4.1.3	Rothmund and Kornfeld Selectivity Coefficient	416
8.4.1.4	Gapon Selectivity Coefficient	418
8.4.1.5	Gaines and Thomas Selectivity Coefficient	420
8.4.1.6	Davies Selectivity Coefficient	421
8.4.1.7	Regular Solution Model	422
8.4.2	Exchange Isotherms and Preference	424
8.4.3	Exchange Equilibrium Constant	430
8.5	Exercises	440
	References	442

Chapter 9 Oxidation-Reduction Reactions in Soils..... 445

9.1	The Electron Activity	446
9.2	Redox Potential Measurements	449
9.3	Redox Status in Soils	454
9.3.1	Reduction-Oxidation Sequences in Soils	455
9.3.2	Redox Zones	458
9.4	pe-pH Predominance Diagrams	459
9.4.1	Construction of pe-pH Diagrams: The Cr-H ₂ O System	460
9.4.2	Examples of pe-pH Diagrams for Redox-Sensitive Elements	464
9.4.2.1	Iron and Manganese	465
9.4.2.2	Selenium	467
9.4.2.3	Arsenic	469
9.5	Exercises	471
	References	472

Chapter 10	Acidity in Soil Materials	473
10.1	The Measurement of Soil Solution pH	474
10.1.1	The pH Electrode System	474
10.1.2	Soil Solution pH	476
10.2	Chemical and Biochemical Processes that Influence Soil Solution pH	477
10.3	Acid-Neutralizing Capacity and the Quantification of Soil Acidity	483
10.4	Neutralization of Soil Acidity	484
10.5	Acid Generation and Management in Mine Spoils: The Oxidation of Pyrite	488
10.5.1	Acid Generation and Neutralization in Pyritic Wastes	488
10.5.2	Pyritic Mine Spoil Reclamation: Case Study	492
10.6	Exercises	495
	References	497
Chapter 11	Soil Salinity and Sodicity	499
11.1	Sources of Salts	500
11.2	Diagnostic Characteristics of Saline and Sodic Soils	501
11.3	Irrigation Water Quality Parameters and Relationships	504
11.4	Genesis, Management, and Reclamation of Salt-Affected Soils	506
11.4.1	Saline Soils	507
11.4.2	Sodic Soils	511
11.4.2.1	Classification of Sodic Soils	511
11.4.2.2	Flocculation and Dispersion in Colloidal Suspensions	513
11.4.2.3	Genesis and Management of Sodic Soils	516
11.4.3	Sodic Mine Spoil Reclamation	518
11.5	Exercises	519
	References	521
