Chemistry, Pharmacy and Revolution in France, 1777-1809

JONATHAN SIMON
Jonathan Simon, Max Planck Institute for the History of Science, Berlin, Germany

ASHGATE
## Contents

1. **Introduction: Pharmacy and the Chemical Revolution**
   - The history of pharmacy and the history of science
   - Disciplines in science
   - Reconsidering the chemical revolution
   - The French and chemical revolutions

2. **From Artisan to Scientist: The Creation and Rise of the French Pharmacist**
   - Pharmacy: the journey mapped out from 1777 to 1803
   - Founding the Collège de pharmacie de Paris
   - Fourcroy and the Société libre des pharmaciens de Paris
   - Conclusion

3. **From Pharmacy to 'Philosophical Chemistry': Glaser, Lemery, Venel, Macquer and Lavoisier**
   - Nicolas Lemery - chemist or pharmacist?
   - The aims of chemistry: Glaser and Lemery
   - Christophle Glaser
   - Venel & the Encyclopédie
   - Pierre-Joseph Macquer - chemistry for chemistry's sake
   - Antoine-Laurent Lavoisier - a new system of chemistry
   - The Encyclopédie méthodique

4. **The New Chemistry: Fourcroy, Pharmacy and Revolution**
   - The life and times of Antoine-François de Fourcroy
   - Fourcroy and Lavoisier
   - Fourcroy's teaching
   - Medicine illuminated by the physical sciences
   - The origins of revolutionary reform in medical education
   - Riding out the political storm
   - The provisions of the law of Germinal
   - The Journal de pharmacie
   - Conclusion
