

Dejan Lj. Milutinović and Pedro U. Lima

Cells and Robots

Modeling and Control of Large-Size
Agent Populations

Contents

1. Introduction	1
1.1 Analogy Between an Individual Robot and a Cell	2
1.2 Robot Teams and Cell Populations	4
1.3 Related Work	5
1.4 Book Outline	7
2. Immune System and T-Cell Receptor Dynamics of a T-Cell Population	9
2.1 Surface T-Cell Receptor Dynamics in a Mixture of Interacting Cells	10
2.2 T-Cell Receptor Triggering Experimental Setup	12
2.3 Summary	14
3. Micro-Agent and Stochastic Micro-Agent Models	15
3.1 Problem Formulation	15
3.2 T-Cell Hybrid Automaton Model	16
3.3 T-Cell Population Hybrid System Model	18
3.4 Micro-Agent Individual Model	20
3.5 Stochastic Micro-Agent	21
3.6 Summary	23
4. Micro-Agent Population Dynamics	25
4.1 Statistical Physics Background	25
4.2 Micro-Agent Population Dynamic Equations	27
4.3 Summary	34
5. Stochastic Micro-Agent Model of the T-Cell Receptor Dynamics	35
5.1 T-Cell Receptor Dynamics: A Numerical Example	35
5.2 Micro-Agent vs. Ordinary Differential Equation Model	40
5.3 T-Cell Receptor Expression Dynamics Model Test	42
5.4 T-Cell Receptor Dynamics in <i>Conjugated</i> State	46

5.4.1	Model Hypothesis Test	48
5.4.2	Parameter Identification	50
5.5	Summary	51
6.	Stochastic Micro-Agent Model Uncertainties	53
6.1	Discrete Parameter Uncertainty Case	54
6.2	Continuous Parameter Uncertainty Case	60
6.3	Numerical Example	63
6.4	Summary	66
7.	Stochastic Modeling and Control of a Large-Size Robotic Population	67
7.1	Robotic Population Mission Scenario	68
7.2	Robotic Population Position Prediction	71
7.3	Robotic Population Optimal Control Problem	73
7.4	Example of Using the PDE Minimum Principle for Robotic Population Control	77
7.4.1	Complexity of Numerical Optimal Control	82
7.4.2	Numerical Optimal Control	84
7.5	Summary	89
8.	Conclusions and Future Work	91
A.	Stochastic Model and Data Processing of Flow Cytometry Measurements	97
A.1	Probability Density Estimation Algorithm	99
A.2	Richardson-Lucy Deconvolution Algorithm	103
B.	Estimated T-Cell Receptor Probability Density Function ...	107
C.	Steady State T-Cell Receptor Probability Density Function and Average Amount	111
D.	Optimal Control of Partial Differential Equations	113
