Contents

1. New Drug Development ................................................................. 1
   Pravina Koteshwar, Shubha R, Diana Francis, SK Gupta
   Introduction to Drug Development 1
   Drug Discovery Process 2
   Preclinical Drug Development 14
   Clinical Development 34
   Pharmacovigilance 84
   Regulatory Approvals for Registration of Drugs 95
   Clinical Data Management 102

2. Drug Discovery and Development of Biologics ............................ 136
   Rajani Mathur
   The Science of Drug Hunting 136
   Defining Biologics 136
   Making Business Sense Out of Biologics 137
   Why a Halo around Biologics? 139
   Biomarker-based Strategy in the Discovery and Development of Biologics 140
   Challenges in the Discovery and Development of Biologics 143
   Biologics vs Small Molecules: What is the Scorecard? 146
   Safety Biologics 146
   Concluding Remarks 147

3. Clinical Development of New Drugs ........................................... 149
   SK Gupta, Niranjan Gallpali
   History 149
   Drug Development Process 151
   Success Rate of Developing a New Drug 152
   Time Required to Develop a New Drug 152
   Stages of Development of a New Drug 153
   Human Clinical Trial Phases 154
   Clinical Trial Design 159
   Clinical Operations 163
   Clinical Data Management 164
   Contract Research Organization (CRO) 165
   Clinical Trial Regulations 166
4. Phase 0 Trials in Cancer Drug Development ......................... 170
Shivaani Kummar, James H Doroshow

Advances in Clinical Drug Evaluation 170
Types of Phase 0 Trials 171
Decision Regarding First-in-human Trials: Phase 0 or Phase I 174
Exploratory IND Requirements 175
Imaging Studies 176
Ethical Considerations 177
Phase 0 Experience 178

5. Bioethics in Clinical Research ............................................. 182
Renu Agarwal, Puneet Agarwal, SK Gupta, Sushma Srivastava

Historical Perspective 184
Research Involving Human Subjects 185
Ethics of Research Involving Vulnerable Subjects 188
Ethics in Key Areas of Research and Practice 196
Ethical Challenges in India and Other Developing Countries 216
National Bioethics Organizations 218

6. Medical Devices—Regulations and Research .......................... 222
Saurendra Das

Definition of a Medical Device 223
Phases in the Lifespan of a Medical Device 224
Conducting Clinical Trials on Medical Devices 226
Medical Device Regulations across the World 229
Medical Device Safety 232

7. Clinical Development of Vaccines ..................................... 235
Ajit Pal Singh, Ankita Nagpal

Phases of Trials 235
Vaccine Efficacy 238
Other Design for Efficacy Studies 247

8. Clinical Development of Anticancer Molecules ..................... 253
SK Mishra

Source and Target Identification 254
Screening of Anticancer Agent 255
Importance of Biomarkers in Anticancer Drug Discovery 259
Formulation Studies 260
Animal Studies 260
Regulatory Provisions for Investigational
   New Drug Application Process 262
Clinical Development of Anticancer Molecule 264
9. Role of Pharmacovigilance in Clinical Research .................................. 280
   SK Gupta, Nicholas Moore, Arani Chatterjee, Manoj Sharma

   Pharmacovigilance: International Status ............................................. 280
   Pharmacovigilance: The Current System in India .................................. 281
   Important Areas of Pharmacovigilance ................................................. 282
   Pharmacovigilance Methods ................................................................. 283
   Benefit-risk Assessment in Pharmacovigilance ....................................... 287
   Crisis Management in Pharmacovigilance ........................................... 288
   Clinical Trials: Aspects of Safety Monitoring ....................................... 289
   Role of Pharmaceutical Industry ............................................................ 290
   Drug Development Process .................................................................... 291
   Risk Information During Clinical Trials ................................................. 309
   Considerations for Risk Assessment ..................................................... 311
   Outcome and Impact of Pharmacovigilance System on Clinical Trial ....... 312

10. Data Management in Pharmacovigilance ........................................... 322
    Sanjeev Miglani

    Source of Report ..................................................................................... 322
    Triage of Cases ....................................................................................... 325
    Validation of a Case Report ................................................................... 326
    Follow-up Information ............................................................................ 334
    Line Listing and Summary Tabulations for Periodic Safety Update Reports
    and Annual Safety Reports ................................................................. 336
    SAE Reconciliation ................................................................................ 337
    Archival .................................................................................................... 337

11. TGN 1412: Lessons for Phase I Trials in India .................................. 340
    Arun Bhatt

    TGN 1412: The Serious Adverse Events ............................................... 340
    TGN 1412: Regulatory Inspection .......................................................... 342
    TGN 1412: Lessons .................................................................................. 343
    Impact on Pharmaceutical Development .............................................. 345
    ABPI Phase I Clinical Trials Guideline 2007 ....................................... 349
    Indian Scenario for Phase I and Future Options ..................................... 350

12. Safety and Medical Monitoring in Clinical Trials: An Overview ......... 353
    Sonal Vora

    Monitoring in Clinical Trials ................................................................... 353
    Role and Responsibilities of a Medical Monitor in Clinical Trials .......... 354
    Good Safety and Medical Monitoring Practices ..................................... 358
    Future Trends .......................................................................................... 359
13. Clinical Trials in Asia-Pacific—New Challenges and Opportunities .......................................................... 363

   *Zinobia Madan*

   Opportunities and Challenges 363
   Risk/Benefit Profile 364
   Asia-Pacific Market Demands 368
   Key Factors for Successful Operations 370

14. Principles of Patient Recruitment .......................................................... 373

   *Dan McDonald*

   Background and Industry Trends 375
   Investigative Sites 377
   The Patient—Our Partner in the Clinical Research Process 378
   Strategies for Successful Recruitment 385
   General Recruitment Planning and Site Based Strategies 386
   Feasibility Analysis Case Study 387
   Medical Community Outreach 388
   General Public-patient-facing Strategies 389
   Community Outreach and Health Associations 390
   Health Associations 391
   Other Emerging Strategies for Recruitment 392
   General Tips for Effective Recruitment 394
   Develop a General Strategy that can be Adapted to Each Study 396
   Bonus Material 397

15. Essentials of Medical Writing .......................................................... 401

   *Sushma Srivastava*

   Fundamentals of Good Medical Writing 401
   Types of Medical Writing 404
   Types of Research Publications 405
   Requirements for Writing Research Articles 406
   Career Opportunities 408
   Qualifications and Skills Needed 409
   Initiating the Writing Carrier 409
   Remuneration 412
   Tools 413
   Software Needed 413
   Professional Gains 414
   Organizations for Medical and Science Writers 414
16. Clinical Research and Pharmacovigilance of Herbal Drugs ...... 418
   CK Katiyar, Arun Gupta
   Definitions and Classification 420
   Historical Aspects 423
   Regulation of Herbal/Traditional Medicines 424
   Regulatory Aspects on Conducting the Clinical Trials 427
   Review of Clinical Trial Designs on
   Traditional/Herbal Medicines 431
   Limitation with Herbal/Traditional Medicine
   with Reference to Clinical Trials 434
   Need of Alternative Approach for Clinical Trial on
   Traditional Medicine 437
   Proposed Methodologies for Clinical Trials on
   Ayurvedic Herbal Drugs 438
   Pharmacovigilance of Traditional/Herbal Drugs 440
   Conclusion and a Way Forward 445

17. Outsourcing Opportunities in Clinical Research ......................... 451
    Kiran Marthak
    The Need for Outsourcing: An Introduction 451
    Advantages and Disadvantages of Outsourcing 453
    The Global Pharmaceutical and Biotechnology Industry is in
    the Midst of Challenging Times, 2008 453
    Areas of Outsourcing 454
    The Need for Outsourcing 455
    Winds of Change Blowing in the
    Pharmaceutical Outsourcing Landscape 459
    Strategic versus Tactical Outsourcing 459
    CRO Selection Criterion 461
    Evaluating and Selecting a CRO 463
    Partnering in India 464
    Outlook 465

Annexures

Annexure I: Ethical Guidelines for Biomedical Research on
   Human Participants: ICMR Code ................................. 467

Annexure II: WMA Declaration of Helsinki: Ethical Principles for
   Medical Research Involving Human Subjects ............. 551

Annexure III: International Conference on Harmonisation of
   Technical Requirements for Registration of
   Pharmaceuticals for Human Use................................ 556

Annexure IV: Statistical Principles for Clinical Trials .................. 605

Index ....................................................................................... 643
