

# **Surface Processes of Small Solar System Bodies**

Von der Fakultät für Elektrotechnik, Informationstechnik, Physik  
der Technischen Universität Carolo-Wilhelmina

zu Braunschweig

zur Erlangung des Grades eines  
Doktors der Naturwissenschaften

(Dr.rer.nat.)

genehmigte

Dissertation

Kumulative Arbeit

von Bastian Gundlach

aus Fürth

<b>Summary</b>	<b>9</b>
<b>Zusammenfassung</b>	<b>11</b>
<b>1 Introduction</b>	<b>13</b>
1.1 Activity of Icy Materials in the Solar System . . . . .	14
1.1.1 Comets . . . . .	14
1.1.2 Icy Satellites . . . . .	29
1.1.3 Laboratory Experiments . . . . .	32
1.1.4 Thermophysical Models . . . . .	35
1.2 Heat Conductivity of the Surface Regolith . . . . .	36
1.2.1 Estimations from Remote Measurements . . . . .	37
1.2.2 In Situ Measurements, Laboratory Experiments and Models . . . . .	38
1.3 This Thesis . . . . .	39
<b>2 Outgassing of Icy Bodies in the Solar System - I. The Sublimation of Hexagonal Water Ice through Dust Layers</b>	<b>41</b>
2.1 Introduction . . . . .	42
2.2 Experimental . . . . .	43
2.2.1 Sublimation Experiment . . . . .	43
2.2.2 Diffusion Experiment . . . . .	44
2.2.3 Sample Preparation . . . . .	45
2.2.4 Measurement of the Gas Production Rate . . . . .	46
2.3 Results . . . . .	48
2.3.1 Sublimation of Hexagonal Water Ice . . . . .	48
2.3.2 Gas Diffusion through Dust Layers . . . . .	49
2.3.3 Sublimation Coefficient . . . . .	57
2.4 Conclusions and Implications . . . . .	60
<b>3 Outgassing of Icy Bodies in the Solar System - II. Heat Transport in Dry, Porous Surface Dust Layers</b>	<b>63</b>
3.1 Introduction . . . . .	63
3.2 Experimental Technique . . . . .	64
3.2.1 Setup . . . . .	64
3.2.2 Calibration of the Infrared Camera . . . . .	65
3.2.3 Procedure . . . . .	66

3.3	The Dust Samples . . . . .	66
3.3.1	Size Distribution and Volume Filling Factor . . . . .	67
3.3.2	Albedo . . . . .	68
3.3.3	Emissivity . . . . .	68
3.4	Experimental Results . . . . .	68
3.4.1	Surface Temperature . . . . .	68
3.4.2	Energy Balance . . . . .	71
3.4.3	Heat Conductivity . . . . .	72
3.5	A Model for the Heat Conductivity in Loose, Granular Media . . . . .	76
3.5.1	A General Model for the Heat Conductivity of Dust Layers . . . . .	76
3.5.2	Heat Conductivity of Dust Layers Composed of Individual Dust Aggregates . . . . .	79
3.6	Discussion . . . . .	84
3.6.1	Influence on the Hertz Factor . . . . .	84
3.6.2	Influence on the Modeling of Cometary Activity . . . . .	84
3.6.3	Limitations of the Model . . . . .	88
3.7	Conclusion . . . . .	89
<b>4</b>	<b>A New Method to Determine the Grain Size of Planetary Regolith</b>	<b>91</b>
4.1	Introduction . . . . .	91
4.2	Strategy . . . . .	92
4.3	The Heat Conductivity Model . . . . .	93
4.4	Calibration of the Heat Conductivity Model Using Lunar Regolith . . . . .	95
4.5	Important Properties of the Analyzed Objects . . . . .	98
4.6	Determination of the Regolith Particle Size . . . . .	101
4.7	Functional Dependence of the Mean Regolith Grain Size on the Gravitational Acceleration of the Asteroid . . . . .	110
4.8	Influence of the Network Heat Conductivity on the Grain Size Estimation . . . . .	113
4.9	Conclusion and Discussion . . . . .	114
<b>5</b>	<b>Micrometer-Sized Ice Particles for Planetary-Science Experiments - I. Preparation, Critical Rolling Friction Force, and Specific Surface Energy</b>	<b>117</b>
5.1	Introduction . . . . .	118
5.2	Preparation of Micrometer-Sized Ice Particles . . . . .	119
5.3	Characterization of the Produced Micrometer-Sized Ice Particles . . . . .	121
5.3.1	Size Distribution . . . . .	121
5.3.2	Volume Filling Factor of Ice Aggregates Composed of Micro- meter-Sized Ice Particles . . . . .	123
5.3.3	Critical Rolling Friction Force and Specific Surface Energy . . . . .	124
5.4	Conclusion and Outlook . . . . .	128
<b>6</b>	<b>Micrometer-Sized Ice Particles for Planetary-Science Experiments - II. Bidirectional Reflectance</b>	<b>129</b>
6.1	Introduction . . . . .	129
6.2	Methods . . . . .	132
6.2.1	Photometric Measurements . . . . .	132

---

6.2.2	Fitting of Experimental Data by the Hapke Photometric Model . . .	134
6.3	Sample Preparation and Characterization . . . . .	135
6.3.1	Preparation . . . . .	135
6.3.2	Macroscopic Texture . . . . .	136
6.3.3	Volume Filling Factor . . . . .	136
6.3.4	Microscopic Structure . . . . .	137
6.3.5	Size Distribution . . . . .	138
6.4	Results . . . . .	139
6.5	Discussion . . . . .	144
6.6	Conclusion . . . . .	152
<b>7</b>	<b>A Note on the Survival of the Sungrazing Comet C/2011 W3 (Lovejoy) within the Roche Limit</b>	<b>153</b>
7.1	Introduction . . . . .	153
7.2	Forces Acting on Sungrazing Comets . . . . .	155
7.3	Size Estimation of Surviving Sungrazing Comets within the Roche Limit	158
7.4	Discussion and Conclusion . . . . .	160
<b>8</b>	<b>Conclusion and Outlook</b>	<b>163</b>
	<b>Bibliography</b>	<b>169</b>
	<b>Acknowledgments</b>	<b>195</b>
	<b>Curriculum Vitae</b>	<b>197</b>
	<b>Erklärung zum eigenen Beitrag</b>	<b>199</b>
