

# Contents

<b>1. Introduction</b> .....	1
<b>2. The Hamiltonian</b> .....	5
2.1 The Schrödinger Equation .....	5
2.2 Born–Oppenheimer Approximation .....	7
2.3 Structure of the Hamiltonian.....	8
Exercises .....	18
<b>3. Electronic Structure Methods and Total Energies</b> .....	21
3.1 Hartree–Fock Theory .....	21
3.2 Quantum Chemistry Methods .....	31
3.3 Density Functional Theory .....	36
3.4 Pseudopotentials .....	41
3.5 Implementations of Density Functional Theory .....	44
3.6 Further Many-Electron Methods.....	49
3.7 Tight-Binding Method .....	50
Exercises .....	52
<b>4. Structure and Energetics of Clean Surfaces</b> .....	57
4.1 Electronic Structure of Surfaces .....	57
4.2 Metal Surfaces .....	63
4.3 Semiconductor Surfaces .....	72
4.4 Ionic Surfaces .....	80
4.5 Interpretation of STM Images .....	85
4.6 Surface Phonons .....	87
Exercises .....	92
<b>5. Adsorption on Surfaces</b> .....	95
5.1 Potential Energy Surfaces .....	95
5.2 Physisorption .....	97
5.3 Newns–Anderson Model .....	104
5.4 Atomic Chemisorption .....	110
5.5 Effective Medium Theory and Embedded Atom Method .....	116
5.6 Reactivity Concepts .....	123

5.7	Adsorption on Low-Index Surfaces	128
5.8	Adsorption on Precovered Surfaces	136
5.9	Adsorption on Structured Surfaces	139
5.10	Reactions on Surfaces	142
	Exercises	144
<b>6.</b>	<b>Gas-Surface Dynamics</b>	<b>147</b>
6.1	Classical Dynamics	147
6.2	Quantum Dynamics	149
6.3	Parametrization of ab initio Potentials	154
6.4	Scattering at Surfaces	157
6.5	Atomic and Molecular Adsorption on Surfaces	162
6.6	Dissociative Adsorption and Associative Desorption	171
	Exercises	189
<b>7.</b>	<b>Kinetic Modelling of Processes on Surfaces</b>	<b>191</b>
7.1	Determination of Rates	191
7.2	Diffusion	195
7.3	Kinetic Lattice Gas Model	198
7.4	Kinetic Modelling of Adsorption and Desorption	199
7.5	Growth	205
7.6	Reaction Kinetics on Surfaces	217
	Exercises	221
<b>8.</b>	<b>Electronically Non-adiabatic Processes</b>	<b>225</b>
8.1	Determination of Electronically Excited States	225
8.2	Electronic Excitation Mechanisms at Surfaces	228
8.3	Electronic Friction Effects	229
8.4	Reaction Dynamics with Electronic Transitions	232
8.5	Electronic Transitions	234
	Exercises	239
<b>9.</b>	<b>Perspectives</b>	<b>241</b>
9.1	Solid-liquid Interface	241
9.2	Nanostructured Surfaces	243
9.3	Biologically Relevant Systems	244
9.4	Industrial Applications	246
	<b>References</b>	<b>249</b>
	<b>Index</b>	<b>271</b>
