

Suspended-Sediment Characteristics of Indiana Streams, 1952–84

By CHARLES G. CRAWFORD and LAWRENCE J. MANSUE

Prepared in cooperation with the Indiana
Department of Natural Resources

U.S. GEOLOGICAL SURVEY WATER-SUPPLY PAPER 2404

CONTENTS

Abstract.....	1
Introduction	1
Physical Setting of the Study Area	2
Drainage Basins	2
Glacial Geology and Geomorphology	2
Soils	6
Climate and Precipitation	8
Runoff.....	8
Suspended-Sediment Sampling Methods	8
Suspended-Sediment Concentration and Discharge.....	11
Daily Record Stations.....	11
Partial-Record Stations	11
Suspended-Sediment Yield.....	16
Daily Record Stations.....	16
Partial-Record Stations	16
Limitations of Yields Estimated for Partial-Record Stations	20
Yield in Big Raccoon Creek	24
Prediction of Suspended-Sediment Yield From Drainage-Basin Characteristics	25
Regional Patterns of Suspended Sediment	27
Trends in Suspended-Sediment Concentration and Discharge.....	30
Trend Analysis Methods.....	30
Results of Trend Analysis.....	32
Summary and Conclusions	32
References Cited.....	33
