Contents

Preface	ix
1 Introduction	1
2 Modeling Uncertainty	5
2.1 Randomness and the Calculus of Probabilities	5
2.2 Uncertainty in Quantum Mechanics	6
2.3 Entropy and Information	7
2.4 Degrees of Belief	7
2.5 Imprecision, Vagueness, and Fuzziness	9
2.6 Non-additive Set Functions in Uncertainty	10
3 Capacities and the Choquet Functional	17
3.1 Capacities in \mathbb{R}^d	18
3.2 Abstract Capacities	19
3.3 Topological Concepts	21
3.4 Capacities on Topological Spaces	23
3.5 Classification of Capacities	25
3.6 Capacities and Belief Functions	27
3.6.1 The finite case	27
3.6.2 The continuous case	31
3.7 The Choquet Functional	39
3.7.1 An approximation problem	39
3.7.2 The Choquet functional	41
3.7.3 Properties of the Choquet integral	43
3.8 Capacities in Bayesian Statistics	44
3.9 A Decision - Making Problem	46
4 Information Measures	51
4.1 Various Aspects of Information	51
4.2 Generalized Information Measures	53

4.3	Operations of Composition	54
4.4	Information Measures of Type Inf	57
4.5	Connection with Capacities	62
5	Calculus of Fuzzy Concepts	67
5.1	Mathematical Modeling of Fuzzy Concepts	67
5.2	Calculus of Fuzzy Quantities	69
5.3	Reasoning with Fuzzy Concepts	77
5.3.1	t-norms	78
5.3.2	t-conorms	80
5.3.3	Negations	83
5.3.4	Implication operators	84
5.3.5	Approximate reasoning	89
5.4	Robustness of Fuzzy Logic	93
5.5	Approximation Capability of Fuzzy Systems	96
5.6	Fuzzy Inference	102
6	Fuzzy Measures and Integrals	107
6.1	What are Fuzzy Measures, and Why?	107
6.2	Fuzzy Measures - Definition and Examples	110
6.3	Related Issues	114
6.4	Conditional Fuzzy Measures	117
6.5	Choquet Integral - Meaning and Motivation	124
6.6	The Sugeno Integral	128
6.7	The Choquet Integral as a Fuzzy Integral	134
6.7.1	Notes on comonotonic additivity	139
6.7.2	Comonotonic additivity of functionals	140
6.8	Further Topics	141
6.8.1	The fuzzy t-conorm integral	143
6.8.2	Some properties of fuzzy integrals	146
6.8.3	The duality property of fuzzy integrals	154
6.8.4	On fuzzy measures of fuzzy events	159
6.8.5	Properties of extended fuzzy measures	163
7	Decision Making	173
7.1	General Framework for Decision Making	175
7.2	Non-additive Expected Utility	177
7.3	Non-additive Multiattribute Utility	182
7.4	Aggregation in Multicriteria Decision Making	192
7.4.1	Equivalence relations between operators	193
7.4.2	Equivalence classes of operators	194
7.4.3	Equivalence class of the Choquet integral	201

7.4.4	Equivalence class of the Sugeno integral	205
7.4.5	Equivalence class of fuzzy t-conorm integrals	207
7.5	Fuzzy Analytic Hierarchy Process	210
8	Subjective Multicriteria Evaluation	213
8.1	Statement of the Problem	214
8.1.1	Marginal evaluation	215
8.1.2	Global evaluation	217
8.2	Previous Approaches	220
8.3	Fuzzy Integral as a New Aggregation Tool	225
8.3.1	Properties for aggregation	225
8.3.2	Characterization of fuzzy integrals	229
8.3.3	Set relations between fuzzy integrals and other connectives	237
8.3.4	Additivity of fuzzy measures and preferential independence	238
8.4	Evaluation with Fuzzy Values	241
8.5	Practical Examples	244
8.5.1	Evaluation of tiles (1986)	245
8.5.2	Model of expression grade for face graphs (1984)	248
8.5.3	Prediction of wood strength (1985)	249
8.5.4	Analysis of public attitude towards the use of nuclear energy (1986)	252
8.5.5	Evaluation of printed color images (1988)	255
8.5.6	Design of speakers (1991)	257
8.5.7	Human reliability analysis (1992)	258
9	Pattern Recognition and Computer Vision	261
9.1	The Use of Fuzzy Set Theory	262
9.2	Information Fusion by Fuzzy Integrals	263
9.2.1	Consensus in probability theory	264
9.2.2	Consensus in possibility theory	266
9.2.3	The situation of fuzzy integrals	267
9.3	Application to Pattern Recognition	268
9.3.1	Introduction	268
9.3.2	The approach of Tahani-Keller	269
9.3.3	The approach of Grabisch-Sugeno	270
9.3.4	The multiclassifier approach	281
9.4	Image Processing and Computer Vision	282
9.4.1	Image segmentation	283
9.4.2	High level vision	285

10 Identification and Interpretation of Fuzzy Measures	293
10.1 Interpretation by Analysis of the Semantics	295
10.1.1 Introduction	295
10.1.2 Early attempts: the necessity coefficients of Ishii and Sugeno	296
10.1.3 Interpretation based on the Shapley value	298
10.1.4 Interaction between criteria	301
10.2 Identification Using Learning Samples	306
10.2.1 Introduction	306
10.2.2 Monotonicity relations in a fuzzy measure	307
10.2.3 Minimization of the error criterion	310
10.2.4 Heuristic algorithm of Mori and Murofushi	313
10.2.5 Bayesian-like learning	315
10.3 Interactive Optimization	316
Bibliography	321
Index	343
