

Radical Constructivism: A Way of Knowing and Learning

Ernst von Glasersfeld

The Falmer Press
(A member of the Taylor & Francis Group)
London • Washington, D.C.

Contents

| | |
|--|------|
| <i>Preface by Series Editor</i> | xi |
| <i>Preface</i> | xiii |
| <i>Acknowledgments</i> | xv |
| <i>List of Figures</i> | xvi |
| | |
| Chapter 1 | |
| Growing up Constructivist: Languages and Thoughtful People | 1 |
| Which Language Tells It 'as It Is'? | 2 |
| The Wrong Time in Vienna | 3 |
| Growing Roots in Dublin | 4 |
| Interdisciplinary Education | 6 |
| A Close Look at Meanings | 7 |
| The American Connection | 8 |
| Introduction to Psychology | 9 |
| Collaboration with a Chimpanzee | 11 |
| Discovering Piaget | 12 |
| From Mental Operations to the Construction of Reality | 13 |
| A Decisive Friendship | 15 |
| Teaching Experiments | 17 |
| The Spreading of Constructivist Ideas | 18 |
| Retirement and a New Beginning | 19 |
| Support from Physics and Philosophy of Science | 20 |
| | |
| Chapter 2 | |
| Unpopular Philosophical Ideas: A History in Quotations | 24 |
| Objectivity Put in Question | 25 |
| The Pre-Socratics | 26 |
| Theological Insights | 27 |
| Modern Science Widens the Rift | 28 |
| A Failure and an Achievement of Descartes | 30 |
| Locke's Forgotten Reflection | 31 |
| The Exaggeration of the 'Blank Slate' | 32 |
| A Reinterpretation of Berkeley | 33 |

Contents

| | | |
|-----------|--|----|
| | Hume's Deconstruction of Perceptual Relations | 34 |
| | Bentham and Vico — Pioneers of Conceptual Analysis | 36 |
| | Kant's 'Transcendental Enterprise' | 38 |
| | A Re-assessment of Causality | 41 |
| | New Fuel for Instrumentalism | 42 |
| | Hypotheses and Fictions | 45 |
| | The Foundation of Language Analysis | 46 |
| | Conclusion | 48 |
| Chapter 3 | Piaget's Constructivist Theory of Knowing | 53 |
| | The Biological Premise | 54 |
| | Active Construction | 56 |
| | Beginnings | 57 |
| | The Construction of Experiential Reality | 58 |
| | Individual Identity | 60 |
| | Assimilation | 62 |
| | From Reflexes to Scheme Theory | 64 |
| | Accommodation | 65 |
| | The Concept of Equilibration | 67 |
| | Learning | 68 |
| | Different Types of Abstraction | 69 |
| | Stages of Development | 71 |
| | The Observer and the Observed | 72 |
| | Experience and Reality | 73 |
| | Conclusion | 74 |
| Chapter 4 | The Construction of Concepts | 76 |
| | Analysis of Operations | 79 |
| | The Concept of Change | 80 |
| | The Concept of Motion | 82 |
| | Generating Individual Identity | 84 |
| | Space and Time | 86 |
| | Conclusion | 87 |
| Chapter 5 | Reflection and Abstraction | 89 |
| | Reflection | 90 |
| | Abstraction | 91 |
| | Generalization | 92 |
| | The Notion of Re-presentation | 93 |
| | Re-presenting Past Experiences | 94 |
| | Recognition | 95 |
| | The Need of an Agent | 96 |

| | | |
|-----------|---|-----|
| | Meaning as Re-presentation | 98 |
| | The Power of Symbols | 99 |
| | Piaget's Theory of Abstraction | 100 |
| | Form and Content | 101 |
| | Four Kinds of Abstraction | 103 |
| | The Question of Awareness | 105 |
| | Operational Awareness | 108 |
| | Conclusion | 109 |
| | Philosophical Postscript | 110 |
| Chapter 6 | Constructing Agents: The Self and Others | 113 |
| | The Illusion of Encoded Information | 115 |
| | The Reality of Experience | 116 |
| | Analysis of Empirical Construction | 118 |
| | The Question of Objectivity | 119 |
| | Corroboration by Others | 120 |
| | The Elusive Self | 121 |
| | The Notion of Environment | 123 |
| | The Perceived Self | 124 |
| | Sensory Clues | 125 |
| | Reflected Images | 126 |
| | The Social Self | 126 |
| | Conclusion | 128 |
| Chapter 7 | On Language, Meaning, and Communication | 129 |
| | The Semantic Basis | 130 |
| | Language Games | 133 |
| | The Construction of Meaning | 134 |
| | Language and Reality | 136 |
| | Theory of Communication | 138 |
| | How We May Come to Use Language | 139 |
| | To Understand Understanding | 141 |
| | Why Communication? Why Language? | 143 |
| Chapter 8 | The Cybernetic Connection | 146 |
| | Declaration of the American Society for Cybernetics | 146 |
| | Feedback, Induction, and Epistemology | 150 |
| | A Learning Mechanism | 152 |
| | Cognitive Development | 153 |
| | The Inductive Basis of Instrumental Learning | 153 |
| | Negative Feedback as 'Information' | 155 |
| | The Nature of Hypothetical Models | 157 |

Contents

| | | |
|------------|--|-----|
| Chapter 9 | Units, Plurality and Number | 160 |
| | An Elusive Definition | 160 |
| | Things and Units | 163 |
| | Conception Rather than Perception | 164 |
| | The Attentional Model | 167 |
| | An Iteration of Pulses | 168 |
| | The Genesis of Plurality | 170 |
| | The Abstract Concept of Number | 171 |
| | The ‘Pointing Power’ of Symbols | 173 |
| | Mathematical Certainty | 174 |
| Chapter 10 | To Encourage Students’ Conceptual Constructing | 176 |
| | What Is Our Goal? | 176 |
| | Teaching Rather than Training | 178 |
| | Environmental Stimuli | 179 |
| | Reinforcement | 179 |
| | The Deceptive Character of Language | 181 |
| | The Orienting Function | 183 |
| | Perceptual Materials | 184 |
| | A Geometric Point | 185 |
| | The Need to Infer Students’ Thinking | 186 |
| | Help Rather than Instruction | 188 |
| | Fostering Reflection | 190 |
| | The Secret of ‘Social’ Interaction | 191 |
| | A Final Point | 192 |
| | <i>References</i> | 193 |
| | <i>Index of Names</i> | 205 |
| | <i>Subject Index</i> | 209 |
