CONTENTS

PREFACE xi

I ENVIRONMENTAL SOIL CHEMISTRY: AN OVERVIEW

Evolution of Soil Chemistry 2
The Modern Environmental Movement 3
Contaminants in Waters and Soils 4
Case Study of Pollution of Soils and Waters 11
Soil Decontamination 19
Suggested Reading 22

2 INORGANIC SOIL COMPONENTS

Introduction 23
Pauling's Rules 25
Primary Soil Minerals 30
Secondary Soil Minerals 31
Specific Surface of Soil Minerals 41
Surface Charge of Soil Minerals 43
Identification of Minerals by X-Ray Diffraction Analyses 47
Use of Clay Minerals to Retain Organic Contaminants 48
Suggested Reading 51

3 CHEMISTRY OF SOIL ORGANIC MATTER

- Introduction 53
- Effects of Soil Formation Factors on SOM Contents 55
- Composition of SOM 57
- Fractionation of SOM 63
- SOM Structure 65
- Functional Groups and Charge Characteristics 67
- Humic Substance–Metal Interactions 69
- SOM–Clay Complexes 77
- Retention of Pesticides and Other Organic Substances
by Humic Substances 78
- Suggested Reading 79

4 SOIL SOLUTION–SOLID PHASE EQUILIBRIA

- Introduction 81
- Measurement of the Soil Solution 82
- Speciation of the Soil Solution 84
- Ion Activity and Activity Coefficients 90
- Dissolution and Solubility Processes 92
- Suggested Reading 97

5 SORPTION PHENOMENA ON SOILS

- Introduction and Terminology 99
- Surface Functional Groups 100
- Surface Complexes 102
- Adsorption Isotherms 104
- Equilibrium-Based Adsorption Models 107
- Surface Precipitation 128
- Sorption of Metal Cations 130
- Sorption of Anions 131
- Points of Zero Charge 134
- Desorption 136
- Use of Spectroscopic and Microscopic Methods in Determining Mechanisms
for Sorption–Desorption Phenomena 138
- Suggested Reading 139

6 ION EXCHANGE PROCESSES

- Introduction 141
- Characteristics of Ion Exchange 142

Cation Exchange Equilibrium Constants and Selectivity Coefficients	143
Thermodynamics of Ion Exchange	147
Relationship between Thermodynamics and Kinetics of Ion Exchange	157
Suggested Reading	158

7 KINETICS OF SOIL CHEMICAL PROCESSES

Rate-Limiting Steps and Time Scales of Soil Chemical Reactions	159
Rate Laws	161
Determination of Reaction Order and Rate Constants	163
Kinetic Models	165
Kinetic Methodologies	169
Effect of Temperature on Reaction Rates	175
Kinetics of Important Soil Chemical Processes	176
Suggested Reading	185

8 REDOX CHEMISTRY OF SOILS

Oxidation–Reduction Reactions and Potentials	187
Eh vs pH and p_e vs pH Diagrams	191
Measurement and Use of Redox Potentials	195
Submerged Soils	196
Redox Reactions Involving Inorganic and Organic Pollutants	196
Suggested Reading	202

9 THE CHEMISTRY OF SOIL ACIDITY

Introduction	203
Historical Perspective of Soil Acidity	206
Solution Chemistry of Aluminum	207
Exchangeable and Nonexchangeable Aluminum	210
Soil Acidity	212
Liming Soils	216
Suggested Reading	216

10 THE CHEMISTRY OF SALINE AND SODIC SOILS

Introduction	219
Causes of Soil Salinity	220
Sources of Soluble Salts	221
Important Salinity and Sodicity Parameters	222
Classification and Reclamation of Saline and Sodic Soils	227

Effects of Soil Salinity and Sodicity on Soil Structural Properties	229
Effects of Soil Salinity on Plant Growth	230
Suggested Reading	232

APPENDIX A 233

APPENDIX B 236
