# PYRITE OXIDATION *and* ITS CONTROL

---

---

Solution Chemistry, Surface Chemistry,  
Acid Mine Drainage (AMD),  
Molecular Oxidation Mechanisms, Microbial Role,  
Kinetics, Control, Ameliorates and Limitations,  
Microencapsulation

**V. P. (Bill) Evangelou, Ph.D.**

Professor of Soil/Water Physical Chemistry  
University of Kentucky, Lexington

CRC Press

Boca Raton New York London Tokyo

## TABLE OF CONTENTS

INTRODUCTION.....	1
-------------------	---

### PART I

#### REVIEW OF BASIC CONCEPTS OF SURFACE CHEMISTRY AND CHEMISTRY AND CONTROL OF ACID DRAINAGE

##### CHAPTER 1

A REVIEW ON SOLUTION/MINERAL CHEMISTRY.....	7
1.1 Ion Activity versus Concentration.....	7
1.1.1 Solution pH.....	8
1.1.2 Mineral solubility.....	9
1.1.3 Ion pairing.....	10
1.1.4 Ionic strength and ion pairing.....	13
1.1.5 Specific conductance.....	15
1.2 Acidity/Alkalinity.....	20
1.2.1 Alkalinity speciation.....	22
1.2.2 Neutralization potential.....	24
1.2.3 Alkalinity contribution by $\text{CaCO}_3$ .....	25
1.3 Practical Implications.....	27

##### CHAPTER 2

ELECTROCHEMICAL AND PHYSICAL PROPERTIES OF GEOLOGIC MATERIAL.....	29
2.1 Introduction.....	29
2.2 Aluminosilicate Minerals.....	29
2.3 Metal-Oxides.....	30
2.4 Organic Matter.....	31
2.4.1 Chemistry of humic substances.....	31
2.5 Clay Mineral Surface Charge.....	32
2.5.1 Permanent structural charge.....	33
2.5.2 Variable charge.....	36
2.6 Reaction Among Humic Substances, Clays, and Metals.....	44
2.6.1 Mechanisms of complex formation.....	45
2.7 $\text{PZC}_{\text{pH}}$ and Potential Pyrite Oxidation Implications.....	48

##### CHAPTER 3

CHEMICAL AND PHYSICAL PROPERTIES OF MINE WASTE.....	53
3.1 Mine Waste.....	53
3.2 Chemical and Physical Properties.....	59
3.2.1 Mine 'waste' surface chemistry.....	63
3.2.2 Technique comparisons.....	65
3.2.3 Mine 'waste' solution chemistry.....	69

## CHAPTER 4

### ACID DRAINAGE PRODUCTION CHEMISTRY AND PREDICTION.....

		77
4.1	Pyrite Occurrence, Formation, Morphology and Chemistry.....	77
4.2	Transitional Metal-Pyrite Oxidation.....	82
	4.2.1 Effect of ferric hydroxide species on pyrite oxidation.....	83
	4.2.2 Galvanic effect on metal-disulfide oxidation.....	85
	4.2.3 Ferrolysis.....	86
4.3	Predicting Acid Drainage Potential.....	87
	4.3.1 Determination of potential acidity.....	87
	4.3.2 Acid-base accounting.....	88
	4.3.3 Simulated weathering techniques.....	88
	4.3.4 Computer simulation models.....	89

## CHAPTER 5

### ACID DRAINAGE CONTROL AND ITS LIMITATIONS.....

		95
5.1	Prevention Technologies.....	95
5.2	Alkaline Earth Carbonates.....	95
	5.2.1 Coating limitations.....	103
	5.2.2 Kinetic limitations.....	112
	5.2.3 Placement limitations.....	115
	5.2.4 Chemical equilibria limitations.....	117
	5.2.5 Anoxic limitations.....	121
5.3	Hydrologic Influences.....	126
5.4	Bactericides.....	127
5.5	Inundation.....	128
5.6	Alkaline Recharge Trenches.....	129
5.7	Wetland Systems.....	129
5.8	Organic Waste.....	130
5.9	Macroencapsulation.....	130
5.10	Microencapsulation.....	130

## PART II

### MOLECULAR CHEMISTRY OF PYRITE OXIDATION KINETICS AND PYRITE REDOX CHEMISTRY

## CHAPTER 6

### MECHANISMS AND KINETICS OF PYRITE OXIDATION.....

		137
6.1	Structural Chemistry.....	137
6.2	Reaction Progress Variables (RPV).....	138
6.3	Reaction Mechanisms.....	139
	6.3.1 Other mechanisms of pyrite oxidation.....	144
	6.3.2 Electrochemical mechanisms of pyrite oxidation.....	147

6.4	Pyrite Surface Functional Groups.....	148
6.4.1	Pyrite oxidation effects by iron-carbonate complexes.....	156
6.5	Kinetics of Pyrite Oxidation.....	159
6.5.1	Empirical pyrite oxidation rate laws.....	161
6.5.2	Application of pyrite oxidation kinetics.....	164
6.5.3	Shrinking core model kinetics.....	168
6.6	Effect of Anions on Oxidation of Fe <sup>2+</sup> .....	170

#### CHAPTER 7

PYRITE REDOX CHEMISTRY.....	173	
7.1	General Information on Research Approach.....	173
7.2	Pyrite Stability Diagrams.....	175
7.3	Eh Measurements.....	180

### PART III

#### ROLE OF BACTERIA ON PYRITE OXIDATION

#### CHAPTER 8

ROLE OF BACTERIA ON PYRITE OXIDATION.....	185	
8.1	Mechanisms of Bacterial Pyrite Oxidation.....	185
8.1.1	Direct metabolic oxidation.....	187
8.1.2	Indirect metabolic oxidation.....	188
8.2	Kinetics of Bacterially Mediated Oxidation of Fe <sup>2+</sup> .....	189
8.3	Michaelis-Menten Kinetics.....	193
8.3.1	Michaelis-Menten steady-state.....	196
8.3.2	Michaelis-Menten rapid equilibrium.....	197
8.4	Surface Catalyzed Oxidation.....	200
8.4.1	Competitive inhibition.....	200
8.4.2	Uncompetitive inhibition.....	202
8.4.3	Competitive/uncompetitive inhibition.....	204
8.4.4	Experimental data.....	205
8.5	Other Microbial Processes.....	211

### PART IV

#### ADVANCES ON PYRITE MICROENCAPSULATION TECHNOLOGIES

#### CHAPTER 9

PHOSPHATE INFLUENCE ON PYRITE OXIDATION.....	215	
9.1	A Review.....	215
9.2	Functional Prediction Technologies.....	216
9.3	Abatement Technologies.....	219
9.4	Microencapsulation.....	221
9.5	Mechanisms.....	223

9.6	Microencapsulation.....	223
9.6.1	H <sub>2</sub> O <sub>2</sub> .....	224
9.6.2	Phosphate.....	226
9.6.3	EDTA.....	228
9.6.4	Michaelis-Menten kinetics/application.....	229
9.6.5	Surface analysis.....	231
9.6.6	Effectiveness.....	235

## CHAPTER 10

PRELIMINARY DATA ON PYRITE MICROENCAPSULATION IN MINE WASTE.....		237
10.1	pH.....	237
10.2	Temperature.....	239
10.3	H <sub>2</sub> O <sub>2</sub> .....	240
10.4	Phosphate.....	242
10.5	Sodium Acetate (NaAC) Effect on Pyrite Oxidation.....	244
10.6	pH, Phosphate and H <sub>2</sub> O <sub>2</sub> .....	246
10.7	Coating Evaluation in Large Columns.....	249
10.8	Conclusions.....	257

## PART V SUMMARY

SUMMARY.....	261
REFERENCES.....	265
SUBJECT INDEX.....	287
