

# **Introductory Digital Image Processing A Remote Sensing Perspective**

**Second Edition**

**John R. Jensen**

Prentice Hall

Upper Saddle River, New Jersey 07458

# Contents

Preface .....	ix
Acknowledgments .....	xi
<b>Chapter 1—Introduction to Digital Image Processing of Remotely Sensed Data .....</b>	<b>1</b>
The Remote Sensing Process .....	2
Statement of the Problem .....	2
Identification of In Situ and Remote Sensing Data Requirements .....	2
Remote Sensing Data Collection .....	3
Remote Sensing Data Analysis .....	8
Information Presentation: The Interface of Remote Sensing, Cartography and GIS .....	11
An Earth Resource Analysis Perspective .....	11
Organization .....	12
References .....	12
<b>Chapter 2—Remote Sensing Data Acquisition Alternatives .....</b>	<b>17</b>
Analog Image Digitization .....	17
Optical-Mechanical Scanning .....	17
Video Digitization .....	20
Linear and Area Array Charge-coupled-device (CCD) Digitization .....	22
Remotely Sensed Data Already in a Digital Format .....	24
Multispectral Imaging Using Discrete Detectors and Scanning Mirrors .....	30
Linear Array Sensor Systems .....	49
Imaging Spectrometry Using Linear and Area Arrays .....	56
Proposed High Resolution Remote Sensing Systems .....	60
Digital Image Data Formats .....	60
Band Sequential (BSQ) Format .....	60
Band Interleaved by Line Format .....	61
Band Interleaved by Pixel Format .....	61
Run-length Encoding Format .....	61
References .....	62
<b>Chapter 3—Image Processing System Considerations .....</b>	<b>65</b>
Mainframe, Workstation, and Personal Computer Digital Image Processing .....	65
Important Image Processing Functions .....	66
Commercial and Publicly Available Digital Image Processing Systems .....	67
Image Processing System Characteristics .....	67
Number of Analysts and Mode of Operation .....	67
Central Processing Unit (CPU), Serial versus Parallel Processing, Arithmetic Coprocesor, and Random-access Memory (RAM) .....	67
Operating System and Compiler .....	71
Mass Storage .....	72
CRT Screen Display Resolution .....	72
CRT Screen Color Resolution .....	72

Digital Image Processing and the National Spatial Data Infrastructure .....	73
References .....	74
<b>Chapter 4—Initial Statistics Extraction .....</b>	<b>77</b>
The Histogram and Its Significance to Digital Image Processing of Remote Sensor Data .....	79
Univariate Descriptive Image Statistics .....	80
Multivariate Image Statistics .....	82
References .....	86
<b>Chapter 5—Initial Display Alternatives and Scientific Visualization .....</b>	<b>87</b>
The Problem .....	87
Black-and-White Hard-Copy Image Display .....	90
<i>Line Printer Brightness Maps</i> .....	90
<i>Line Plotter Brightness Maps</i> .....	92
Temporary Video Image Display .....	93
<i>Black and White and Color Brightness Maps</i> .....	93
Merging Different Types of Remotely Sensed Data for Effective Visual Display .....	100
<i>Band Substitution</i> .....	100
<i>Color Space Transformation and Substitution</i> .....	101
<i>Principal Component Substitution</i> .....	103
<i>Pixel by Pixel Addition of High-Frequency Information</i> .....	103
Transforming Video Displays to Hard-Copy Displays .....	103
References .....	104
<b>Chapter 6—Image Preprocessing: Radiometric and Geometric Correction .....</b>	<b>107</b>
Radiometric Correction of Remotely Sensed Data .....	107
<i>Correction for Sensor System Detector Error</i> .....	108
<i>Correction for Environmental Attenuation Error</i> .....	108
Geometric Correction of Remote Sensor Data .....	124
<i>Image-to-Map Geometric Rectification</i> .....	127
<i>Implementation</i> .....	130
References .....	135
<b>Chapter 7—Image Enhancement .....</b>	<b>139</b>
Image Reduction and Magnification .....	139
<i>Image Reduction</i> .....	139
<i>Image Magnification</i> .....	140
Transects .....	141
Contrast Enhancement .....	141
<i>Linear Contrast Enhancement</i> .....	145
<i>Nonlinear Contrast Enhancement</i> .....	150
Band Ratioing .....	152
Spatial Filtering to Enhance Low- and High-Frequency Detail and Edges .....	153
<i>Spatial Convolution Filtering</i> .....	154
<i>The Fourier Transform</i> .....	165
Special Transformations .....	172
<i>Principal Components Analysis</i> .....	172
<i>Vegetation Indexes</i> .....	179
<i>Texture Transformations</i> .....	187
References .....	192

<b>Chapter 8—Thematic Information Extraction: Image Classification</b> .....	<b>197</b>
Supervised Classification.....	199
<i>Land-cover Classification Scheme</i> .....	200
<i>Training Site Selection and Statistics Extraction</i> .....	205
<i>Selecting the Optimum Bands for Image Classification: Feature Selection</i> .....	208
<i>Select the Appropriate Classification Algorithm</i> .....	225
Unsupervised Classification.....	231
<i>Unsupervised Classification Using the Chain Method</i> .....	231
<i>Unsupervised Classification Using the ISODATA Method</i> .....	236
<i>Unsupervised Cluster Busting</i> .....	238
Fuzzy Classification.....	240
Incorporating Ancillary Data in the Classification Process.....	244
<i>Problems Associated Ancillary Data</i> .....	244
<i>Approaches to Incorporating Ancillary Data to Improve Remote Sensing Classification Maps</i> .....	244
Land-use Classification Map Accuracy Assessment.....	247
<i>Training versus Test Reference Information</i> .....	247
<i>Sample Size</i> .....	248
<i>Sampling Strategy</i> .....	249
<i>Evaluation of Error Matrices</i> .....	250
Lineage (Genealogy) of Maps and Databases Derived from Digital Image Processing.....	251
References.....	252
 <b>Chapter 9—Digital Change Detection</b> .....	 <b>257</b>
General Steps Required to Perform Change Detection.....	257
<i>Select an Appropriate Land-use/Land-cover Classification System</i> .....	257
<i>Remote Sensing System Considerations</i> .....	259
<i>Environmental Characteristics of Importance When Performing Change Detection</i> .....	260
<i>Selecting the Appropriate Change Detection Algorithm</i> .....	262
Summary.....	277
References.....	277
 <b>Chapter 10—Geographic Information Systems</b> .....	 <b>281</b>
Fundamental Geographic Information System Concepts.....	282
<i>Data Input (Encoding) to an Appropriate Data Structure</i> .....	282
<i>Data Management</i> .....	289
<i>Data Analysis and Cartographic Modeling</i> .....	289
<i>Data Output</i> .....	297
GIS Case Study: Predictive Modeling of Cattail and Waterlily Distribution in a South Carolina Reservoir.....	297
<i>L Lake Aquatic Macrophyte Environmental Constraint Criteria and Description of the Boolean Logic Model</i> .....	298
<i>Analysis</i> .....	303
Summary.....	303
References.....	303
