Table of contents

Preface	6
Acknowledgements	7
List of plates	9
1 Instruments and history	11
2 The Tychoonic school and its approach to instrumentation	16
3 John Flamsteed and the astronomy of the ‘Great Catalogue’	34
4 Dividing as a high art	66
5 The techniques of eighteenth-century positional astronomy	82
6 The achievements of eighteenth-century positional astronomy	98
7 The precision graduation of full circles	108
8 Dividing by machine	123
9 The London scientific instrument-making trade	138
10 The technical frontier; astronomical instruments and the cosmological framework	146
11 The archaeology of the graduated scale	153
Appendix 1: The practical operation of the dividing engine	158
Appendix 2: A Victorian ‘Garret Master’s’ dividing engine?	160
Appendix 3: The Radcliffe Equatorial Sector of 1775: John Bird’s last instrument	162
Notes and references	165
Select bibliography	205
Index	207
