Contents

Introduction	
<i>Philip D Jones, Raymond S Bradley and Jean Jouzel</i>	1

SECTION A: DENDROCLIMATOLOGY

Tree-Ring Variables as Proxy-Climate Indicators: Problems with Low-Frequency Signals	
<i>Keith R Briffa, Philip D Jones, Fritz H Schweingruber, Wibjörn Karlén and Stepan G. Shiyatov</i>	9
Tree-Ring Density Networks for Climate Reconstruction	
<i>Fritz H Schweingruber and Keith R Briffa</i>	43
Millennial and Near-Millennial Scale Dendroclimatic Studies in Northern North America	
<i>Gordon Jacoby, Rosanne D'Arrigo and Brian Luckman</i>	67
Reconciling the Glacial and Dendrochronological Records for the Last Millennium in the Canadian Rockies	
<i>Brian H Luckman</i>	85
Multimillennial Dendroclimatic Studies from the Western United States	
<i>Malcolm K Hughes and Lisa J Graumlich</i>	109
Large-Scale Climatic Influences on Baldcypress Tree Growth Across the Southeastern United States	
<i>David W Stahle and Malcolm K Cleaveland</i>	125
Inter-Decadal Climate Oscillations in the Tasmanian Sector of the Southern Hemisphere: Evidence from Tree Rings over the Past Three Millennia	
<i>Edward R Cook, Brendan M Buckley and Rosanne D D'Arrigo</i>	141
Interdecadal Climatic Variations in Millennial Temperature Reconstructions from Southern South America	
<i>Ricardo Villalba, José A Boninsegna, Antonio Lara, Tom T Veblen, Fidel A Roig, Juan-Carlos Aravena and Alberto Ripalta</i>	161

SECTION B: ICE CORES

- Frequency Analysis of an Annually Resolved, 700 Year Paleoclimate Record from the GISP2 Ice Core
James W C White David Gorodetzky, Edward R Cook and Lisa K Barlow 193
- Climate Reconstruction from Water Isotopes:
 What do we Learn from Isotopic Models?
Jean Jouzel, Randy Koster and Sylvie Joussaume 213
- Climate Changes in the Atlantic Sector of Antarctica Over the Past 500 Years from Ice-Core and Other Evidence
David A Peel, Robert Mulvaney, Elizabeth C Pasteur and Carolyn Chenery 243
- Holocene Climate Changes Recorded in an East Antarctica Ice Core
Ellen Mosley-Thompson 263
- Climatic Changes for the Last 2000 Years Inferred from Ice Core evidence in Tropical Ice Cores
Lonnie G Thompson 281
- Inter-Comparison of Ice Core $\delta^{18}\text{O}$ and Precipitation Records from Sites in Canada and Greenland over the Last 3500 Years and over the Last Few Centuries in Detail Using EOF Techniques
David A Fisher, Roy M Koerner, Karl Kuivinen, Henrik B Clausen, Sigfus J Johnsen, Jorgen-Peter Steffensen, Niels Gundestrup and Claus U Hammer 297

SECTION C: CORALS

- Coral Records of Climate Change: Understanding Past Variability in the Tropical Ocean-Atmosphere
Julia Cole 331
- The Potential of Massive Corals for the Study of High-Resolution Climate Variation in the Past Millennium
Janice M Lough, David J Barnes and Ray B Taylor 355
- Eastern Pacific Corals Monitor El Niño/Southern Oscillation, Precipitation, and Sea Surface Temperature Variability Over the Past 3 Centuries
Robert B Dunbar, Braddock K Linsley and Gerard M Wellington 373

SECTION D: HISTORICAL EVIDENCE

- Reconstructions of Past Climate from Historical Sources
in the Czech Lands
Rudolf Brázdil 409
- The Analysis of Two Bi-Millennial Series: Tiber and Po River Floods
Dario Camuffo and Silvia Enzi 433

SECTION E: VARVED SEDIMENTS

- High Resolution Lacustrine Sediments and their Potential
for Paleoclimatic Reconstruction
Bernd Zolitschka 453
- Varved Sediment Records of Recent Seasonal to Millennial-Scale
Environmental Variability
Jonathan T Overpeck 479

SECTION F: FORCING FACTORS

- Intercomparisons of Proxies for Past Solar Variability
Jürg Beer, Werner Mende, Rita Stellmacher and Oran R White 501
- Reconstructions of Past Solar Variability
Judith Lean 519
- The Volcanic Record in Ice Cores for the Past 2000 Years
Alan Robock and Melissa P Free 533
- Changes in Trace Gas Concentrations During the Last 2000 Years
and More Generally, the Holocene
*Dominique Raynaud, Jean-Marc Barnola, Jérôme Chappellaz
and Patricia Martinerie* 547
- The Potential for Modeling the Effects of Different Forcing Factors
on Climate During the Past 2000 Years
David Rind 563

SECTION G: CONCLUSIONS

Temperature Changes on Long Time and Large Spatial Scales: Inferences from Instrumental and Proxy Records <i>Henry F Diaz</i>	585
Are There Optimum Sites for Global Paleotemperature Reconstruction? <i>Raymond S Bradley</i>	603
What Can the Instrumental Record Tell us About Longer Timescale Paleoclimatic Reconstructions? <i>Philip D Jones and Keith R Briffa</i>	625
Conclusions and Recommendations <i>Philip D Jones, Raymond S Bradley and Jean Jouzel</i>	645
