

Estuarine AND Coastal Modeling

Proceedings of the 4th International Conference

Sponsored by the

Coastal Zone Management Committee of the
Waterways, Ports, Coastal, and Ocean Division (WPOC)

and the

Computational Hydraulics Committee
of the Hydraulics Division

of the American Society of Civil Engineers (ASCE)

October 26-28, 1995

San Diego, California

Edited by Malcolm L. Spaulding and Ralph T. Cheng

SUB Göttingen **7**

Published by the
American Society of Civil Engineers
345 East 47th Street
New York, New York 10017-2398

CONTENTS

Session 1: 8:30 - 10:00

General Joint Session I

Ralph T. Cheng, Chairman

U.S. Geological Survey
Menlo Park, CA

Session 1.1

Welcome and Opening Remarks

Malcolm L. Spaulding
University of Rhode Island
Narragansett, RI

Ralph T. Cheng
U.S. Geological Survey
Menlo Park, CA

Session 1.2

Simulation of Three-dimensional, Non-hydrostatic
Free-surface Flows for Estuaries and Coastal Seas..... 1

V. Casulli
Department of Civil Engineering
Trento University, Trento, Italy,

G.S. Stelling
Delft Hydraulics
The Netherlands

Session 2A.3

Modelling Eddy Formation in Coastal Waters: A Comparison
between Model Capabilities..... 13

Duncan Galloway, Eric Wolanski and Brian King
Australian Institute of Marine Science
Townsville Qld 4810
Australia

Session 2A.4

A Quantitative Skill Assessment of Numerical Hydrodynamic Models of Coastal Currents 26

Timothy Keen
Naval Research Laboratory
Stennis Space Center, Mississippi

Scott Glenn
Rutgers University
New Brunswick, NJ

Session 2B.4

Investigation into the Possibilities of Using Bristol Channel Models for Tidal Predictions..... 41

M. Amin and R.A. Flather
Proudman Oceanographic Laboratory
Merseyside L43 7RA, UK

Session 3A.2

Nested Three-Dimensional Hydrodynamic Modeling of the Delaware Estuary..... 53

John S. Ramsey, Robert P. Hamilton Jr.
Aubrey Consulting, Inc.
Cataumet, MA

David G. Aubrey
Woods Hole Oceanographic Institution
Woods Hole, MA

Session 3A.3

Numerical Simulation of Temperature in the New York Bight..... 66

S. Rao Vemulakonda
U.S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Session 3A.4

- Storm Surge Frequency Computations for Long Island, NY:
A Comparison of Methodologies 80

Norman W. Scheffner and H. Lee Butler
U.S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Session 3B.2

- Salt Transport Characteristics of Pak Phanang Estuary 92

Somboon Pornpinatepong
Prince of Songkla University
Songkhla, Thailand

Malcolm L. Spaulding
University of Rhode Island
Narragansett, RI

Session 3B.4

- Effect of Divergent Flow on Mass Conservation in Eulerian-
Lagrangian Transport Schemes..... 106

Ling Tang and E. Eric Adams
Massachusetts Institute of Technology
Cambridge, MA

Session 4A.1

- Modeling Changing Freshwater Delivery to
Apalachicola Bay, FL 116

W.K. Jones and Wenrui Huang
Northwest Florida Water Management District
Havana, FL

Session 4A.2

- Anticyclonic Upper Layer Residual Circulation and Estuarine
Circulation in Osaka Bay 128

K. Nakatsuji
Osaka University, Osaka, Japan

T. Fujiwara
Kyoto University, Kyoto, Japan

Session 4A.4

The Influence of Turbulence Closure Strategy on Numerical
Modeling of Shallow Water Tides 143

Roger Grenier
North Carolina State University
Raleigh, NC

Rick Luettich
University of North Carolina at Chapel Hill
Morehead City, NC

Session 4B.1

Simulations of the Maine Coastal Current 156

Monica J. Holboke and Daniel R. Lynch
Dartmouth College
Hanover, NH

Session 4B.2

Development of a Large-Scale Tidal Circulation Model for the
Mediterranean, Adriatic and Aegean Seas 168

D.J. Mark, N.W. Scheffner
U.S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Session 4B.4

*Simulating the Transport of an Algae Bloom off the West Coast
of Vancouver Island* 180

M.G.G. Foreman, J.F.R. Gower, R.E. Thomson, J.Y. Cherniawsky
Institute of Ocean Sciences
P.O. Box 600
Sidney, B.C. V8L 4B2

Session P.2

Animation Techniques for Visualizing Coastal Flow Dynamics 192

Brian King, Patrick Collins, Duncan Galloway and Eric Wolanski
Australian Institute of Marine Science
Townsville 4810, Australia

Session P.3

Field Data Collection and Analysis for Verification of Estuarine Models	204
--	-----

W.H. McAnally, T.C. Pratt, G. J. Stevens, T.M. Parchure

U.S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Session P.7

Hydraulic and Sediment Models for Design of Restoration of Former Tidal Marshland.....	215
---	-----

Guang-dou Hu, M. L. Johnson and R. B. Krone
University of California
Davis, CA

Session P.9

Significance of Lateral Elevation Gradients in Tidally Affected Tributaries	229
--	-----

Frederick E. Schuepfer, Guy A. Apicella
Lawler, Matusky & Skelly Engineers
Pearl River, NY

Vincent J. DeSantis
New York City Department of Environmental Protection
Corona, NY

Session 5.2

Modeling the Periodic Stratification and Gravitational Circulation in San Francisco Bay, California.....	240
---	-----

Ralph T. Cheng
U.S. Geological Survey
Menlo Park, CA

V. Casulli
Department of Civil Engineering
Trento University
Trento, Italy

Session 6A.1

Can Numerical Estuarine Models be Driven at the Estuary Mouth 255

B.H. Johnson, H. V. Wang, and K.W. Kim
U.S. Army Corps of Engineers
Waterways Experiment Station, Vicksburg, MS

Session 6A.2

Optimized Boundary Conditions for Coastal Modeling 268

I. Shulman
The University of Southern Mississippi
Stennis Space Center, MS

James K. Lewis
Ocean Physics Research & Development
Long Beach, MS

Session 6A.3

Application of Vertical Turbulence Closure Schemes in the Chesapeake Bay Circulation Model - A Comparative Study 288

Harry V. Wang
U. S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Raymond S. Chapman
Ray Chapman & Associates
Vicksburg, MS

Session 6A.4

Numerical Simulation of Internal Kelvin Waves with Z-level and Sigma Level Models 29

David J. Schwab, Dmitry V. Beletsky and William P. O'Connor
Great Lakes Environmental Research Laboratory
Ann Arbor, MI

David E. Dietrich
Mississippi State University
Stennis Space Center, MS

Session 6B.1

Sediment and Contaminant Transport in Green Bay 313

Zenitha Chroner, Mary Cardenas, James Lick, and Wilbert Lick
University of California
Santa Barbara, CA

Session 6B.2

Application of A Coupled 3-D Hydrodynamics-Sediment-
Water Quality Model 325

Xinjian Chen and Y. Peter Sheng
University of Florida
Gainesville, FL

Session 6B.3

Multi-Dimensional Modeling of Water Quality Using the Finite
Element Method 340

Ian P. King and John F. DeGeorge
University of California
Davis, CA

Session 6B.4

Application of the Model SPECIES to Kaneohe Bay, Oahu,
Hawaii 355

Clifford J. Hearn
ADFA Campus of University of New South Wales
Canberra, ACT 2600, Australia

Session 7A.1

High-Resolution, Short-Term Lake Forecasts for Lake Erie 367

John G.W. Kelley, David J. S. Welsh, Keith W. Bedford,
Jay S. Hobgood
Ohio State University
Columbus, OH

David J. Schwab
NOAA
Ann Arbor, MI

Session 7A.2

Hindcast Simulations of Ocean Currents in Norwegian Coastal Waters; Part 1:	379
Model Set Up and Sensitivity Tests and Part 2: Summary of the Main Results	

Harald Engedahl and Eivind A. Martinsen
Norwegian Meteorological Institute
Oslo, Norway

Session 7B.1

Numerical Modeling of Turbidity Currents	404
--	-----

Scott Bradford and Nikolaos Katopodes
The University of Michigan
Ann Arbor, MI

Session 8A.1

Optimal Fitting of a Model to Observations of Sediment Concentration in the Irish Sea	416
---	-----

John N. Aldridge
Ministry of Agriculture Fisheries & Food
Suffolk, England

Session 8A.2

An Evaluation of Tidal Predictions in the Yellow and East China Seas	429
--	-----

C. A. Blain
Naval Research Laboratory
Stennis Space Center, MS

Session 8A.3

Southern Boundary Experimental Forecasts with the NOAA East Coast Ocean Model	442
---	-----

Richard A. Schmalz, Jr.
NOAA
Silver Spring, MD

Session 8B.2

Shear Dispersion in the Benthic Boundary Layer 454

C. G. Hannah
Oceandyne Environmental Consultants
Bedford, N.S., Canada

J.W. Loder and Y. Shen
Bedford Institute of Oceanography
Dartmouth, N.S., Canada

Session 8B.3

Sediment Transport in a Thermally Stratified Bay 466

Kai-Ping Wang, Zenitha Chroner, and Wilbert Lick
University of California
Santa Barbara, CA

Session 8B.4

3-D Numerical Modeling of Cohesive Sediments 478

Scott Yost and Nikolaos Katopodes
The University of Michigan
Ann Arbor, MI

Session P.15

Applied of Artificial Neural Networks to the Sacramento–
San Joaquin Delta 490

Nicky Sandhu and Ralph Finch
California Department of Water Resources
Sacramento, CA

Session P.17

Hydrodynamic Model and Sensitivity Analysis for
San Juan Bay, Puerto Rico..... 505

Lisa J. Wolf and Gavin Gong
ENSR Consulting and Engineering
Acton, MA

Session P.18

The Role of Circulation Patterns on the Simulation of
Constituent Transport in San Juan Bay, Puerto Rico..... 518

Gavin Gong and James Bowen
ENSR Consulting and Engineering
Acton, MA

Session P.22

Numerical Modeling on the Ofunato Bay Ecosystem
Including the Oyster Farming..... 530

Tomohiko Terasawa, Kisaburo Nakata, and Koichi Taguchi
National Institute for Resources and Environment
Tsukuba, Japan

Session P.24

Evaluation of The Nitrogen Cycle in a Tidal Flat 542

Kyoko Hata, Iwao Oshima, and Takeaki Kuramoto
Shin-nippon Meteorological and Oceanographical
Consultant Co., Ltd.
Setagaya, Tokyo, Japan

Kisaburo Nakata
National Institute for Resources and Environment
Tsukuba, Japan

Session P.26

WQMAP in a Windows Environment 555

Daniel Mendelsohn, Eoin Howlett, and J. Craig Swanson
Applied Science Associates, Inc
Narragansett, RI

Session P.27

BAYMAP: A Simplified Embayment Flushing and Transport
Model System..... 570

J. Craig Swanson and Daniel L. Mendelsohn
Applied Science Associates, Inc
Narragansett, RI

Session P.28

Prediction of Storm Induced Flows in Great Lake Estuarine
Inlets 583

James H. Riley and William L. Wood
Purdue University
West Lafayette, IN

Session 9A.1

Application of Circulation and Sediment Transport Modeling
within San Diego Bay 596

Thomas L. Johnson and Claudio Fassardi
Coastal and Marine Technology
San Marcos, CA

Session 9B.1

New Jersey Nearshore Hypoxia During the Summer 1976..... 608

Ross W. Hall and Mark S. Dortch
U.S. Army Corps of Engineers
Waterways Experiment Station
Vicksburg, MS

Session 9B.2

Three-Dimensional Modeling of Wind-Driven Upwelling
of Anoxic Bottom Water 'A-oshio' in Tokyo Bay 618

K. Nakatsuji, K. Muraoka
Osaka University
Osaka, Japan

J.S. Yoon
Inje University
Pusan City, Korea

Session 9B.3

Coastal Ocean Model Performance in Eastern Australia..... 632

William L. Peirson
University of New South Wales
Australia

Ian P. King
University of California
Davis, CA

Session 9B.4

Modeling the Effect of Reduced Nitrogen Loading on
Water Quality 644

Y. Peter Sheng, Eduardo A. Yassuda and Changlu Yang
University of Florida
Gainesville, FL

Session 10A.1

Flushing and Recharge of Inlet Channel for an Ephemeral
Coastal River 659

Howard H. Chang
San Diego State University
San Diego, CA

Daniel Pearson
Southern California Edison Company
Rosemead, CA

Session 10A.2

Sediment Transport Mechanism over Rippled Sand Beds 669

S.G. Sajjadi
University of Salford
Salford, UK

J.N. Aldridge
MAFF, Fisheries Laboratory
Suffolk, UK

D. J. Nicholas
Atlas Centre
Rutherford Appleton Laboratory
Oxon, UK

Session 10A.4

Hydrodynamic Modeling for Assessing Engineering
Alternatives for Elevating the Kennedy Causeway,
Corpus Christi, Texas..... 681

Cheryl A. Brown, Nicholas C. Kraus
Texas A&M University
Corpus Christi, TX

Adele Militello
Florida Institute of Technology
Melbourne, FL

Session 10B.1

The Role of Macroflocs in Estuarine Sediment Dynamics
and its Numerical Modeling..... 695

A. Malcherek and W. Zielke
Institut für Strömungsmechanik
Hannover, Germany

Session 10B.2

Three-Dimensional Tidal Currents and Water Quality in
Stratified Omura Bay..... 707

Tadashi Fukumoto, Akihida Tada
Technical Research Institute
Kanagawa, Japan

Takehiro Nakamura and Hiroyoshi Togashi
Nagasaki University
Nagasaki, Japan

Subject Index..... 723

Author Index..... 727
