TABLE OF CONTENTS

<i>PREFACE</i>	vii
<i>INTRODUCTION</i>	ix
<i>PART I - MELT AND MAGMAS: PROPERTIES AND SEGREGATION</i>	
Application of information theory to the formation of granitic rocks N. Petford, J.D. Clemens and J.L. Vigneresse	3
Rheological properties of granitic magmas in their crystallization range B. Scaillet, F. Holtz and M. Pichavant	11
Wetting angles, equilibrium melt geometry, and the permeability threshold of partially molten crustal protoliths D. Laporte, C. Rapaille and A. Provost	31
Magmatic fracturing and small-scale melt segregation during pluton emplacement: evidence from the Adamello massif (Italy) B.E. John and H. Stünitz	55
Rheological aspects of magma transport inferred from rock structures C. Fernández, A. Castro, J.D. De La Rosa and I. Moreno-Ventas	75
<i>PART II - FABRICS IN GRANITE</i>	
Granite is never isotropic: an introduction to AMS studies of granitic rocks J.L. Bouchez	95
Homogeneity of granite fabrics at the metre and dekametre scales Ph. Olivier, M. de Saint-Blanquat, G. Gleizes and D. Leblanc	113
Analogue 3D simple-shear experiments of magmatic biotite subfabrics L. Arbaret, H. Diot, J.L. Bouchez, P. Lespinasse and M. de Saint-Blanquat	129

3D biotite shape fabric experiments under simple shear strain A. Fernandez and J. Fernández-Catuxo	145
Perpendicular linear fabrics in granite: markers of combined simple shear and pure shear flows ? K. Schulmann, J. Jezek and Z. Venera	159
Rigid particles in simple shear flow: is their preferred orientation periodic or steady-state ? B. Ildefonse, L. Arbaret and H. Diot	177
<i>PART III - EMPLACEMENT OF GRANITE PLUTONS : CASE STUDIES</i>	
Syntectonic granites and the principle of effective stress: a general solution to the space problem ? D.H.W. Hutton	189
Granite pluton geometry and emplacement mode inferred from combined fabric and gravity data L. Améglio, J.L. Vigneresse and J.L. Bouchez	199
The Los Pedroches Batholith (Southern Spain): polyphase interplay between shear zones in transtension and setting of granites A. Aranguren, F. Larrea, M. Carracedo, J. Cuevas and J.M. Tubía	215
Development of magmatic to solid-state fabrics during syntectonic emplacement of the Mono Creek granite, Sierra Nevada Batholith M. de Saint-Blanquat and B. Tikoff	231
Drainage and emplacement of magmas along an inclined transcurrent shear zone: petrophysical evidence from a granite-charnockite pluton (Rahama, Nigeria) E. Ferré, G. Gleizes, M. T. Djouadi, J.L. Bouchez and F.X.O. Ugodulunwa	253
Transcurrent shear zones and magma emplacement in Neoproterozoic belts of Brazil A. Vauchez, S. Pacheco Neves and A. Tommasi	275
Oblique diapirism of the Yakushima granite in the Ryukyu arc, Japan R. Anma	295
Experimental pluton shapes and tracks above subduction zones R. Anma and D. Sokoutis	319
<i>BIBLIOGRAPHY</i>	335
<i>SUBJECT INDEX</i>	357
