Computational Mechanics Publications  
Southampton Boston

# CONTENTS

## Section 1: Shallow Water Models

- Numerical modelling of free-surface flows. Devising strategies for parallelism. 3  
*J.-M. Hervouet, J.-M. Janin & F. Marcos*
- Numerical modelling of wind-induced circulation in the Gulf of Thermaikos using a non-orthogonal boundary-fitted coordinate system 13  
*R.W. Barber, L.J. Scott, C.K. Malkopoulos & G.K. Malkopoulos*
- Simulation of coastal and estuarine hydrodynamics using high-resolution finite-volume technique on quadtree Cartesian mesh 23  
*R.V. Pearson, D.M. Causon & C.G. Mingham*
- Mathematical modelling of longshore load transport near Latvian harbour Ventspils 33  
*U. Bethers & J. Semikovs*
- On high resolution finite volume modelling of discontinuous solutions of the shallow water equations 43  
*C.G. Mingham & D.M. Causon*
- Automatic calibration of currents in shallow water flow models 53  
*M.N.A. Mooij & M. Verlaan*
- Truncation-error-based vertical grids for shallow water models 63  
*A.B. Fortunato*
- ## Section 2: Tidal Simulation
- Tide and wave-induced changes at a coastal lagoon entrance 75  
*P. Holmes & S.P. Samarawickrama*
- A storm surge model for the coast of Iceland 85  
*G.G. Tomasson, K. Gislason & Th. Karlsson*
- A three-dimensional tidal model for Prince William Sound, Alaska 95  
*J. Wang, C.N.K. Mooers & V. Patrick*

Improved tidal modelling for digital elevation models <i>D.C. Hill, R.A. Flather, D. Mason, I.J. Davenport &amp; G.J. Robinson</i>	105
Forecasting tropical cyclones storm surges at Météo-France <i>P. Daniel</i>	119
Hydrodynamic modelling of water circulation in the Red Sea Basin <i>Y.R. Fares</i>	129
High-resolution frequency determination of tidal components in coastal currents <i>G. Rodriguez, F. Rubio Royo, G. Rodriguez</i>	139
 <b>Section 3: Estuarine Problems</b>	
Field application of a numerical model for river mouth topography change <i>H. Tanaka, N. Kirwahara, K. Sato &amp; N. Shuto</i>	151
Modelling of the Rhine region of freshwater influence <i>M. Verlaan &amp; J.J. Leendertse</i>	161
 <b>Section 4: Pollutant Transport and Dispersion</b>	
Numerical simulation of coastal pollution in the Thermaikos Gulf <i>P. Anagnostopoulos, H. Mpimpas &amp; J. Ganoulis</i>	173
On high resolution finite volume modelling of the solute transport equation with high spatial gradients <i>C.G. Mingham &amp; D.M. Causon</i>	183
Measurements of litter and waste pollution in the Spanish coast during the Coastwatch Project <i>E. Peris, M.C. Millán, M.G. Martín &amp; C.R. Sánchez-Carratalá</i>	193
Oil spills in the Venetian Lagoon: an analysis of risk management <i>A. Zitelli, F. Cinquepalmi, C. Benedetti, A. Campagnol &amp; A. Bergamasco</i>	203
A comparison of a family of Eulerian and semi-Lagrangian finite element methods for the advection-diffusion equation <i>F.X. Giraldo &amp; B. Neta</i>	217

## Section 5: Wave Propagation

- The variation of frictional resistance under long waves  
in cross-shore direction 233  
*H. Tanaka & A. Sana*
- Problems of wave disturbance in harbour basins. Study cases:  
Zarzis, Tunisia and Chipiona, Cadiz, Spain. 243  
*F. Negro-Valdecantos & O. Varela-Carnero*
- Nesting a nearshore wave model (SWAN) into an ocean wave model  
(WAM) with application to the southern North Sea 253  
*W. Luo & R. Flather*
- A numerical model to predict wave forces on permeable breakwaters 265  
*R. Silva & I.J. Losada*
- A wave-refraction model for irregular sea bottoms 275  
*J.J. Penas Lado*
- Influence of false waves in the determination of wave energy  
propagation near the coast 283  
*M.H. Giménez & C.R. Sánchez-Carratalá*
- Separation of incident and reflected spectra in wave flumes 293  
*R. Capitão & M. Mendes de Carvalho*
- Nonlinear random wave load effects on offshore structures response 303  
*Ž. Vuković & N. Kuspilić*
- Diffraction of wave spectra by two breakwaters at an angle 313  
*T. Zographou & C.D. Memos*

## Section 6 Harbours and Marinas

- Numerical simulation of tidal induced circulation  
and waves in harbours 325  
*K.M. Hu, C.G. Mingham & D.M. Causon*
- A numerical model for studying the motion of berthed ships  
in harbours 335  
*F. DiCastro, N. Drimer, M. Glozman, P. Harari, Y. Keren,  
M. Radomir, A. Sheremet, M. Stiassnie & J.A. Zwamborn*

ARTEMIS 3.0: a finite element model for predicting wave agitation in coastal areas and harbours including dissipation 343  
*D. Aelbrecht*

A coupled extreme wave prediction model from meteorological data 353  
*J. R. Acinas & G. Iglesias*

## **Section 7: Sediment Transport and Coastal Erosion**

Tidal sediment transport 367  
*B.A. O'Connor & J. Nicholson*

Effect of settling velocity variation on the modelling of suspended sediment transport 381  
*L. I. Portela*

A diffusion-based conceptual model of cross-shore transport 391  
*J. Nicholson & B.A. O'Connor*

A silt supply model for the Rotterdam harbour entrance 401  
*J.M. de Kok & A. van der Meulen*

An integrated computer assisted beach design system (CABD) 413  
*F.L. Martin, R. Medina & E.M. Gonzalez*

Morphodynamics and harbour impacts in Rias 423  
*J.J.Diez*

Morphodynamic modelling in the nearshore area 433  
*J.P. Sierra, I. Azuz, F. Rivero, A. Sánchez-Arcilla & A. Rodriguez*
