List of figures	ix	5.4 Northeastern Spitsbergen, Wilhelmøya and Hinlopenstretet	77
List of tables	xiii	5.5 Southwestern Nordaustlandet	80
List of photographs	xiii	5.6 Kong Karls Land (with S. R. A. Kelly)	83
Preface	xv	5.7 Barentsøya, Edgeøya and Tusenøyane	86
Acknowledgements	xvii	5.8 Hopen	91
Participants	ixx	5.9 Correlation of four exploratory wells: Edgeøya and Hopen	93
Conventions	xxi		
PART 1 Introduction			
CHAPTER 1 SVALBARD	3	CHAPTER 6 NORTHERN NORDAUSTLANDET	96
1.1 Geographical names	3	6.1 Early work	96
1.2 Topography and bathymetry	7	6.2 Stratal succession	96
1.3 The physical environment	8	6.3 Subjacent metamorphic complex	104
1.4 The biota	10	6.4 Late tectonic plutons	105
1.5 Political history	11	6.5 Minor igneous bodies	106
1.6 The Spitsbergen Treaty	11	6.6 Summary of isotopic ages	106
1.7 Settlements	13	6.7 Structure of Nordaustlandet	107
1.8 Official publications	13	6.8 The Lomonosov Ridge in relation to Nordaustlandet	108
CHAPTER 2 OUTLINE HISTORY OF GEOLOGICAL RESEARCH	16	CHAPTER 7 NORTHEASTERN SPITSBERGEN	110
2.1 Early exploration	16	7.1 Geological frame	110
2.2 1858 to 1920	16	7.2 Younger (cover) rocks	112
2.3 1920 to 1945	18	7.3 Post-Permian deformation	112
2.4 1946 to 1960	19	7.4 Ny Friesland plutons	112
2.5 1960 to 1975	20	7.5 The Hecla Hoek Complex: the continuing debate	113
2.6 1975 onwards	21	7.6 Hinlopenstretet Supergroup	116
CHAPTER 3 SVALBARD'S GEOLOGICAL FRAME	23	7.7 Lomfjorden Supergroup	118
3.1 The space frame: Svalbard's structural frame	23	7.8 Stubendorffbreen Supergroup: succession	121
3.2 The time frame	25	7.9 Stubendorffbreen Supergroup: genesis	125
3.3 The rock frame	29	7.10 The Hecla Hoek Complex: mid-Paleozoic structure and metamorphism	128
3.4 Tectonostratigraphic sequences	31	 	
3.5 Geotectonic interpretations	37	CHAPTER 8 NORTHWESTERN SPITSBERGEN	132
PART 2 Regional descriptions			
CHAPTER 4 THE CENTRAL BASIN	47	8.1 Cenozoic volcanic rocks of the Woodfjorden area	133
4.1 Geological frame	47	8.2 Mesozoic, Permian and Carboniferous cover	134
4.2 Van Mijenfjorden Group (Paleogene)	48	8.3 Liefde Bay Supergroup (Devonian)	135
4.3 Adventdalen Group (Cretaceous–Jurassic) (by S. R. A. Kelly)	52	8.4 The 'crystalline' rocks of Northwestern Spitsbergen	142
4.4 Kapp Toscana and Sassendalen Groups (Liassic–Triassic) (with I. Geddes)	59	8.5 Structure	145
4.5 Bünsow Land Supergroup (Permian–Carboniferous)	63	8.6 Offshore geology (with P.A. Doubleday)	152
4.6 Tempelfjorden Group (Permian) with I. Geddes & P.A. Doubleday	63	 	
4.7 Gipsdalen Group (Permian–Carboniferous) with I. Geddes & P. A. Doubleday	66	CHAPTER 9 CENTRAL WESTERN SPITSBERGEN	154
4.8 Billefjorden Group (Early Carboniferous) with I. Geddes & P. A. Doubleday	71	9.1 Paleogene strata	154
4.9 Structure and development of Central Basin	73	9.2 Mesozoic strata of Oscar II Land	158
CHAPTER 5 EASTERN SVALBARD PLATFORM	75	9.3 Late Paleozoic strata of Oscar II Land	159
5.1 Platform strata	75	9.4 Early Paleozoic rocks	162
5.2 Igneous rocks	76	9.5 Proterozoic strata of Oscar II Land	165
5.3 Submarine outcrops	76	9.6 Pre-Carboniferous rocks of Prins Karls Forland	166
		9.7 Structure of Oscar II Land (with P. A. Doubleday)	168
		9.8 Structure of Prins Karls Forland	171
		9.9 Structure of Forlandsundet Basin (with P. A. Doubleday)	175
		9.10 A tectonic interpretation of the West Spitsbergen Orogen: northern segment	177
		CHAPTER 10 SOUTHWESTERN AND SOUTHERN SPITSBERGEN	179
		10.1 Paleogene strata	180
		10.2 Mesozoic strata in southwest Sørkapp Land	182

10.3	Permian and Carboniferous strata of southern Spitsbergen	183	CHAPTER 16	DEVONIAN HISTORY	289
10.4	Devonian strata	187	16.1	Devonian time scale and correlation	289
10.5	Proterozoic strata of western Nordenskiöld Land	188	16.2	Devonian succession	291
10.6	Proterozoic strata of western Nathorst and northwestern Wedel Jarlsberg Lands	189	16.3	Devonian biotas	291
10.7	Early Paleozoic and Proterozoic strata of southwestern Wedel Jarlsberg Land	191	16.4	?Silurian and Devonian sedimentation	296
10.8	Early Paleozoic and Proterozoic strata of Sørkapp Land	197	16.5	Devonian tectonics	299
10.9	Pre-Devonian correlation through southwest Spitsbergen	199	16.6	The question of sinistral Paleozoic strike-slip faulting, transpression and transtension	303
10.10	Structure of western Nordenskiöld Land	200	16.7	Sequence of events through Devonian time	306
10.11	Structure of western Nathorst Land	201	16.8	A Lomonosov conjecture	309
10.12	Structure of Wedel Jarlsberg Land (with P. A. Doubleday)	201	CHAPTER 17	CARBONIFEROUS-PERMIAN HISTORY	310
10.13	Structure of Sørkapp Land (with P. A. Doubleday)	205	17.1	Early work	310
CHAPTER 11	SOUTHERN SVALBARD: BJØRNØYA AND SUBMARINE GEOLOGY	209	17.2	Stratigraphic frame: Bünsow Land Supergroup	312
11.1	Early work	210	17.3	Structural frame	314
11.2	Geologic frame of Bjørnøya	212	17.4	Carboniferous and Permian time scale	316
11.3	Triassic strata of Bjørnøya	212	17.5	Carboniferous-Permian sedimentary environments (by I. Geddes)	318
11.4	Late Paleozoic strata of Bjørnøya (with I. Geddes)	213	17.6	Carboniferous-Permian fossil record	324
11.5	Pre-Devonian strata of Bjørnøya	218	17.7	Carboniferous-Permian tectonic control of sedimentation (with I. Geddes)	328
11.6	Structural sequence of Bjørnøya	219	17.8	Carboniferous and Permian palaeogeology	335
11.7	Submarine outcrops	222	CHAPTER 18	TRIASSIC HISTORY	340
11.8	Submarine structure (with P. A. Doubleday)	222	18.1	Early work	340
PART 3	Historical Synthesis		18.2	Structural frame	343
CHAPTER 12	PRE-VENDIAN HISTORY	227	18.3	Triassic rock units	344
12.1	Precambrian time scales	229	18.4	Triassic time scale and international correlation (with I. Geddes)	350
12.2	Pre-Vendian rock successions	229	18.5	Triassic biotas	353
12.3	Pre-Vendian biotas (by N. J. Butterfield)	231	18.6	Sequence of Triassic environments (with I. Geddes)	356
12.4	Precambrian isotopic ages	235	18.7	Triassic regional palaeogeology	361
12.5	Tectonostratigraphic evidence for proto-basement	236	CHAPTER 19	JURASSIC-CRETACEOUS HISTORY	363
12.6	Pre-Vendian correlation	239	19.1	Early work	363
12.7	Palinspastic considerations	240	19.2	Jurassic-Cretaceous structural frame	365
CHAPTER 13	VENDIAN HISTORY	244	19.3	stratigraphic scheme	366
13.1	Vendian time scale and correlation	244	19.4	Jurassic-Cretaceous time scale and correlation (with S. R. A. Kelly)	368
13.2	Vendian successions and correlation in Svalbard	246	19.5	Jurassic-Cretaceous formations	372
13.3	Vendian biotas	248	19.6	Jurassic-Cretaceous biotas	378
13.4	Vendian environments	249	19.7	Jurassic-Cretaceous events in Svalbard events (with S. R. A. Kelly)	381
13.5	Vendian international correlation	252	19.8	Svalbard in a Jurassic-Cretaceous regional context	383
13.6	Vendian palinspastic discussion	254	CHAPTER 20	PALEOGENE HISTORY	388
CHAPTER 14	CAMBRIAN-ORDOVICIAN HISTORY	257	20.1	Early work	388
14.1	Cambrian-Ordovician time scale	260	20.2	Structural and stratigraphic frame	390
14.2	Cambrian-Ordovician biotas and correlation	260	20.3	Paleogene time scale and correlation	391
14.3	Cambrian-Ordovician sedimentary environments	264	20.4	Paleogene biotas of Svalbard	393
14.4	Cambrian-Ordovician tectonic environments	266	20.5	Paleogene sedimentation and tectonics	394
14.5	Cambrian-Ordovician terranes and palinspastics	268	20.6	Paleogene structures (with A. Challinor & P. A. Doubleday)	399
CHAPTER 15	SILURIAN HISTORY	272	20.7	Structural sequence	410
15.1	Silurian time	272	20.8	Regional tectonic sequence	413
15.2	Silurian supracrustal events: sedimentation and tectonics	275	20.9	Paleogene tectonosedimentary history	413
15.3	Silurian tectogenesis	275	CHAPTER 21	NEOGENE-QUATERNARY HISTORY	418
15.4	Silurian petrogenesis of crystalline rocks	280	21.1	Neogene-Quaternary time scale	418
15.5	Silurian terranes, provinces and palinspastics	284	21.2	Plate motions (by C. F. Stephens)	418
15.6	Sequence of Silurian (main Caledonian) events	288	21.3	Deep structure of Svalbard	421
			21.4	Neogene-Holocene volcanism and thermal springs (by C.F. Stephens)	423

21.5	Neogene and Pleistocene sedimentation (with C.F. Stephens)	426		
21.6	Neogene–Holocene uplift and erosion	427		
21.7	Glacial history of Svalbard: Neogene–Holocene (with C.F. Stephens)	429		
21.8	Pleistocene and Holocene surficial geology and geomorphic features	431		
21.9	Post-glacial sea-level and climatic changes	434		
CHAPTER 22	MODERN GLACIERS AND CLIMATE CHANGE (by E. K. Dowdeswell and J. A. Dowdeswell)	436		
22.1	Introduction	436		
22.2	Modern ice cover	436		
22.3	Geophysical characteristics and ice dynamics	438		
22.4	Ice–ocean interaction	442		
22.5	Late Holocene glacial events and chronology	443		
22.6	Glaciers and climatic change	444		
22.7	Summary and conclusions	445		
			PART 4	
			23 APPENDIX: ECONOMIC GEOLOGY	449
