Climatic Effects of Aerosols and Clouds

Springer

Published in association with
Praxis Publishing
Chichester, UK

Contents

Preface	v
1 Introduction	1
2 Tropospheric aerosols and their properties	3
2.1 Sulphate aerosols	7
2.2 Organic aerosols	17
2.3 Inventory of anthropogenic aerosol sources	22
2.4 Modelling aerosol properties	25
3 Climatic impact of tropospheric aerosols	36
3.1 Direct effect of tropospheric aerosols	37
3.2 Interaction between aerosols and clouds	55
3.3 Aerosol monitoring	67
3.4 Unsolved problems	68
4 Stratospheric aerosols and climate	75
4.1 Introduction	75
4.2 The Mount Pinatubo eruption	78
4.3 Climatic impact	91
4.3.1 Detection of volcanic climatic signal	91
4.3.2 Numerical modelling of volcanic climatic impact	101
4.4 Interaction of stratospheric aerosol and ozone	103
4.5 Conclusions	107
5 Cloud–radiation interaction	111
5.1 Introduction	111
5.2 Cirrus clouds	118
5.3 Lower tropospheric clouds. Cloud–radiation interaction	123
5.4 ‘Excess’ absorption by clouds	126

5.4.1	Introduction	126
5.4.2	Observational data	128
5.4.3	Effect of clouds on atmospheric absorption of solar radiation	128
5.4.4	Further discussion	133
5.4.5	Aerosol impact on atmospheric absorption of solar radiation	142
5.4.6	Conclusion	143
5.5	Cloud-radiative forcing due to satellite observations	143
5.6	Model-observations intercomparisons	158
5.7	An intercomparison of climate feedbacks	163
5.8	Verification of climate modelling results. The ARM Programme	165
5.9	Some improvements in parameterization of radiative processes	168
5.10	Parameterization of cloud cover dynamics	173
5.11	Simulation of tropical disturbances development	180
5.12	Variability of global hydrological cycle	182
6	Conclusion	185
	References	188
	Additional references	241
	Index	259
