RESTON, VIRGINIA 20191–4400

Contents

Thursday, November 4, 1999

Session 1: General Joint Session

No papers were submitted for this session.

Session 2A: Finite Volume and Adjoint Methods

Control of Estuarine Salinity Using the Adjoint Method 1
Michael Piasecki and Brett F. Sanders

An Unsteady Finite Volume Circulation Model 17
Matthew C. Ward

Session 2B: Predicting Impacts at Sensitive Sites

Modeling the Impacts of Dredged Material Placement in Upper Chesapeake Bay 34
Billy H. Johnson, Hans R. Moritz, Allen M. Teeter, Carl F. Cerco, and Harry V. Wang

A Multi-Size, Multi-Source Formulation for Determining Impacts of Sediments on Near-Shore Sensitive Sites 59
Panagiotis Velissariou, Vasilia Velissariou, Yong Guo, and Keith W. Bedford

Session 2C: Simulating Thermal Processes

Modeling Three-Dimensional, Thermohaline-Driven Circulation in the Arabian Gulf 74
Cheryl Ann Blain

A Numerical Simulation of the Japan/East Sea (JES) Seasonal Circulation 94
Peter C. Chu, Jian Lan, and Hilbert Strauhs

Effect of Heat Flux on Thermocline Formation 114
Joseph S. Helfand, David P. Podber, and Michael J. McCormick

Session 3A: Hydrodynamic Model Formulation

A Comparison of Two Three-Dimensional Shallow-Water Models Using Sigma-Coordinates and z-Coordinates in the Vertical Direction 130
M.D.J.P. Bijvelds, J.A.Th.M. Van Kester, and G.S. Stelling

Three-Dimensional Hydrostatic and Non-Hydrostatic Modeling of Seiching in a Rectangular Basin 148
XinJian Chen

A Three-Dimensional Non-Hydrostatic Model for Free Surface Flows: Development, Verification, and Limitations 162
H. Weilbeer and J.A. Jankowski

Session 3B: Sediment Transport Processes I

Developing a Capability to Forecast Coastal Ocean Optics: Minerogenic Scattering 178
Timothy R. Keen and Robert H. Stavn

A Large Domain Convection Diffusion Based Finite Element Transport Model 194
Norman W. Scheffner

Modeling Sand Bank Formation Around Tidal Headlands 209
Richard P. Signell and Courtney K. Harris

Session 3C: Models for Environmental Assessment

Proposed Third Crossing of Hampton Roads, James River, Virginia: Feature-Based Criteria for Evaluation of Model Study Results 223
J.D. Boon, A.Y. Kuo, H.V. Wang, and J.M. Brubaker

Application of VIMS HEM-3D to a Macro-Tidal Environment 238
Sung-Chan Kim, Jian Shen, Chang Shik Kim, and Albert Y. Kuo

Simulation of Tunnel Island and Bridge Piling Effects in a Tidal Estuary 250
Harry V. Wang and Sung-Chan Kim

Session 4A: Hydrodynamic Model

Monotonicity Preserving Model for Free-Surface Flow with Sharp Density Fronts 270
Scott F. Bradford and Nikolaos D. Katopodes

Generation of a Two-Dimensional Unstructured Mesh for the East Coast of South Carolina 290
Scott C. Hagen and Robert J. Bennett

Internal Characteristics of Two-Layer Stratified Flow Systems Under Wind Stress 304
Koji Kawasaki, Jong Sung Yoon, and Keiji Nakatsuji

The Mary River Estuary: A New Approach to Modeling of Marshes and Over-Bank Areas 316
Ian P. King and David K. Williams

Session 4B: Three-Dimensional Water Quality Simulations

Modeling Water Quality for Dredged Material Disposal 335
Mark Dortch, Beth Fleming, and Barry Bunch

A Framework for Integrated Modeling of Coupled Hydrodynamic–Sedimentary–Ecological Processes 350
Y. Peter Sheng

Session 4C: Waves and Wave-Induced Currents

Application of a Barotropic Hydrodynamic Model to Nearshore Wave-Induced Circulation 363
Mark Cobb and Cheryl Ann Blain

Circulation and Sediment Transport in the Vicinity of the Hudson Shelf Valley 380
Courtney K. Harris and Richard P. Signell

Inverse Flow Modelling of Waves and Currents in the Surf Zone 395
David H. Henderson, David Johnson, and Graham J.M. Copeland

Session 5A: Three-Dimensional Hydrodynamic Model Simulations I

Three-Dimensional Modeling of Temperature Stratification and Density-Driven Circulation in Lake Billy Chinook, Oregon 411
Zhaoqing Yang, Tarang Khangaonkar, Curtis DeGasperi, and Kevin Marshall

Session 5B: Simulating Shelf-Scale Processes I

Sources of Uncertainty for Oil Spill Simulations 426
Eric Anderson and Henry Rines

Session 5C: Plume Simulations

Topographic and Wind Influences on the Chesapeake Bay Outflow Plume and the Associated Fronts 443
Patrick C. Gallacher, Michael Schaferkotter, and Paul Martin

Modeling Surface Trapped River Plumes: A Sensitivity Study 452
Jason Hyatt and Richard P. Signell

Typical and Extreme Responses of Chesapeake Bay and Its Coastal Plume to Riverine Forcing 466
Jerry L. Miller, Patrick Gallacher, Michael Schaferkotter, and Paul Martin

Session 6: Hydrodynamics and GIS

High Performance Estuarine and Coastal Environmental Modeling: The CH3D Example 470
Justin R. Davis and Y. Peter Sheng

Use of Membrane Boundaries to Simulate Fixed and Floating Structures in GLLVHT 485
Venkat S. Kolluru, Edward M. Buchak, and Jian Wu

Using GIS as an Interface for Three-Dimensional Hydrodynamic Modeling 501
I. Morin, K. Hickey, and M. Greenblatt

Numerical Simulation of Wave Propagation in the Entrance of the Tagus Estuary 510
Filipa S.B.F. Oliveira

Intrusions of the Loop Current over the Mississippi Bight 526
Germana Peggion

The Use of GIS in Three-Dimensional Hydrodynamic Model Pre- and Post-Processing for Feature-Specific Applications 538
G. McAllister Sisson, John D. Boon, and Katherine L. Farnsworth

Three-Dimensional Curvilinear Modelling of Wind-Induced Flows Through the North Channel of the Irish Sea 549
Emma F. Young, John N. Aldridge, and Juan Brown

Thursday, November 4, 1999

Session 7: Overview of Papers in Session 12

No papers were submitted for this session.

Session 8A: Transport of Organisms

Development of a Long-Term Predictive Model of Water Quality in Tokyo Bay 564
Jun Sasaki and Masahiko Isobe

A Three-Dimensional Shear Dispersion Model Applied to Georges Bank 581
Zhigang Xu, Charles G. Hannah, and John W. Loder

Session 8B: Modeling Enclosed Bays

Hydrodynamic Modeling for the 1998 Lake Michigan Coastal Turbidity Plume Event 597
Dmitry Beletsky, David J. Schwab, Michael J. McCormick, Gerald S. Miller, James H. Saylor, and Paul J. Roebber

Numerical Modeling and Field Experiments of Wind-Induced Currents in Enclosed Bay 614
Tadashi Fukumoto and Takehiro Nakamura

An Isopycnic Model Study of the Black Sea 630
Gokay M. Karakas, Alec E. James, and Alaa M.A. Al-Barakati

Session J1-A: Development and Operation of Coastal Forecast Systems

The Coastal Marine Demonstration Project 646
L.J. Walstad, G. J. Szilagyi, F. Aikman, L.C. Breaker, F. Klein, J.S. D'Aleo, and J.T. McQueen

Session 9A: Three-Dimensional Hydrodynamic Modeling II

A Hydrodynamic Model Calibration Study of the Savannah River Estuary with an Examination of Factors Affecting Salinity Intrusion 663
Daniel L. Mendelsohn, Steven Peene, Eduardo Yassuda, and Steven Davie

The Gaspé Current and Cyclonic Motion over the Northwestern Gulf of St. Lawrence 686
Jinyu Sheng

Session 9B: Innovative Computational Techniques

Quadtree Grids for Dispersion and Inverse Flow Models 705
G.J.M. Copeland, R.D. Marchant, and A.G.L. Borthwick

A Parallel Finite Volume Scheme for Two Dimensional Hydrodynamic Flows 721
Prasada Rao and Scott A. Yost

Integrating High Performance Computing Strategies with Existing Finite Element Hydrodynamic Codes 738
Scott A. Yost and Prasada Rao

Session J1-B: Development and Operation of Coastal Forecast Systems

Lake Michigan Forecast System and the Prospects for a Sediment Transport Model 755
Yi-Fei Philip Chu, Keith W. Bedford, and David J.S. Welsh

The Tampa Bay Nowcast–Forecast System 765
Mark Vincent, David Burwell, and Mark Luther

Session 10A: Two-Dimensional Hydrodynamic Model Applications

Navigation Study for Matagorda Bay, Texas 781
David J. Mark, Dennis W. Webb, and Nicholas C. Kraus

Hydrodynamic Modeling of a Sea-Breeze Dominated Shallow Embayment, Baffin Bay, Texas 795
Adele Militello

Session 10B: Hydrodynamic Model Skill Assessments

Tidal Inlet Circulation: Observations, Model Skill, and Momentum Balances 811
James L. Hench and Richard A. Luettich, Jr.

Modeling of Tide-Induced Circulation near a Strait 827
Masahide Ishizuka, Keiji Nakatsuji, and Shuzo Nishida

Application of Quantitative Model: Data Calibration Measures to Assess Model Performance 843
Malcolm Spaulding, Craig Swanson, and Daniel Mendelsohn

Session J1-C: Development and Operation of Coastal Forecast Systems

Demonstration of a Nowcast–Forecast System for Galveston Bay 868
Richard A. Schmalz, Jr.

Skill Assessment Methods for NOS Forecast Systems 884
Kurt W. Hess and Thomas F. Gross

Coastal Wave Measurement and Forecast System: Preliminary Results and Model Selection 899
Michael S. Bruno, Kelly L. Rankin, and Thomas O. Herrington

Session 11A: Sediment Transport Processes II

Effects of Bed Coarsening on Sediment Transport 915
Craig Jones and Wilbert Lick

Session 11B: Data Assimilation and Model Skill

Mixing in a Small Tidal Estuarine Plume 931
M. Pritchard, D.A. Huntley, and T.J. O'Hare

Improving Coastal Model Predictions through Data Assimilation 947
J. Craig Swanson and Matthew C. Ward

Parameter Estimation for Subtidal Water Levels Using an Adjoint Variational Optimal Method 964
Aijun Zhang, Eugene Wei, and Bruce Parker

Session J1-D: Development and Operation of Coastal Forecast Systems

Development of the High-Resolution Data-Assimilating Numerical Model of the Monterey Bay 980
I. Shulman, C.-R. Wu, J.K. Lewis, J.D. Paduan, L.K. Rosenfeld, S.R. Ramp, M.S. Cook, J.C. Kindle, and D.-S. Ko

Session 12 (Posters): Environmental Aspects

Modeling Residence Times: Eulerian versus Lagrangian 995
David Burwell, Mark Vincent, Mark Luther, and Boris Galperin

Pearl River Estuary Pollution Project (PREPP): An Integrated Approach 1010
Jay-Chung Chen, Ophelia Lee, and Chan Wai Man

Implementation of Vertical Acceleration and Dispersion Terms in an Otherwise Hydrostatically Approximated Three-Dimensional Model 1019
John Eric Edinger and Venkat S. Kolluru

Modeling Hydrodynamic and Sediment Processes in Morro Bay 1035
Zhen-Gang Ji, Michael R. Morton, and John M. Hamrick

An Ocean Model Applied to the Chesapeake Bay Plume 1055
Paul J. Martin

Simulation of the Oil Trajectory and Fate of the Diamond Grace Spill in Tokyo Bay 1070
K. Okamoto

A Multi-Estuarine Model in Long Island Sound 1084
Frederick E. Schuepfer, Guy A. Apicella, and Robert O'Neill

Friday, November 5, 1999

Session 13A: Three-Dimensional Hydrodynamic Model Simulations III

Three-Dimensional Hydrodynamic Model of an Estuary in Nova Scotia 1100
Ken Hickey, Isabelle Morin, Marcia Greenblatt, and Gavin Gong

Modeling the Circulation in Penobscot Bay, Maine 1112
Huijie Xue, Yu Xu, David Brooks, Neal Pettigrew, and John Wallinga

A Three-Dimensional Modeling Study of the Estuarine System: An Application to the Satilla River 1128
Lianyuan Zheng and Changsheng Chen

Session 13B: Simulating Shelf-Scale Processes II

Spatial Decorrelation Scales in Coastal Regions: A Precursor to More Accurate Data Assimilation 1150
James K. Lewis, Alan F. Blumberg, and B. Nicholas Kim

Numerical Modeling Experiments of the East (Japan) Sea Circulation and Mesoscale Eddy Generation Based on POM-ES 1167
Young Jae Ro

Session 13C: Morphodynamic Modeling

Simulating Morphodynamical Processes on a Parallel System 1182
Hartmut Kapitza and Dieter P. Eppel

MORWIN: Collaborative Modeling of Coastal Morphodynamics 1192
Rainer Lehfeldt and Volker Barthel

An Improved Formulation for the Bed Shear Stress in Morphodynamic Simulations 1206
Andreas Malcherek

Session 14A: Three-Dimensional Hydrodynamic Model Simulations IV

Modeling Tidal Circulation in a Barrier-Island Estuary: Apalachicola Bay 1216
W. Huang, K. Jones, T.S. Wu, and H. Sun

A PC-Based Visualization System for Coastal Ocean and Atmospheric Modeling 1233
Hongqing Wang, Kai-Hon Lau, Wai-Man Chan, and Lai-Ah Wong

Session 14B: Two-Dimensional Water Quality Model Applications

Calibration Performance of a Two-Dimensional, Laterally-Averaged Eutrophication Model of a Partially Mixed Estuary 1244
James D. Bowen

Modelling the Humber Estuary Catchment and Coastal Zone 1259
Roger Proctor, Jason Holt, John Harris, Alan Tappin, and David Boorman

Development of a Waste Load Allocation Model for the Charleston Harbor Estuary. Part III: Project Application 1275
Eduardo A. Yassuda, Steven J. Peene, Steven R. Davie, Daniel L. Mendelsohn, and Tatsu Isaji
