

**NATIONALISM, INSTITUTIONAL SCIENCE
AND THE POLITICS OF KNOWLEDGE:**

**Ancient Indian Astronomy and Mathematics
in the Landscape of French Enlightenment Astronomy**

Dhruv Raina

Akademisk avhandling för filosofie doktorsexamen

Institutionen för vetenskapsteori, Göteborgs universitet

Fredagen 3 december 1999, kl.10

Sal S 214, Vetenskapsteori institutionen, Dicksongatan 12

TABLE OF CONTENTS

Table of Contents	i
Acknowledgements	v
Chapter 1	
Introduction	1
1.1 Situating Historiography within the Social Theory of Science	7
1.2 Is Post-colonial Theory of Science Ambushed at the Outset?	10
1.2.1 Postcolonial Hybridity and Hybrid Postcolonialism	15
1.2.2 History, Postcoloniality and Postcolonial Epistemology	19
1.3 The Construction of Enlightenment Historiography	23
1.3.1 The Theory of the Pre-Science of Historiography	26
1.3.2 The Enlightenment and the Identity of the History of Science	29
1.4 Enlightenment Historiography on the Sciences of India in Context	34
Chapter 2	
The Historical Astronomy of the Jesuit Scientists in India (1670-1770)	48
2.1 The Linkages between the Académie Royale and the Jesuit Scientists	51
2.2 The Jesuit Encounter with the non-West	62
2.3 Geodesy and Chronology in the Lettres of the Jesuits	66
2.3.1 The Historic Expedition of Pères Pons and Boudier to Jaipur	69
2.3.2 The Duchamp Manuscripts	76
2.4 The Political and Cognitive Horizon of the Lettres	80
2.5 Interpreting the Bible and Mapping the Earth	84

Chapter 3

	The Ethnography of Indian Astronomy and Le Gentil's Memoires and Voyages (1760-1787)	90
3.1	The Project of the Secular History of Science	92
3.2	Institutional Differentiation	95
3.3	The Proto-ethnography of the Astronomical Practices of India	105
3.3.1	The Phase of Enchantment with the Astronomy of Ancient India	107
3.3.2	The Proto-ethnographic Encounter with the Brahmin Astronomers of Pondicherry or the Absence of One	110
3.3.3	The Origins of the Zodiac: The Makings of a Priority Dispute	117
3.4	In the Transition Zone between Ethnography and History	120

Chapter 4

	The Ancient World in the Enlightenment History of Astronomy (1770-1800)	126
4.1	The Golden Age of French Mathematics and Astronomy	128
4.2	The Treatise on Indian and Oriental Astronomy	133
4.3	The Bailly-Voltaire Controversy on the Antediluvian Sources of Indian Astronomy	136
4.3.1	The riposte to Voltaire's Essai	140
4.3.2	The Theory of Scientific Discovery and the Origins of Science	141
4.3.3	The Chronology of Oriental Astronomy	152
4.4	India in Bailly's History of Astronomy	156
4.4.1	Inventing the Historiography of 'Scientific Revolution'	157
4.4.2	The Enlightenment Master Narrative	160
4.5	The Reception of Bailly's History	164
4.5.1	Montucla's Specialist History of Mathematics	164
4.5.2	The History of Astronomy in Laplace's Exposition	168
4.6	The Historiography of Science at the Dawn of the	175

Revolution

Chapter 5

	Institutional Reform and the Retreat from the Enlightenment Ideal (1800-1820)	182
5.1	Institutional Reform and Differentiation	183
5.2	The Socio-Cognitive Dimension of Institutional Reform and Differentiation	186
5.2.1	The Meta-context of Decline	191
5.2.2	Delambre: Astronomer-Historian of Astronomy	193
5.3	Breaking with the Enlightenment History of Non-Western Science	195
5.3.1	Delambre's Theory of Science	196
5.3.2	The Construction of the Origins of a Western Science	199
5.3.3	The Conflict of National Interpretive Traditions: Anglo-French Rivalry	205
5.3.4	The Algebraic Signature of Indian Civilization	209
5.3.5	The Break with the Eighteenth Century?	216
5.4	The Demarcation of Boundaries in Constructing Eurocentric Science	219

Chapter 6

	The Decline of an Interpretative Tradition (1830- 1850)	226
6.1	Bureau des Longitudes ventures into Orientalism	227
6.1.1	The Controversy over the Zodiac and the Continuing Battle with the British Orientalists	229
6.1.2	The Arrow of Influence is Directed Eastward	233
6.1.3	A Lost Opportunity for French Indology	237
6.2	Michel Chasles: "le grand géometre français"	240
6.2.1	Nationalism Shapes the Historiography of Mathematics	242
6.2.2	The Origins of Indian Astronomy Shrouded in Incertitude and Obscurity	244
6.2.3	The Multiplication of Priority Disputes	247

6.2.4	The L'Esprit Géometric Spirit as Demarcation Principle	249
6.2.5	Brahmagupta's Theorems of Cyclic Quadrilaterals	253
6.3	Sédillot: "les Arabes ont été, en tout, nos maîtres"	258
6.4	The Last Decade of an Interpretative Tradition	261
Chapter 7		
The Shifting Sands of Science and History		269
Bibliography		289
