

Ecology: Achievement and Challenge

*The 41st Symposium of the British Ecological Society jointly sponsored by
the Ecological Society of America
held at Orlando, Florida, USA 10–13 April 2000*

EDITED BY

MALCOLM C. PRESS

Department of Animal and Plant Sciences
University of Sheffield, UK

NANCY J. HUNTLY

Center for Ecological Research and Education
Idaho State University, USA

AND

SIMON LEVIN

Department of Ecology and Evolutionary Biology
Princeton University, USA

**Blackwell
Science**

Contents

List of Contributors, vii

History of the British Ecological Society, ix

Preface, xi

Part 1: Evolution and Population Biology

1 Genetics and ecology, 3

L. Partridge

2 Testing Antonovics' five tenets of ecological genetics: experiments with bacteria at the interface of ecology and genetics, 25

R.E. Lenski

3 Sociality and population dynamics, 47

T.H. Clutton-Brock

4 Studies of the reproduction, longevity and movements of individual animals, 67

I. Newton

Part 2: Functional and Community Ecology

5 Specificity, links and networks in the control of diversity in plant and microbial communities, 95

A.H. Fitter

6 Global change and the linkages between physiological ecology and ecosystem ecology, 115

J.R. Ehleringer, T.E. Cerling and L.B. Flanagan

7 Biodiversity, ecosystem processes and climate change, 139

J.H. Lawton

8 Plant functional types, communities and ecosystems, 161

J.P. Grime

9 Effects of diversity and composition on grassland stability and productivity, 183

D. Tilman

Part 3: Ecology of Changing Environments

- 10 Climate change and steady state in temperate hardwood forests, 211
M.B. Davis
- 11 Experimental plant ecology: some lessons from global change research, 227
Ch. Körner
- 12 Keeping track of carbon flows between biosphere and atmosphere, 249
J. Grace, P. Meir and Y. Malhi
- 13 Climate and plants: past, present and future interactions, 271
F.I. Woodward

Part 4: Ecosystems, Management and Human Impacts

- 14 Lost linkages and lotic ecology: rediscovering small streams, 295
J.L. Meyer and J.B. Wallace
- 15 Plant–mammal interactions: lessons for our understanding of nature and implications for biodiversity conservation, 319
R. Dirzo
- 16 Ecological economic theory for managing ecosystem services, 337
J. Roughgarden and P.R. Armsworth
- 17 Alternate states of ecosystems: evidence and some implications, 357
S.R. Carpenter

Part 5: Concluding Remarks

- 18 Concluding remarks, 387
J.H. Brown

Index, 397
