

Science and Selection

Essays on Biological Evolution and the Philosophy of Science

DAVID L. HULL
Northwestern University

CAMBRIDGE
UNIVERSITY PRESS

Contents

Introduction	<i>page</i> 1
PART I SELECTION IN BIOLOGICAL EVOLUTION	
1 Interactors versus Vehicles	13
Replicators and Interactors	22
Conceptual Evolution: Replication	32
Conceptual Evolution: Interaction	38
2 Taking Vehicles Seriously	46
3 A General Account of Selection: Biology, Immunology, and Behavior, with Rodney E. Langman and Sigrid S. Glenn	49
1 Introduction	49
2 A Brief Characterization of Selection	53
3 Selection in Biological Evolution	61
4 Somatic Selection in the Immune System	66
5 Operant Selection	75
6 Conclusion	90
PART II SELECTION IN THE EVOLUTION OF SCIENCE	
4 A Mechanism and Its Metaphysics: An Evolutionary Account of the Social and Conceptual Development of Science	97
Conceptual Inclusive Fitness	101
Selection Processes	109
The Role of Individuality in Selection	112
Science as a Selection Process	115
Disanalogies between Biological and Conceptual Evolution	119

Contents

Conceptual Interaction	125
The Type Specimen Method of Reference	127
Conclusion	132
5 Why Scientists Behave Scientifically	135
6 What's Wrong with Invisible-Hand Explanations?	139
1 Introduction	139
2 Invisible-Hand Explanations in Their Causal Context	140
3 A Social Structure of Science	142
4 Invisible-Hand Explanations in Science	144
5 Conclusion	148
PART III TESTING OUR VIEWS ABOUT SCIENCE	
7 A Function for Actual Examples in Philosophy of Science	151
Thought Experiments in Science	153
Thought Experiments in Philosophy of Science	158
Conclusion	164
8 The Evolution of Conceptual Systems in Science	166
Models of Conceptual Selection in Science	169
Gathering Data to Test Models of Science	174
The Demic Structure of Science	178
Conclusion	183
9 Testing Philosophical Claims about Science	185
1 Testing Meta-Level Claims	186
2 Idealizations	188
3 Studying Science	190
4 Operationalizing in the Study of Science	192
5 Normative Claims about Science	194
10 That Just Don't Sound Right: A Plea for Real Examples	196
Biological Species	205
Natural Kinds	213
Conclusion	218
11 Studying the Study of Science Scientifically	222
Planck's Principle	226
Birth Order and Science	231
The Role of Novel Predictions in Science	233
Conclusion	238
