

**FS POSEIDON
FAHRTBERICHT POS 260
CRUISE REPORT POS 260**

BIGSET

**BIOGEOCHEMICAL TRANSPORT
OF MATTER AND ENERGY IN THE DEEP SEA**

**LEIXOES/OPORTO (PORTUGAL) - GALWAY (IRELAND) - CORK (IRELAND)
APRIL 26 - JUNE 23, 2000**

**Edited by
Olaf Pfannkuche and Christine Utecht
with contributions of cruise participants**

**SUB Göttingen
211 818 585**

Table of Contents	Page
1. Introduction.....	2
2. Objectives.....	4
3. Participants and participating institutes	17
4. Narrative.....	18
5. Results.....	25
 5.1 Benthic response to a simulated pulsed sedimentation event of organic matter under in situ conditions	25
 5.2 Sediment community oxygen consumption and the role of bacteria and macrofauna for degradation and entrainment into the sediment	30
 5.3 Microbial degradation of chitin in deep-sea sediments.....	36
 5.4 Benthic foraminifera.....	40
 5.5 Geochemistry of the sediment - pore water system.....	45
 5.6 Sinking and suspended particles in the low bottom water column and the sediment	50
 5.7 Cycling of particulate matter in the bottom-near water column.....	60
Acknowledgements.....	63
6. List of stations	64
