

GEOSTATISTICAL RESERVOIR MODELING

Clayton V. Deutsch

OXFORD
UNIVERSITY PRESS

2002

Contents

1	Introduction	3
1.1	Plan for the Book	4
1.2	Key Concepts	6
1.3	Motivation for Reservoir Models	10
1.4	Data for Reservoir Modeling	12
1.5	An Introductory Example	14
1.6	Work Flow	21
2	Preliminary Statistical Concepts	31
2.1	Geological Populations and Stationarity	32
2.2	Notation and Definitions	33
2.3	Bivariate Distributions	41
2.4	Q-Q Plots and Data Transformation	44
2.5	Declustering	50
2.6	Histogram and Cross Plot Smoothing	64
2.7	Monte Carlo Methods and The Bootstrap	65
2.8	Work Flow	70
3	Gridding Reservoir Layers	79
3.1	Gridding for Geologic Modeling	80
3.2	Stratigraphic Correlation/Coordinates	85
3.3	Faults	93
3.4	Uncertainty in Reservoir Geometry	96
3.5	Work Flow	96
4	Quantifying Spatial Correlation	101
4.1	The Random Function Concept	102
4.2	Calculating Experimental Variograms	105
4.3	Interpreting Experimental Variograms	114
4.4	Horizontal Variograms	124
4.5	Variogram Modeling	131
4.6	Cross Variograms	139
4.7	Work Flow	148

5	Preliminary Mapping Concepts	153
5.1	Kriging	154
5.2	Sequential Gaussian Simulation	162
5.3	Direct Sequential Simulation	167
5.4	Indicator Formalism	168
5.5	P-Field Methods	175
5.6	Accounting for Trends	178
5.7	Work Flow	187
6	Cell-Based Facies Modeling	193
6.1	Choosing the Appropriate Method	193
6.2	Sequential Indicator Simulation	196
6.3	Truncated Gaussian Simulation	204
6.4	Cleaning Cell-Based Facies Realizations	210
6.5	Work Flow	216
7	Object-Based Facies Modeling	223
7.1	Background	223
7.2	Stochastic Shales	229
7.3	Fluvial Modeling	230
7.4	Non-Fluvial Depositional Systems	238
7.5	Work Flow	241
8	Porosity and Permeability Modeling	245
8.1	Background	246
8.2	Gaussian Techniques for Porosity	249
8.3	Porosity/Permeability Transforms	254
8.4	Gaussian Techniques for Permeability	260
8.5	Indicator Technique for Permeability	262
8.6	Work Flow	268
9	Simulated Annealing for Geostatistics	275
9.1	Background	275
9.2	Steps in Annealing	277
9.3	Problem Areas	291
9.4	Place of Simulated Annealing/Work Flow	293
10	Uncertainty Management	295
10.1	Models of Uncertainty	296
10.2	Cross Validation and the Jackknife	298
10.3	Checking Distributions of Uncertainty	299
10.4	How Many Realizations?	309
10.5	Ranking Realizations	313
10.6	Decision Making with Uncertainty	316
10.7	Work Flow	320

11 Special Topics	325
11.1 Scale Up from Core to Modeling Cell	326
11.2 Surface-Based Modeling	328
11.3 Multiple Point Statistics	330
11.4 Dynamic Data	331
11.5 Input to Flow Simulation	332
11.6 Final Thoughts	334
A Glossary and Notation	337
A.1 Glossary	337
A.2 Notation	347
Bibliography	351
Index	372
