Postscript Life, the Universe and a Theory of Everything 299
One of the more unusual sources of reference used in this research is William Preston's famous book, *Illustrations of Masonry* which was first published in London in 1772. This book is difficult for Masons to obtain, and virtually impossible for non-Masons, so to help readers interested in inspecting the original material, the text has been made available as a web-book at http://www.robertlomas.com. For full details of how to obtain your own usercode to allow you to access *e-Illustrations of Masonry* see page 322.
