# Fundamentals of Surface Mechanics

With Applications

Second Edition

With 218 Figures

Springer

# Contents

<b>Series Preface</b>	<b>v</b>
<b>Preface to the Second Edition</b>	<b>vii</b>
<b>Preface to <i>Surface Mechanics</i></b>	<b>ix</b>
<b>Credits for Illustrations and Tables</b>	<b>xix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Balance of Momentum . . . . .	1
1.2 Energy Balance . . . . .	2
1.3 Entropy . . . . .	3
1.4 Constitutive Relationship and the Energy Equation for an Elastic Solid . . . . .	5
1.5 Constitutive Relationship—Heat Conduction . . . . .	6
1.6 Constitutive Relationship—Other Diffusion Types . . . . .	7
1.7 Constitutive Relationship—Linearly Viscous Fluid . . . . .	7
1.8 Constitutive Relationship—Perfectly Plastic Bodies . . . . .	7
1.9 Constitutive Relationship—Viscoelastic Bodies . . . . .	8
1.10 Constitutive Relationship—Maxwellian Dielectric . . . . .	8
1.11 Field Equations of Classical Electromagnetic Theory . . . . .	9
<b>2 Surface Temperatures in Moving Bodies</b>	<b>11</b>
2.1 Introduction . . . . .	11

2.2	Instantaneous Point Heat Source—Infinite Medium . . . . .	13
2.3	Instantaneous Point Heat Source—Semi-infinite Medium . . . . .	14
2.4	Continuous Point Heat Source—Semi-infinite Medium . . . . .	15
2.5	Partition of Heat—Circular Area of Contact . . . . .	20
2.6	Line Heat Source on the Surface of a Semi-infinite Medium . . . . .	21
2.7	Instantaneous Point Heat Source—Moving Semi-infinite Medium . . . . .	22
2.8	Continuous Point Heat Source—Moving Semi-infinite Medium . . . . .	23
2.9	Distributive Heat Source—Moving Semi-infinite Medium . . . . .	25
2.10	Partition of Heat in Sliding Contact of Two Large Bodies . . . . .	28
2.11	Continuous Line Heat Source—Moving Semi-infinite Medium . . . . .	31
2.12	Continuous Strip Source—Moving Semi-infinite Medium . . . . .	33
2.13	Blok's Approximate Method for Partition of Heat . . . . .	37
2.14	Fourier Series, Fourier Integrals, and the Fourier Transform . . . . .	38
2.15	Continuous Strip Heat Source—Moving Semi-infinite Medium . . . . .	41
2.16	Continuous Strip Heat Source—Moving Layered Semi-infinite Medium . . . . .	45
2.17	Finite Fourier Transform . . . . .	50
2.18	Continuous Arc Heat Source—Rotating Circular Disk . . . . .	52
2.19	Legendre Polynomial . . . . .	55
2.20	Legendre Series . . . . .	57
2.21	Legendre Transform Pair . . . . .	57
2.22	Stationary Sphere Heated Over Its Polar Cap . . . . .	59
2.23	Fourier Cosine Transform . . . . .	61
2.24	Effects of Temperature-Dependent Thermal Properties . . . . .	62
	Exercises . . . . .	67

<b>3</b>	<b>Stress and Deformation Fields in Half-Space and Layered Elastic Media</b>	<b>69</b>
3.1	Introduction . . . . .	69
3.2	Stress–Strain Relations for a Linear Isotropic Elastic Solid . . . . .	70
3.3	Navier Equations . . . . .	70
3.4	Fundamental Potential Functions for Problems of Elastostatics . . . . .	71
3.5	The Kelvin Problem . . . . .	71
3.6	Stress Field and Displacement Field for the Kelvin Problem . . . . .	75

3.7	Concentrated Force Acting Vertically on an Elastic Half-Space . . . . .	79
3.8	Concentrated Force Acting Tangentially on an Elastic Half-Space . . . . .	80
3.9	The Boussinesq Problem . . . . .	81
3.10	The Cerruti Problem . . . . .	87
3.11	Distributive Normal Load on the Surface of an Elastic Half-Space . . . . .	89
3.12	Distributive Tangential Load on the Surface of an Elastic Half-Space . . . . .	92
3.13	The Flamant Problem . . . . .	93
3.14	An Elastic Half-Space Subjected to a Distributive Load Over a Strip . . . . .	96
3.15	Double Fourier Integral . . . . .	98
3.16	Distributive Normal Load—Double Transform Method . . . . .	99
3.17	Distributive Normal Load—Transform Method . . . . .	105
3.18	Moving Distributive Normal Load on an Elastic Half-Space . . . . .	111
3.19	Distributive Normal Load on a Hollow Cylinder . . . . .	117
3.20	Indentation of an Elastic Half-Space by a Rigid Smooth Body . . . . .	127
3.21	Indentation by a Rigid Flat-Ended Smooth Cylinder . . . . .	131
3.22	Indentation by an Axisymmetric Smooth Rigid Indenter . . . . .	132
3.23	Formulas for Indentation by an Axisymmetric Rigid Indenter . . . . .	139
3.24	Indentation by a Rigid Conical Smooth Indenter . . . . .	141
3.25	Indentation by a Smooth Rigid Sphere . . . . .	142
3.26	Indentation by an Axisymmetric Rigid Indenter . . . . .	145
3.27	Indentation by a Plane-Ended Cylindrical Indenter . . . . .	151
3.28	Indentation of an Elastic Layer by a Rigid Spherical Indenter . . . . .	152
3.29	Indentation of an Elastic Half-Space by an Elastic Sphere . . . . .	154
	Exercises . . . . .	157
<b>4</b>	<b>Thermoelasticity</b> . . . . .	<b>163</b>
4.1	Introduction . . . . .	163
4.2	Semi-infinite Solid . . . . .	163
4.3	Effect of Inertia . . . . .	166
4.4	Effect of Thermoelastic Coupling . . . . .	169
4.5	Convective Half-Space with Moving Heat Source— 2D Case . . . . .	171
4.6	Elastic Half-Space with Moving Heat Source— 3D Case . . . . .	176

<b>5</b>	<b>Viscoelasticity</b>	<b>179</b>
5.1	Introduction . . . . .	179
5.2	Models . . . . .	179
5.3	Elasticity–Viscoelasticity Analogy . . . . .	181
5.4	Other Representations of Mechanical Properties . . . . .	182
5.5	Influence of Temperature on Viscoelastic Behavior . . . . .	183
5.6	Example of the Elasticity–Viscoelasticity Analogy . . . . .	186
5.7	Response of a Viscoelastic Half-Space to Moving Loads . . . . .	188
5.8	Deformation of a Soft Layer Material Under a Moving Load . . . . .	191
5.9	Viscoelastic Layer on an Elastic Half-Space . . . . .	193
5.10	Multilayered Viscoelastic Media Under a Moving Load . . . . .	200
<b>6</b>	<b>Perfect Plasticity</b>	<b>201</b>
6.1	Introduction . . . . .	201
6.2	Slip-Line Theory . . . . .	201
6.3	Stress Field in a Semi-infinite Solid Under a Lubricated Flat Punch . . . . .	206
6.4	Stress Field in a Truncated Wedge Under a Lubricated Flat Punch . . . . .	207
6.5	Stress Field in a Wedge Under Lateral Pressure . . . . .	207
6.6	Compression of a Wedge by a Flat Die . . . . .	208
6.7	Sliding of a Wedge Under a Flat Die Under Load . . . . .	210
6.8	Indentation of a Semi-infinite Solid by a Lubricated Wedge . . . . .	211
6.9	A Friction Model . . . . .	212
6.10	Friction of Ploughing by Rigid Asperities . . . . .	213
6.11	Different Regimes of Friction and Wear . . . . .	214
6.12	Indentation of Sandwich Metal Strips Between Flat Dies . . . . .	217
6.13	Oblique Impact of a Hard Ball Against a Ductile Solid . . . . .	219
6.14	Slip-line Field of the Rolling Contact Problem at High Loads . . . . .	221
6.15	Indentation of a Semi-infinite Solid by a Cylinder . . . . .	223
6.16	Flattening of Circular Cylinder by a Lubricated Die . . . . .	224
6.17	Indentation of a Semi-infinite Solid by a Lubricated Spherical Die . . . . .	225
6.18	Indentation of a Semi-infinite Solid by the End of a Lubricated Cylinder . . . . .	226
6.19	Indentation of a Semi-infinite Solid by a Lubricated Truncated Cone . . . . .	227
<b>7</b>	<b>Rough Surfaces</b>	<b>229</b>
7.1	Introduction . . . . .	229
7.2	Bearing Area Curves . . . . .	230
7.3	Profilometric Representation of Surfaces . . . . .	231

7.4 Characterization of Surfaces by Autocorrelation Functions . . . . . 233

7.5 Characterization of Surfaces by Actual Area of Contact . . . . . 234

7.6 Characterization of Surfaces by Compliance . . . . . 236

7.7 Characterization of Surfaces by Fractal Geometry . . . . . 244

7.8 Some Studies Involving Surface Textures . . . . . 247

**8 Applications 251**

8.1 Introduction . . . . . 251

8.2 On Blok's Conjecture . . . . . 251

8.3 Interface Temperature Between a Rotating Disc and a Ring Sector . . . . . 254

8.4 Surface Temperature on a Fast-Moving Half-Space Due to a Unit Heat Source Over a Rectangular Area . . . . . 258

8.5 Temperature at the Sliding Interface for a Coated Body . . . . . 259

8.6 Coated Medium with Random Uniform Coating Thickness . . . . . 260

8.7 Rotating Cylinder Subject to Surface Heating and Convective Cooling . . . . . 262

8.8 Rotating Layered Circular Cylinder Subject to Surface Heating . . . . . 263

8.9 Rotating Layered Sphere Subject to Surface Heating . . . . . 267

8.10 Transient Case of a Moving Semi-infinite Body . . . . . 270

8.11 General Three-Dimensional Transient Case of a Cylindrical Rod . . . . . 271

8.12 Surface Temperature on the Truncated Face of a Cone . . . . . 274

8.13 Disc with Normal Edge Load . . . . . 278

8.14 Disc with Tangential Edge Load . . . . . 279

8.15 Semi-infinite Circular Cylinder with End Load . . . . . 280

8.16 Edge Effect on the Hertz Solution . . . . . 287

8.17 Compliance of Elastic Bodies in Contact . . . . . 288

8.18 Microslips Between Contacting Paraboloids . . . . . 291

8.19 Contact Pressures as an Elastic Roller Crosses a Scratch . . . . . 293

8.20 Layered Disc with Normal Edge Load . . . . . 294

8.21 Layered Elastic System Under a Moving Load . . . . . 297

8.22 Stress at the Interface of a Layered Elastic System . . . . . 300

8.23 Indentation of Anisotropic Materials . . . . . 303

8.24 Contact Stress of a Layered Transversely Isotropic Half-Space . . . . . 303

8.25 On Elastohydrodynamic Lubrication . . . . . 307

8.26 Thermal Stresses in an Elastic Half-Space with a Moving Heat Source . . . . . 311

8.27 Thermoelastic Solutions for a Half-Space with a Moving Heat Source . . . . . 314

8.28 Thermomechanical Cracking in Layered Media . . . . . 316

8.29	On Deformation Friction . . . . .	319
8.30	On Two-Dimensional Rolling in Viscoelastic Material . . . . .	320
8.31	Contact Problems in Linear Theory Viscoelasticity . . . . .	323
8.32	Thermal Softening Mechanism of Lubricated Brakes and Clutches . . . . .	331
8.33	Plastic Shakedown in Rolling Contact . . . . .	335
8.34	Soft Metals in Static and Dynamic Loading . . . . .	336
8.35	Friction Under Metal-Working Processes . . . . .	347
8.36	Contact Between Rough Surfaces with Longitudinal Texture . . . . .	352
8.37	Transient Temperatures in the Vicinity of an Asperity Contact . . . . .	353
8.38	Normal Impact Model of Rough Surfaces . . . . .	358

**Appendix** **361**

A.1	Singular Integral Equations . . . . .	361
A.2	Abel's Integral Equation of the First Kind . . . . .	361
A.3	Abel's Integral Equation of the Second Kind . . . . .	362
A.4	Carleman's Integral Equation . . . . .	363
A.5	Other Singular Integral Equations . . . . .	364
A.6	Fredholm Integral Equations . . . . .	370
