

Geodätisch-geophysikalische Arbeiten in der Schweiz

(Fortsetzung der Publikationsreihe
«Astronomisch-geodätische Arbeiten in der Schweiz»)

herausgegeben von der

Schweizerischen Geodätischen Kommission
(Organ der Schweizerischen Akademie der Naturwissenschaften)

**Dreiundsechzigster Band
Volume 63**

**Analysis of refraction influences
in geodesy using image processing
and turbulence models**

Contents

1	Introduction.....	1
1.1	Correction methods.....	1
1.2	Previous research work on turbulence models and refraction.....	2
1.3	New developments and concepts of the presented research work.....	3
2	Wave propagation in refractive media.....	6
2.1	Refractive index.....	6
2.2	Refraction influence on propagation path.....	7
2.3	Refraction angle.....	11
2.4	Energy fluxes causing refractive index gradients in the atmosphere.....	13
2.4.1	Energy balance and stratification.....	13
2.4.2	Sensible heat flux and temperature gradient.....	14
2.5	Relevance of refraction influences for geodetic applications.....	16
2.5.1	Refraction influences in the context of other thermal influences.....	16
2.5.2	Precise levelling.....	16
2.5.3	Vertical angle measurements.....	18
2.6	Conclusions.....	20
3	Atmospheric turbulence model.....	21
3.1	Introduction.....	21
3.2	Energy spectrum.....	23
3.2.1	Energy density function of turbulent kinetic energy.....	23
3.2.2	Viscous subrange and dissipation rate.....	26
3.2.3	Inertial subrange.....	26
3.2.4	Energy input range.....	28
3.2.5	Stationarity of energy spectrum.....	28
3.2.6	Inner scale.....	28
3.2.7	Structure constants of velocity and temperature.....	30
3.3	Monin-Obukhov similarity.....	31
3.3.1	Scaling parameters.....	31
3.3.2	Dimensionless profile functions for structure parameters and temperature.....	34
3.4	Calculation of refraction angle using Monin-Obukhov similarity.....	35
3.5	Footprint considerations.....	37
3.6	Conclusions.....	39
4	Optical turbulence.....	41
4.1	Phenomena of optical turbulence.....	41
4.2	Modelling optical turbulence.....	43
4.2.1	Refractive index spectrum.....	43
4.2.2	Light propagation in turbulent media.....	45

4.3	Angle-of-arrival fluctuations for determination of C_n^2	48
4.3.1	Phenomenon.....	48
4.3.2	Modelling.....	49
4.4	Intensity fluctuations for determination of inner scale.....	52
4.4.1	Phenomena.....	52
4.4.2	Modelling.....	52
4.5	Analysis of accuracy.....	56
4.5.1	Random deviations.....	56
4.5.2	Systematic deviations.....	57
4.6	Conclusions.....	61
5	Measuring systems.....	63
5.1	Introduction.....	63
5.2	Imaging systems.....	64
5.2.1	CCD sensors.....	64
5.2.2	Criteria for the imaging systems.....	65
5.2.3	Video theodolite.....	65
5.2.4	Line scan camera.....	66
5.3	Reference measuring systems.....	71
5.3.1	Scintillometer.....	71
5.3.2	Temperature gradient measuring system.....	73
5.4	Calibration of image sensors.....	74
5.4.1	Video theodolite.....	75
5.4.2	Line scan camera.....	77
5.4.3	Radiometric calibration.....	78
5.5	Target.....	79
5.5.1	Reflectors.....	79
5.5.2	Coded levelling staffs.....	81
5.6	Data recording.....	83
6	Image processing.....	85
6.1	Introduction.....	85
6.2	Spectral analysis.....	86
6.2.1	Introduction.....	86
6.2.2	Stochastic model for the image signal.....	87
6.2.3	Estimation of power spectral density.....	88
6.2.4	Outlook: Wavelet transformation.....	91
6.3	Wiener filter for determination of intensity fluctuation.....	94
6.3.1	Introduction.....	94
6.3.2	Noncausal Wiener filter.....	96
6.3.3	Model of the power spectral density used for the Wiener filter.....	98
6.3.4	Implementation using adaptive Wiener filter.....	100
6.3.5	Conclusions and outlook.....	104
6.4	Edge detection for determination of angle-of-arrival fluctuation.....	105
6.4.1	Introduction.....	105
6.4.2	Edge operators.....	107

6.4.3	Comparison and evaluation.....	113
6.4.4	Implementation of least squares template matching (LSM).....	115
6.4.5	Implementation of Canny operator.....	118
6.4.6	Accuracy of edge detection.....	124
6.4.7	Conclusions.....	125
7	Measurements and results.....	127
7.1	Video theodolite	127
7.1.1	Field experiment	127
7.1.2	Results and conclusions.....	129
7.2	Line scan camera	133
7.2.1	Field experiment	133
7.2.2	Results and conclusions.....	137
7.3	Temperature measurements.....	143
7.4	Temperature gradient profile.....	147
7.5	Accuracy of temperature gradient and refraction angle.....	148
7.5.1	Derivation	148
7.5.2	Conclusions.....	150
8	Conclusions and outlook.....	152
8.1	Determination of C_n^2	152
8.2	Inner scale.....	153
8.3	Field experiments.....	154
8.4	Disturbing influences on imaging systems.....	155
8.5	Outlook.....	155
Appendix A: Fractals		157
Appendix B: List of symbols.....		161
