

GEOLOGICAL SOCIETY MEMOIR No. 25

Earth, Water, Ice and Fire:  
Two Hundred Years of  
Geological Research in the  
English Lake District

BY

DAVID OLDROYD

School of History and Philosophy of Science  
The University of New South Wales, Australia

2002

Published by  
The Geological Society  
London

# Contents

Preface and Acknowledgements	vi
Introduction	1
Chapter 1 In the beginning	3
Chapter 2 Adam in Lakeland	13
Chapter 3 Robert Harkness, Henry Alleyne Nicholson and Charles Lapworth	27
Chapter 4 The first surveys	39
Chapter 5 John Marr and Alfred Harker	59
Chapter 6 Edward Walker, Robert Rastall, Frederick Green, John Hartley, George Mitchell and their work on Lakeland volcanics and structure	75
Chapter 7 Granites, garnets, the 'streaky' rocks and Mitchell's later work	93
Chapter 8 The Skiddaw graptolites	107
Chapter 9 The Skiddaw Slates and the Borrowdale Volcanics	121
Chapter 10 From micro to macro: plate tectonics in the Lake District – a tangle of theories	141
Chapter 11 Gravity, geomagnetism and granites	153
Chapter 12 Some more PhDs, and the extension of Lakeland surveying in the 1970s	161
Chapter 13 The stratigraphy of 'Otley III'	171
Chapter 14 The great collaboration	187
Chapter 15 Collaborating on the Skiddaw Group	197
Chapter 16 Collaborating on the Borrowdale Volcanics and the granites	211
Chapter 17 Collaborating on the Windermere	231
Chapter 18 Tertiary uplift	243
Chapter 19 The glaciation of the Lake District	255
Chapter 20 Nirex and the great denouement	271
Chapter 21 Some concluding thoughts	289
References	297
Index	321
