Handwriting Recognition

Soft Computing and Probabilistic Approaches
## Contents

1 Introduction

1.1 Feature Extraction Methods .................................. 2
1.1.1 Extracting Features from Binary Images .......... 3
1.1.2 Extracting Features from Gray-Scale Images .... 5
1.2 Pattern Recognition Methods ............................... 6
1.2.1 Statistical Pattern Recognition ...................... 6
1.2.2 Structural Pattern Recognition ...................... 9
1.2.3 Neural Networks for Pattern Recognition .......... 11
1.2.4 Soft Computing in Handwriting Pattern Recognition 12

2 Pre-processing and Feature Extraction ....................... 17

2.1 Pre-processing of Handwritten Images .................... 17
2.1.1 Pre-processing for Handwritten Characters ........ 17
2.1.2 Pre-processing for Handwritten Words .......... 21
2.2 Feature Extraction from Binarized Images ............. 30
2.3 Feature Extraction Using Gabor Filters ............... 31
2.3.1 Skeletonization Using Gabor Filters .......... 42
2.3.2 Results of Skeletonization .................... 49
2.3.3 Extracting Oriented Segments Using Gabor Filters 57
2.4 Concluding Remarks ........................................ 57

3 Hidden Markov Model-Based Method for Recognizing Handwritten Digits .... 61

3.1 Theory of Hidden Markov Models ......................... 61
3.1.1 Markov Process .................................. 61
3.1.2 Hidden Markov Models ............................. 63
3.1.3 Basic Algorithms for HMMs .......................... 65
3.1.4 Continuous Observation Hidden Markov Models .... 73
3.2 Recognizing Handwritten Numerals Using Statistical and Structural Information .................. 76
3.2.1 Statistical Modeling ................................ 76
3.2.2 Structural Modeling ................................ 82
3.3 Experimental Results .................................. 86
3.4 Conclusion ............................................. 87

4 Markov Models with Spectral Features for Handwritten Numeral Recognition .... 89

4.1 Related Work Using Contour Information ................ 89
