Contents

NIEUWLAND, D. A. Introduction: new insights into structural interpretation and modelling	1
CELLO, G., TONDI, E., VAN DIJK, J. P., MATTIONI, L., MICARELLI, L. & PINTI, S. Geometry, kinematics and scaling properties of faults and fractures as tools for modelling geofluid reservoirs: examples from the Apennines, Italy	7
SCHROOT, B. M. & DE HAAN, H. B. An improved regional structural model of the Upper Carboniferous of the Cleaver Bank High based on 3D seismic interpretation	23
RUTTEN, K. W. & VERSCHUREN, M. A. J. Building and unfaulting fault–horizon networks	39
HINDLE, D. Finite strain variations along strike in mountain belts	59
DELVAUX, D. & SPERNER, B. New aspects of tectonic stress inversion with reference to the TENSOR program	75
SPERNER, B., MÜLLER, B., HEIDBACH, O., DELVAUX, D., REINECKER, J. & FUCHS, K. Tectonic stress in the Earth's crust: advances in the World Stress Map project	101
VOLTI, T. & CRAMPIN, S. A four-year study of shear-wave splitting in Iceland: 1. Background and preliminary analysis	117
VOLTI, T. & CRAMPIN, S. A four-year study of shear-wave splitting in Iceland: 2. Temporal changes before earthquakes and volcanic eruptions	135
DOOLEY, T., MCCLAY, K. R. & PASCOE, R. 3D analogue models of variable displacement extensional faults: applications to the Revfallet Fault system, offshore mid-Norway	151
SHELLART, W. P. & NIEUWLAND, D. A. 3D evolution of a pop-up structure above a double basement strike-slip fault: some insights from analogue modelling	169
TENTLER, T. & TEMPERLEY, S. Segment linkage during evolution of intracontinental rift systems: insights from analogue modelling	181
MULUGETA, G. & SOKOUTIS, D. Hanging wall accommodation styles in ramp–flat thrust models	197
BUROV, E. & POLIAKOV, A. Erosional forcing of basin dynamics: new aspects of syn- and post-rift evolution	209
ROBIN, C., ALLEMAND, P., BUROV, E., DOIN, M. P., GUILLOCHEAU, F., DROMART, G. & GARCIA, J.-P. Vertical movements of the Paris Basin (Triassic–Pleistocene): from 3D stratigraphic database to numerical models	225
HOBBS, R., TONG, C. H. AND PYE, J. Modelling and processing of 3D seismic data collected over the overlapping spreading centre on the East Pacific Rise at 9° 03'N	251
HEIDBACH, O. & DREWES, H. 3D finite element model of major tectonic processes in the Eastern Mediterranean	261
CORNU, T., SCHNEIDER, F. & GRATIER, J.-P. 3D discrete kinematic modelling of sedimentary basin deformation	275

CORNU, T., SCHNEIDER, F. & GRATIER, J.-P. 3D discrete kinematic modelling applied to extensional and compressional tectonics	285
SKAR, T. & BEEKMAN, F. Modelling the influence of tectonic compression on the <i>in situ</i> stress field with implications for seal integrity: the Haltenbanken area, offshore mid-Norway	295
VAN WEES, J. D., ORLIC, B., VAN EIJS, R., ZIJL, W., JONGERIUS, P., SCHREPPERS, G. J., HENDRIKS, M. & CORNU, T. Integrated 3D geomechanical modelling for deep subsurface deformation: a case study of tectonic and human-induced deformation in the eastern Netherlands	313
