# Nonlinear Spectral Theory

Walter de Gruyter · Berlin · New York

# Contents

Preface	vii
Introduction	1
<b>1 Spectra of Bounded Linear Operators</b>	<b>11</b>
1.1 The spectrum of a bounded linear operator . . . . .	11
1.2 Compact and $\alpha$ -contractive linear operators . . . . .	16
1.3 Subdivision of the spectrum . . . . .	23
1.4 Essential spectra of bounded linear operators . . . . .	30
1.5 Notes, remarks and references . . . . .	33
<b>2 Some Characteristics of Nonlinear Operators</b>	<b>40</b>
2.1 Some metric characteristics of nonlinear operators . . . . .	40
2.2 A list of examples . . . . .	43
2.3 Compact and $\alpha$ -contractive nonlinear operators . . . . .	51
2.4 Special subsets of scalars . . . . .	61
2.5 Notes, remarks and references . . . . .	64
<b>3 Invertibility of Nonlinear Operators</b>	<b>67</b>
3.1 Proper and ray-proper operators . . . . .	67
3.2 Coercive and ray-coercive operators . . . . .	73
3.3 Further properties of nonlinear operators . . . . .	76
3.4 The mapping spectrum . . . . .	78
3.5 Excursion: topological degree theory . . . . .	85
3.6 Notes, remarks and references . . . . .	92
<b>4 The Rhodius and Neuberger Spectra</b>	<b>94</b>
4.1 The Rhodius spectrum . . . . .	94
4.2 Fréchet differentiable operators . . . . .	96
4.3 The Neuberger spectrum . . . . .	100
4.4 Special classes of operators . . . . .	103
4.5 Notes, remarks and references . . . . .	107
<b>5 The Kachurovskij and Dörfner Spectra</b>	<b>109</b>
5.1 Lipschitz continuous operators . . . . .	109
5.2 The Kachurovskij spectrum . . . . .	111
5.3 The Dörfner spectrum . . . . .	118

5.4	Restricting the Kachurovskij spectrum . . . . .	120
5.5	Semicontinuity properties of spectra . . . . .	121
5.6	Continuity properties of resolvent operators . . . . .	123
5.7	Notes, remarks and references . . . . .	125
<b>6</b>	<b>The Furi–Martelli–Vignoli Spectrum</b>	<b>130</b>
6.1	Stably solvable operators . . . . .	130
6.2	FMV-regular operators . . . . .	135
6.3	The FMV-spectrum . . . . .	139
6.4	Subdivision of the FMV-spectrum . . . . .	141
6.5	Special classes of operators . . . . .	144
6.6	The AGV-spectrum . . . . .	148
6.7	Notes, remarks and references . . . . .	155
<b>7</b>	<b>The Feng Spectrum</b>	<b>159</b>
7.1	Epi and $k$ -epi operators . . . . .	159
7.2	Feng-regular operators . . . . .	166
7.3	The Feng spectrum . . . . .	170
7.4	Special classes of operators . . . . .	173
7.5	A comparison of different spectra . . . . .	178
7.6	Notes, remarks and references . . . . .	181
<b>8</b>	<b>The Văth Phantom</b>	<b>184</b>
8.1	Strictly epi operators . . . . .	184
8.2	The phantom and the large phantom . . . . .	186
8.3	The point phantom . . . . .	192
8.4	Special classes of operators . . . . .	199
8.5	A comparison of spectra and phantoms . . . . .	206
8.6	Notes, remarks and references . . . . .	212
<b>9</b>	<b>Other Spectra</b>	<b>214</b>
9.1	The semilinear Feng spectrum . . . . .	214
9.2	The semilinear FMV-spectrum . . . . .	223
9.3	The pseudo-adjoint spectrum . . . . .	228
9.4	The Singhof–Weyer spectrum . . . . .	232
9.5	The Weber spectrum . . . . .	240
9.6	Spectra for homogeneous operators . . . . .	243
9.7	The Infante–Webb spectrum . . . . .	253
9.8	Notes, remarks and references . . . . .	263

<b>10 Nonlinear Eigenvalue Problems</b>	268
10.1 Classical eigenvalues . . . . .	268
10.2 Eigenvalue problems in cones . . . . .	275
10.3 A nonlinear Krejn–Rutman theorem . . . . .	280
10.4 Other notions of eigenvalue . . . . .	285
10.5 Connected eigenvalues . . . . .	294
10.6 Notes, remarks and references . . . . .	296
<b>11 Numerical Ranges of Nonlinear Operators</b>	303
11.1 Linear operators in Hilbert spaces . . . . .	303
11.2 Linear operators in Banach spaces . . . . .	307
11.3 Numerical ranges of nonlinear operators . . . . .	313
11.4 Numerical ranges and Jordan domains . . . . .	327
11.5 Notes, remarks and references . . . . .	329
<b>12 Some Applications</b>	336
12.1 Solvability of nonlinear equations . . . . .	336
12.2 Solvability of semilinear equations . . . . .	341
12.3 Applications to boundary value problems . . . . .	350
12.4 Bifurcation and asymptotic bifurcation points . . . . .	360
12.5 The $p$ -Laplace operator . . . . .	366
12.6 Notes, remarks and references . . . . .	369
References	375
List of Symbols	395
Index	401
